

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

COMMISSIONERS OF THE SINKING FUND.

TREASURER.

AUDITORS.

TAX LIST.

 THE INDEX WILL BE FOUND AT THE END OF THE BOOK.

REPORT
OF THE
SELECTMEN, SURVEYORS OF HIGHWAYS,
AND
BOARD OF HEALTH.

REPORT.

THE undersigned, elected Selectmen at the annual town meeting of 1880, organized by the choice of Charles H. Drew, chairman, and Charles D. Lincoln, clerk.

In November, Mr. Roland C. Lincoln, one of the board, having become a non-resident, vacated his office.

Committees on the several departments of the business of the board were appointed, as follows : —

Accounts, Mr. Candage.

Fire Department, Messrs. James and Lincoln.

Police, Messrs. White and Lincoln.

Poor, Messrs. Drew and Candage.

Public Buildings, Messrs. Whyte and James.

Public Grounds, Messrs. Drew and Candage.

Sewers, Messrs. James and Lincoln.

Street Lamps, Messrs. Drew and Whyte.

Town Stable, Messrs. James and Candage.

Town Hall, Mr. Whyte.

Subsequently Messrs. James and Candage were appointed a committee on Thayer street and sewer.

This report will present first an account of the business transacted in those departments respectively; after which will be presented a report upon miscellaneous matters not included within either of the departments in charge of the committees of the board; then the report of the Surveyors of Highways, and lastly, the report of the Board of Health. The reports to this board of officers at the head of departments of its business will be appended.

ACCOUNTS.

During the year the board has drawn 1110 orders against the several appropriations made by the town. Following is a statement of the same : —

| SUBJECT OF APPROPRIATION. | Amount. | Expended. | Unexpended. |
|---|------------|-----------|-------------|
| Abatement of taxes | \$1,000 00 | \$ | \$ |
| Assessors | 2,200 00 | 2,200 00 | |
| Auditors | 150 00 | | |
| Cemetery, Walnut street | 200 00 | 162 11 | 37 89 |
| Clerk of Selectmen, and Overseers of Poor | 500 00 | 500 00 | |
| Clerk of Trustees Walnut Hills Cemetery. | 150 00 | 150 00 | |
| Construction of Brook street, &c..... | 9,000 00 | 8,318 78 | 681 22 |
| Contingencies | 8,000 00 | 7,912 37 | 87 63 |
| Decoration Day | 300 00 | 300 00 | |
| Fire Department | 7,000 00 | 7,093 37 | |
| Hose, new | 1,000 00 | 1,000 00 | |
| Hose Company, Longwood | 400 00 | 303 14 | 96 86 |
| Health Department | 1,400 00 | 1,389 92 | 10 08 |
| Highways, including crossings | 15,150 00 | 15,150 00 | |
| Highways, removing snow from sidewalks | 2,000 00 | 2,000 00 | |
| Hydrants, re-appropriated | 118 79 | 118 61 | 18 |
| Interest on town debt | 93,750 00 | | |
| Lamps on High street | 250 00 | 101 85 | 148 15 |
| Library | 4,000 00 | 4,000 00 | |
| Librarian's salary | 1,200 00 | 1,200 00 | |
| Lighting streets | 10,300 00 | 10,301 19 | |
| Longwood Bridge repairs | 500 00 | 243 52 | 256 48 |
| Overseers of the Poor | 1,000 00 | 941 54 | 58 46 |
| Payment of amount borrowed in 1879 for new school house | 5,000 00 | 5,000 00 | |
| Payment of amount borrowed in 1879 on Brook street and sewer | 20,000 00 | 20,000 00 | |
| Plans for sewer system, re-appropriated. | 1,500 00 | 1,500 00 | |
| Police | 15,000 00 | 14,388 63 | 611 37 |
| *Poor, support of | 6,374 25 | 7,621 83 | |
| Printing supplementary catalogue, Public Library | 1,000 00 | | |
| Repairs of town buildings | 1,000 00 | 995 56 | 4 44 |
| Ringin bell | 175 00 | 166 00 | 9 00 |
| Selectmen | 2,000 00 | 1,836 60 | 163 40 |
| Sewers, care of | 1,500 00 | 1,259 91 | 240 09 |
| Sidewalks | 4,000 00 | 4,000 00 | |
| Sinking fund | 60,807 25 | 60,807 25 | |
| Soldiers, disabled, and families of de- ceased soldiers | 250 00 | 587 23 | |
| State aid | 800 00 | 800 00 | |

*Including amount received from City of Boston, \$356 25

Other sources, 16 00

\$374 25

STATEMENT OF ACCOUNTS.—*Concluded.*

| SUBJECT OF APPROPRIATION. | Amount. | Expended. | Unexpended. |
|--|-----------|-----------|-------------|
| St. Paul street sewer..... | \$800 00 | \$120 08 | \$679 92 |
| Superintendent of Streets..... | 1,200 00 | 1,200 00 | |
| Town Clerk..... | 750 00 | 750 00 | |
| Town Hall, lighting, care of, and janitor, Thayer street and place, making of, and land damages..... | 2,500 00 | 2,443 08 | 56 92 |

| Treasurer and Collector..... | 8,000 00 | 6,632 13 | 1,367 87 |
| Water Board, pay of services in moving pumping station..... | 2,000 00 | 2,000 00 | |
| Water Works, committee on fraud in con- struction of filtering gallery when built. | 1,500 00 | 1,500 00 | |
| Moving pumping-station, &c..... | 100 00 | | |
| Watering streets..... | 10,746 57 | 10,211 99 | 534 58 |
| | 5,000 00 | 4,831 20 | 168 80 |

A tabular statement of the indebtedness of the town is appended to this report.

FIRE DEPARTMENT.

The board elected George H. Johnson, Andrew Noland, and Alfred E. Kenrick, Fire Engineers. The report of the engineers will be found in the appendix to this report. The officers and men of the several companies in the department are in an excellent state of discipline and efficiency, and the buildings and apparatus are in good order. An appropriation of the same sum as was appropriated last year (\$7000) is recommended for the maintenance of this department for the year ensuing, and an appropriation of \$500 for the Longwood company. An appropriation of \$100 is recommended for the purchase of two fire extinguishers.

POLICE.

The board appointed Alonzo Bowman, Chief of Police, and fixed his compensation at \$3.00 per day. George F. Dearborn and Charles F. McCausland were appointed Sergeants, each at \$2.75 per day, and Burnham C. Clark, Mears Orcutt, Thomas J. Murray, William W. O'Connell, Burton R. Willis, George F. Marston, Albert S. Paige, Charles H. Cilley, Joseph J. O'Connell, Alonzo W. Corey, Robert J. Watson and William Miller were appointed Patrolmen. Subsequently, Alden A. Manley was appointed a patrolman in place of Charles H. Cilley, who resigned. The compensation of patrolmen was fixed at \$2.50 per day for those over three years in service; \$2.38 for those over one year and less than three years in service; and \$2.25 for those less than one year in service.

The duties of the police have been well discharged during the past year, and the force is in a good state of discipline and efficiency. The report of the Chief, which is appended hereto, shows an amount of work done which entitles him and the force to the commendation of the town. At the beginning of the year it seemed advisable to add something to the pay of all the members of the force except those who had not served one year. The pay as it now stands is less than that of the Boston police. One man was added to the force, and early in the year the board directed the detail of one man for the especial purpose of enforcing the statute respecting the sale of intoxicating liquors. The officer thus detailed has been active and efficient in the discharge of his duties. Special attention is requested to that portion of the report of the Chief of Police respecting the increase of the police force. If, upon consideration, the town should be of opinion that the recommendation of the Chief of Police should be carried out, an appropriation of \$19,000 will be necessary. If this increase is not made, an appropriation of \$14,500 will be sufficient.

THE POOR.

The duties of the committee on the poor have all been rendered in connection with the Overseers of the Poor, to whose report reference is made for information upon this subject.

PUBLIC BUILDINGS.

The public buildings (a schedule of which will be found appended to this report,) are all in good condition. During the year no other repairs have been necessary than the painting of portions of some of them. For the year ensuing no considerable repairs will be necessary. An appropriation of \$1000 is recommended for such repairs as may be required.

PUBLIC GROUNDS.

The public grounds are, in the main, in good order. The "play-ground," so called, on Brookline avenue, is altogether unfit for the purpose for which it was purchased, and never has been, and is not now, of any use to the public. A moderate expenditure for grading and the planting of trees would put it in fit condition for the use for which it was intended. In consequence of the proposed improvement of Muddy River and its banks, no appropriation for this purpose is now recommended. The Cypress street lot, known as the "Library Lot," is not wanted by the town, and in the opinion of the board should be sold. The estate on Heath street, purchased in 1873 for school purposes, is in poor condition. It has been occupied for some time by some town paupers. The board recommend that this property be sold. We have permitted the Brookline Athletic Club to make a track and construct seats upon the Cypress street play-ground, for the purpose of giving exhibitions of athletic sports; and we have contributed \$50 towards the cost.

SEWERS.

The plans for the construction of lateral sewers throughout that portion of the town intended to be drained by the main sewer constructed in 1877, and which, as stated in the last annual report, were being made by Messrs. Shedd & Sawyer, have been completed, and were, together with a detailed description of the same, received by us in July last. The cost of these plans and descriptions was fifteen hundred dollars, and has been paid from the appropriation specially made for this purpose.

At the town meeting held Sept. 16, 1880, the town accepted the report of the Selectmen laying out a sewer from Thayer place through the lands of E. C. Emerson and others, to and through White place and connecting with the main sewer under the tracks of the Boston & Albany railroad, opposite the depot.

This sewer has been completed, with the exception of two catch basins, one at the junction of Thayer and Washington streets, and one at the junction of Thayer street and Davis avenue, which, owing to the severe frost at an unusually early date last December, we were obliged to omit until the Spring opens. The labor in constructing this sewer was performed by contract, by Messrs. Sanborn, Dike & Brigham, the materials being furnished by the town, the work being under the direction of A. H. French, Civil Engineer, from plans as originally made by Shedd & Sawyer. For details of cost see Treasurer's report.

An appropriation of eight hundred dollars was made November 22d, 1880, for the purpose of laying a short sewer in Aspinwall avenue and St. Paul street. A small amount of material was purchased for the sewer, but owing to the lateness of the season it was impossible to properly construct the same. We recommend a re-appropriation of this amount, and that the sewer be put in as early as possible in the Spring.

Petitions have been received for one or more sewers in other parts of the town, but as the hearings in relation to them have not been completed, we are obliged to defer our report upon them until the annual town meeting. We wish to call the attention of the town to the following matters which seem to us of importance.

First, in relation to the disposition of moneys received on account of sewer assessments. As the town in times past has expended large sums of money in the construction of main and trunk lines of sewers, which have been paid for either by direct taxation at the time of construction, or by the sale of bonds, the payment of which is provided for by the sinking fund, it seems to us that all moneys received and to be received on account of sewer assessments, should constitute a fund which should be appropriated to the extension of the lateral sewers as they may be wanted,—believing that if this is done it will furnish the means for the said extensions without further special taxation for this purpose ; and we offer the following vote :

Voted, That the Selectmen be authorized to lay lateral sewers in any of the streets of the town, and pay for the same from the money in the town treasury received from sewer assessments ; provided, that no such work be undertaken unless there is sufficient money in the treasury received from sewer assessments, at the time of beginning the work, to defray the cost of the same.

Second, we think it desirable, if not positively necessary, for the town to adopt some kind of sewer by-law or ordinance. In the spring of 1878, the Selectmen prepared a by-law on this subject, and by request of the town it was examined and approved by the committee upon revision of by-laws, and by them reported to the town, July 2d, 1878. No action was taken in regard to it. We recommend that the annexed by-law be now adopted.

BY-LAW CONCERNING SUPERINTENDENT OF SEWERS.

SECT. 1. There shall be appointed annually, by the Selectmen, a superintendent of common sewers, who shall hold his office for one year from the first day of April of the year in which he is appointed, or until he is removed, or a successor is appointed. He shall receive such compensation as the town may determine. He may be removed at the pleasure of the Selectmen, and in case said office shall at any time become vacant, it shall be filled in the manner above prescribed for the unexpired term.

On or before the first day of February, annually, the said superintendent shall make a report to the Selectmen, containing a statement of the expenditures, income and business of his department during the preceding year, a schedule of the property belonging to the department, and such other information, or such suggestions, as he may deem expedient, and also an estimate in detail of the appropriations required by his department for the next financial year.

SECT. 2. The superintendent shall, under the direction of the Selectmen, take the general supervision of all common sewers, which now are, or hereafter may be, built and owned by the town, or which may be permitted to be built or opened by its authority; and he shall take charge of the building and repairs of the same, and make all contracts for the supply of labor and materials not otherwise provided for by the Selectmen or the town.

SECT. 3. The superintendent, whenever any common sewer is ordered to be built or repaired, shall ascertain its depth, breadth, mode of construction and general direction, and take the plan thereof, and insert the same, with all those particulars, in a book, to be kept for that purpose, and forthwith ascertain and insert on said plan all entries made into such sewer.

SECT. 4. He shall keep an accurate account of the expense of constructing and repairing each common sewer, and shall report the same to the Selectmen, together with a list of the persons and estates deriving benefit therefrom, and an accurate statement of the frontage and superficial area of the lands upon which said expense ought to be assessed.

SECT. 5. The superintendent shall enter in books, kept for that purpose, all such assessments made by the Selectmen, and shall forthwith make out bills for the same, and deliver them to the Town Treasurer for collection; and the Town Treasurer shall forthwith demand payment in writing of the said bills, in the manner prescribed by law; and if any bills or dues under these by-laws remain unpaid at the expiration of three months after demand for payment, as aforesaid, the Town Treasurer shall cause the same to be collected by the proper legal process.

STREET LAMPS.

The plan of lighting streets, as in years before, with gas and gasoline, lighting twenty-three nights per month till 12 o'clock, midnight, was continued until May 1st, when the lighting under the contract made with Messrs. E. S. Ritchie & Sons was commenced, to continue until May 1st, 1881.

During the past year five new lamp-posts have been placed and lighted, as follows: High street, three; Freeman street, one; and Englewood avenue, one; making the whole number of street lamps now belonging to the town, 477.

The contract made with Messrs. Ritchie & Sons was for the lighting and care of 472 lights, they finding lamps, reflectors, and all material necessary, and keeping the glass in the lanterns in repair for one year, for the sum of \$9000,—the lights to burn all night, and every night throughout the year.

Using gas and gasoline on the same basis it would cost to light the same number of lights, (viz: 397 gas, and 75 gasoline,) as follows:—

| | |
|---|-------------|
| 397 gas lights, burning from one hour after sunset to one hour before sunrise, an average of 10 hours per night for 365 nights, four feet of gas each light per hour—5,796 1-5 thousand feet, at \$2.50 per thousand, . | \$14,490 50 |
| Expense of lighting, care, &c., each light, per night, 2 1/8 cts. | 3,079 23 |
| 75 gasoline lights, 365 nights, at 7 1/2 cts., | 2,053 12 |
| | <hr/> |
| | \$19,622 85 |

**NUMBER AND LOCATION OF STREET LAMPS AS LIGHTED UP
TO MAY 1, 1880, WHEN KEROSENE WAS SUBSTITUTED.**

| PLACE. | Gas. | Gasoline | PLACE. | Gas. | Gasoline |
|--------------------------------|------|----------|--------------------|------|----------|
| Andem Place, | 1 | - | Kent Street, | 7 | - |

| Hawes Street, | 1 | - | Walnut Place, | 4 | - |
| Harrison Place, | 2 | - | Warren Street, | 9 | 11 |
| Heath Street, | 12 | 2 | Washington Street, | 44 | - |
| High Street, | 4 | 4 | Waverly Place, | 1 | - |
| Holden Street, | 2 | - | Webster Place, | 1 | - |
| Irving Street, | 1 | - | White Place, | 1 | - |
| Ivy Street, | 4 | - | Winchester Street, | 5 | - |
| | | | Total, | 397 | 75 |

Should the former system of gas-lighting be restored, there will be two additional gas and three gasoline lights to be added to the above list, viz.: one gas light each on High street and Englewood avenue, and one gasoline on Freeman street and two on High street.

On reference to the report of the Chief of Police, it will be seen that a large number of lamps have been found at night extinguished. The larger part of this number was found soon after the beginning of the contract with Messrs. E. S. Ritchie & Sons, and it was attributed by them to the fact of the lanterns, which had been fitted for gas, not being suitable for kerosene lamps, which are easily extinguished by an upward current of air, which would have no effect upon gas. The contractors accordingly took steps to remedy the difficulty.

THAYER STREET.

Thayer street and Thayer place, as laid out by the Selectmen and accepted by the town, have been constructed. The work was done under the direction of the Superintendent of Streets, and largely with the town teams. A small amount of work remains to be done, but the streets will be open for travel early in the spring. For details of cost, reference is made to the Treasurer's report. A portion of the awards for damages have been accepted, and the rest it is expected will be. We recommend a re-appropriation of the unexpended balance.

TOWN STABLE.

The town stable is in good condition. For particulars reference is made to the report of the Superintendent of Streets.

TOWN HALL.

The board elected Willard Y. Gross, Janitor and special police officer for the Town Hall. The Town Hall is in good order. It has received repairs during the year, costing \$500. We recommend the appropriation of the sum of \$2500 for the care and repairs of the hall for the year ensuing.

BROOK STREET BETTERMENTS.

The Selectmen assessed betterments upon estates abutting upon Brook street, but some of the persons assessed objected to the paying of betterments and filed a statement of grounds upon which they purposed to resist the collection of the same. The board, after careful consideration of the matter, and upon advice of counsel that the betterments could not be legally assessed or collected, were of opinion that the assessments should be vacated.

MUDDY BROOK.

The board employed J. W. Steere, in connection with the Boston Board of Health, to tend the tide-gate on Brookline avenue, from May 1st to October 1st, at a compensation of \$20 per month, to be paid by Boston and Brookline.

We call especial attention to the report of the Park Commissioners upon the improvement of the Brook.

WATERING STREETS.

A portion of the streets have been watered by the two town water carts, and the remainder by Messrs. James Driscoll, Cornelius O'Hearn, Philip S. Allen, and James McBurney, with whom the board made contracts upon the same terms as last year. The districts watered by the town carts and the contractors respectively are the same as were reported to the town in the annual report of 1879.

CLAIMS AGAINST THE TOWN.

A claim brought against the town for an alleged defect in Beacon street, was settled for \$150, as it appeared that the person injured could probably recover a larger sum if suit were brought. A claim for damages for an alleged defect in Pearl

street has been made by Thomas McMahon, but no suit has been begun. The Selectmen, after full investigation, believe that he has no claim which he can enforce against the town. In the matter of the claim of Mrs. Mary Mahoney, nothing has been done by her, as yet. For information respecting the suits against the town, reference is made to the report of Messrs. M. & C. A. Williams, appended hereto.

APPOINTMENTS.

The board have made the following appointments, besides those already mentioned.

Inspector of Milk, Dr. G. K. Sabine.

Special Police Officers without pay, Thos. S. Pettengill for the cemeteries and at funerals; Wm. Morrison, for the Library building; R. B. Gardner, John Bean, J. M. Woods and H. M. Bean, conductors of passenger trains on the Boston and Albany railroad, as railroad police.

Funeral Undertaker, Thomas S. Pettengill.

Probation Officer, George F. Dearborn.

Messenger of the Board, Chas. T. Lanman, and on his resignation, Harry Seamans.

LICENSES.

The board have granted licenses to sell liquors to the following named grocers: Francis H. Bacon, Wm. D. Coolidge and Solomon Burt; and under the sixth class, to the following named apothecaries: Geo. W. Bird and Warren G. Currier. All other applications for licenses to sell liquors were rejected.

James Doherty and eighteen others were licensed to collect grease, bones and other refuse matter, house offal excepted.

E. S. Holmes was licensed to keep a billiard-room in St. Andrew building, Harvard Square. Patrick M. Kelleher, Patrick Fay, Thomas J. Cusick, Jacob Morlock, Thomas

McCullough and Joseph Widger were licensed as common victuallers; Jacob Morlock, Edwin Reed, and George E. Perkins, as hotel keepers; and Mrs. B. C. Clark, Emeline Thomas, and Elizabeth McKeernan, to keep intelligence offices.

MISCELLANEOUS.

The contract for furnishing coal for the town buildings, was awarded to Shepard, Robbins & Son, at \$5.25 per ton.

After due notice and hearing, the board granted a location to the Metropolitan Railroad Company for a double track in Washington street.

After due notice and hearing, the board refused to grant a petition for a location for an elevated railroad.

Upon petition of a number of citizens, the board directed the police to require barber shops to be closed on Sunday.

The wages of the town laborers were fixed at \$1.50 per day.

The report of the Inspector of Milk and of the Probation Officer are appended.

Tables showing the property of the town and its estimated value, for which the board is indebted to the Town Clerk, who prepared the same, are appended,

SURVEYORS OF HIGHWAYS.

The board organized by the choice of Charles H. Drew, chairman, Charles D. Lincoln, clerk. Highway districts were assigned as follows:

DISTRICT NO. 1, ASSIGNED TO MR. LINCOLN.

Beacon street from Boston line to Pleasant street, Pleasant street, Longwood avenue, Kent, Colchester, Carlton, Ivy, Essex, Mountfort, Prescott, St. Paul (north of Longwood avenue), Monmouth, St. Mary's and Green streets, and Monmouth court.

DISTRICT No. 2, ASSIGNED TO MR. WHYTE.

Beacon street from Pleasant to Washington street, Harvard, Winchester, Park, Marion, Vernon, Alton, St. Paul (south of Longwood avenue), Francis, Toxteth, Perry, Holden, Prospect, School, and Pierce streets, and Summit, Harvard, and Aspinwall avenues.

DISTRICT No. 3, ASSIGNED TO MR. JAMES.

Washington street from Boylston street to Brighton line, Beacon street from Washington street to Brighton line, Cypress street from Boylston street to Washington street, Boylston street from Cypress street to Newton line, Tappan and Brighton streets, and Davis, Gorham, Fisher, and Englewood avenues.

DISTRICT No. 4, ASSIGNED TO MR. CANDAGE.

Boylston street from Cypress street to Washington street, Walnut street from Cypress street to Washington street, Washington street from Boylston street to Boston line, High, Irving, Pearl, Emerald, Flora, and Juniper streets, and Brookline, Pond, Morss, and Walter avenues.

DISTRICT No 5, ASSIGNED TO MR. DREW.

Walnut street from Cypress street to Boylston street, Cypress street from Boylston street to Chestnut street, Sewall, Chestnut, Warren, Dudley, Heath, Pond, Hammond, Grove, South, Newton, Clyde, Cottage, and Avon streets, and Goddard avenue.

Mr. Lincoln having removed from the town, and thereby vacated his office, his district was assigned to Mr. Drew.

Michael Driscoll was appointed Superintendent of Streets at a salary of \$1200 per year. His report is appended. The duties of superintendent have been performed to the entire satisfaction of the board, and it is believed, of the town.

The board, finding that there had been an encroachment upon Brookline avenue by the owners of three estates, and on Harvard street by one abutter, ordered these encroachments to cease, and the houses, which on Brookline avenue projected into the street, to be set back.

Longwood bridge has been repaired at a cost of \$243.52. We have made a contract for the laying of concrete upon the bridge, without cost to the town, unless, after sufficient trial, it shall prove satisfactory. It will be necessary to re-appropriate the remainder of the appropriation (\$256.48) for the purpose of paying for the work, if it shall be accepted by the next Board of Selectmen.

The sidewalks are in fair condition. The concrete walks will need some repairs, and the board-walks in some streets should be replaced with plank or concrete walks. In some streets, where there have been no other than gravel walks, plank or concrete walks should be laid. There are also some petitions on file for concrete walks which it may be proper for the next board to grant.

The board recommend that the sum of \$16,000 be appropriated for the maintenance of highways for the year ensuing ; for sidewalks, \$5000 ; also, the sum of \$2000 for the removal of snow.

For the convenience of citizens the board append a list of the streets of the town, prepared for them by the Town Clerk.

BOARD OF HEALTH.

The Board of Health organized by the choice of Charles H. Drew, chairman, and Charles D. Lincoln, clerk. Dr. George K. Sabine was elected agent of the board, at a salary of \$200 a year. His report is appended hereto, and reference is made to the same for details of the work of the board.

Francis Mealy was employed to remove house-offal for \$250 per year.

The board have devoted much time to the matter of the so-called "sewer in the village," which has become a serious annoyance, if not a positive nuisance. We are not yet prepared to recommend definite action in the matter, but we hope to do so in season for the action of the town at the annual meeting.

The health of the town has been generally good, and the death rate (but little over fifteen in one thousand) shows that the town is in a peculiarly good sanitary condition. This death-rate is very much less than that of Boston, and considerably less than that of most country towns.

A statement of the appropriations recommended, is appended.

Respectfully submitted.

CHARLES H. DREW,
OLIVER WHYTE,
HORACE JAMES,
RUFUS G. F. CANDAGE,

*Selectmen, Surveyors of Highways, and Board
of Health of the Town of Brookline.*

A P P E N D I X
TO
REPORT OF SELECTMEN.
1880-81.

Report of the Fire Department.

To the Selectmen of the Town of Brookline.

The Fire Department of this town consists of three hose companies and one hook and ladder company. There has been one hose company organized and attached to the old organization the past year. The hose companies are located as follows: Hose Company No. 1, in the brick house, corner of High and Boylston streets; Hose Company No. 2, in the brick house on Washington street; and Hose Company No. 3, in a shed alongside the Club stable, in Longwood. Hook and Ladder Company No. 1 is located in the same house with Hose Company No. 2, and Steam Fire Engine No. 1, in the house with Hose Company No. 1. There is no company attached to the steamer, but it is run in connection with the hose companies. Last year, the sum of four hundred dollars (\$400) was appropriated for the Longwood company, so as to make it a part of the regular fire department; and as it was only a paid force for nine months, the Engineers of the department would recommend that the sum of five hundred dollars (\$500) be appropriated the present year, so as to continue that organization.

APPARATUS.

Hose Carriages No. 1 and No. 2, are comparatively new and in good condition, also Hook and Ladder Carriage No. 1, which was purchased the same time as Hose Carriage No. 2. Steam Fire Engine No. 1, which was purchased in 1874, with a slight overhauling would be in as good condition as when purchased, and has been run the last two years at an

expense to the town of only about \$300 a year. Hose Carriage No. 3 is a hand-carriage, which was purchased by the town, second-hand, some fifteen years ago; and for the amount of work required of it, it is in a fair condition. Attached to the hook and ladder carriage are two chemical fire extinguishers, which have in many cases proved themselves of great value; but being of small capacity, so that men can carry them on their backs, they soon become exhausted. The Board of Engineers would recommend that the sum of one hundred dollars (\$100) be appropriated for the purchase of two more of the same size, and have them placed on the hook and ladder carriage.

HORSES.

There are in the department at present six horses. Four of the six (the same as last year) were used on the streets, watering the same two districts as in previous years.

HOSE.

We have at present 2100 feet of cotton hose in first-class condition, 1500 feet in good condition, 1500 feet in a very fair condition, and 1000 feet of leather hose unfit for service.

BUILDINGS.

The buildings under charge of the Engineers are in a good condition, and, with a slight oiling and painting, would need no general repairs for several years to come.

HYDRANTS.

We reported last year one hundred and sixty hydrants and nine reservoirs. With the addition of four new hydrants this year, we now have one hundred and sixty-four hydrants and the same number of reservoirs. Three of the new hydrants are on Tappan street, and one on Ridgway street.

The hydrants, owing to the immense pressure on them at different points, which is from 2,700 pounds to 5,632 pounds, open very hard, and they are liable to break. At the fire in Colonnade block a hydrant was broken from that cause, and the Water Board changed it to one opening with the pressure, instead of against it, as is the case with all the hydrants first put in on the line of the water pipes.

The Engineers would ask the town to instruct the Water Board in the future, to place a gate on each hydrant, so that, in case of repairs, the water can be cut off without interfering with the rest of the line of pipes. In some cases it would now be necessary to cut off the whole town from a water supply until the hydrant was repaired.

FIRES.

The town the past year has been visited by what might have been some very serious conflagrations. They have happened in thickly settled communities, and but for the promptness of the department, and the untiring efforts of the members, the citizens would have been called upon to look at a number of charred and blackened walls. In the past year the department has been called where the insurance amounted to \$115,000, and the losses have been adjusted for \$3,826.

TELEPHONE.

For the past year the engine houses have been connected with the telephone lines, and in a number of cases it has proved a great success, and in other cases, what might have been a detriment. The Engineers would urge upon the public and parties having the telephone, to be sure there is a fire, in the first place, and then be sure they have delivered their message right before leaving the instrument,—as in one case part of the department were sent to Cottage Farm when the fire was on the Kimball farm, which mistake might have caused considerable damage had the fire been of any great magnitude.

VOTE.

The Engineers would ask the town for the following vote :
That the Engineers have the right to dispose of worn-out
and condemned materials, for the benefit of the department.

APPROPRIATIONS.

Last year the sum of \$7,000 was appropriated for the
current expenses of the Fire Department, watering two dis-
tricts and care of police horses, which the Engineers found
insufficient to keep water-carts in repair and buy supplies
for the department, consequently, they had to let a number
of things go which were very much needed, on that account.
Therefore, the Engineers would recommend for the current
expenses of the Fire Department, watering two districts and
the care of the police horses, that the sum of \$8,000 be
appropriated.

Current expenses of Fire Department, watering

| | | |
|--|---------|----|
| two districts and care of police horses, | \$8,000 | 00 |
| Longwood Company, | 500 | 00 |
| Two chemical fire extinguishers, | 100 | 00 |

CONCLUSION.

We will take this opportunity to thank the officers and
members of the several companies for their promptness in
responding to the alarms of fire, and for their untiring efforts
while on duty. Also, to the Chief of Police and men under
his charge, for keeping order at fires, and to the Committee
on Fire Department, for their help the past year, our thanks
are due.

(Signed)

| ANDREW NOLAND, | |
| A. E. KENRICK, | |

Report of the Chief of Police.

OFFICE OF THE CHIEF OF POLICE,
BROOKLINE, Jan. 31, 1881.

To the Selectmen :

GENTLEMEN,—I have the honor to submit my fifth annual report of the Police Department, for the year ending Jan. 31st, 1881.

The force as now organized consists of a chief, two sergeants, and twelve patrolmen, as follows :—

Chief, Alonzo Bowman.

Sergeants,

George F. Dearborn.

Charles B. McCausland.

Patrolmen,

Burnham C. Clark.

Albert S. Paige.

Mears Orcutt.

Joseph J. O'Connell.

Thomas J. Murray.

Alonzo W. Corey.

Wm. W. O'Connell.

Robert J. Watson.

Burton R. Willis.

William Miller.

Geo. F. Marston.

Alden A. Manley.

SPECIAL POLICE.

Five men have been appointed special officers without pay, as follows :—

W. Y. Gross, for the Town Hall.

William D. Morrison, for the Public Library.

Thomas S. Pettengill, for Walnut Hills and Walnut street Cemeteries, and on funeral occasions.

Eneas Smyth, for Holyhood Cemetery.

David McCarty, for Cochituate Reservoir.

Four persons have been appointed Railroad Police without pay, as follows : —

R. B. Gardner, J. M. Woods, John Bean, and H. M. Bean. All for the Boston and Albany railroad.

WORK OF THE DEPARTMENT FOR THE YEAR.

Whole number of arrests made by the local force for the year, 305.

| | | | |

| Number of sewer permits taken up by officers | 18 |
| Number of town warrants and documents distributed by officers | 12,500 |
| Number of street lights reported unlighted | 1,591 |
| Number of street lamps reported broken | 72 |
| Number of runaway horses caught by mounted officers | 12 |
| Number of officers off duty reporting at the station house on alarms of fire given | 41 |
| Number of furnished houses reported as temporarily vacant, requiring special police protection | 51 |
| Number of unfurnished houses | 14 |
| Number of police details made by request of citizens for private parties, &c. | 30 |
| Number of police details made for public occasions | 12 |

LODGERS AND TRAMPS.

The number of persons applying at this station for lodgings the past year has considerably decreased from previous years. The number for the past year has been 360. Males, 347; females, 13; minors, 27.

NATIVITY OF LODGERS.

| | | | |
|-------------------------|-----|-----------------------------|-----|
| United States | 188 | Ireland | 104 |
| England | 24 | British Provinces | 20 |
| Scotland | 8 | Germany | 8 |
| Italy | 2 | All other places | 6 |

Of the one hundred and sixty-four persons arrested for the crime of drunkenness the past year, seventy-one gave Brookline as their place of residence. While we might reasonably expect a decrease instead of an increase in the number of arrests for drunkenness, as no persons have been licensed the

past year to sell intoxicating liquors to be drunk on the premises of the vender, yet, within five minutes' walk of the Brookline railway station there have been some eight places licensed by the city of Boston, where all kinds of intoxicating liquors are freely sold.

Twenty-four persons arrested for drunkenness have been released on becoming sober.

Nineteen search warrants have been served on parties suspected as illegal dealers. One hundred and ninety-four gallons of liquors have been seized. Fourteen prosecutions have been made of illegal dealers. Six persons have been convicted and sentenced. Six have been found not guilty—two parties proving non-ownership—two proving that the liquors were not kept for the purpose of sale, and two proving that the seized liquors were not intoxicating, and were ordered to be returned to the owners, and in five cases no liquors were found on the premises searched.

Early in the year, by direction of your board, an officer was detailed for the special purpose of enforcing the liquor laws. Officer A. S. Paige was detailed for that purpose, and has performed the duties of the office with energy and zeal, and with good results.

The difficulties in the way of convicting violations of this law are perhaps partially unknown to those who have had no experience in the matter.

The arrests for drunkenness in the past five years have been as follows:—1876, 119; 1877, 124; 1878, 91; 1879, 155; 1880, 164.

Twelve persons charged with minor offences have been taken on probation by the Probation Officer, Sergeant G. F. Dearborn, with general good results.

THE MOUNTED SERVICE.

This service continues to be a very important part of our police force. The work of the mounted officers has been

especially valuable the present long sleighing season, in stopping runaway horses, and in regulating driving on our principal thoroughfares. The streets in the remote parts of the town are patrolled almost entirely by mounted officers a large part of the year.

THE TELEPHONE.

After a year's experience I find the telephone of great value in conducting police matters, and its use is constantly increasing. We can now communicate with the Police Department of Boston through the City Hall at all hours of the day ; also with the police authorities in most of the neighboring cities and towns. Citizens in various parts of the town seem to appreciate the value and convenience of telephonic connection with this office.

It is very desirable that the by-laws of the town should be revised, additions made, and properly arranged in one form. We labor under serious disadvantages in being unable to act legally, or to remedy many complaints and annoyances, which we are powerless to relieve under the existing ordinances of the town, which were drawn and adopted some ten or twelve years since.

As regards the requirements of the town for increased police service, I quote from my report of last year : —

“ As now organized, the five patrolmen for day duty report for roll-call at seven A.M., and are on duty until six P.M., ten hours. The six patrolmen for night duty report for roll-call at seven P.M., and are on duty until four A.M., nine hours. From six to seven P.M. only two officers are on patrol duty, — one in the village, and one (sergeant) who is mounted.

“ I am convinced that this arrangement is no longer *safe* or *judicious*. There are four or five police routes which should be guarded the whole twenty-four hours of the day. The experience of the *past year fully warrants me in making this assertion*. The addition of five or six patrolmen would be necessary to accomplish this.

“ Our situation as regards police requirements is peculiar. In close proximity to, in fact nearly surrounded by, a large city, we are exposed to the criminal elements which pervade all large cities, and who soon discover the most unguarded and defenceless part of the community on which to prey.”

In the West Roxbury District, Boston Police District No. 13, thirty-three patrolmen have been employed the past year, divided into three reliefs of eleven men each. The amount of property reported stolen in the district the past year has been less than \$500.

In the Brighton District, on our western borders, eighteen patrolmen are employed in three reliefs of six men each. The amount of property stolen in the district the past year does not exceed \$1200.

In consequence of the many and various duties demanded of the police, it will be necessary in the future to have an officer for special duty, outside of regular patrol duty, who can be called on at any time for special work. The officer detailed to look after violators of the liquor law, has in addition to his special duties, done much of this work the past year.

For expenditures of Police Department, see Treasurer's report.

In conclusion, it gives me much pleasure to testify that the officers of this department have worked together harmoniously and efficiently the past year. In several instances they have done severe and arduous work, with patience and fortitude worthy of all praise.

While the object of a police force is the detection and punishment of criminals, the great and primary object, in my opinion, is the *prevention* of crime ; and the absence of crime may, I think, be considered the best evidence of the efficiency of the police.

As each officer goes out to patrol from one to ten miles of streets, the duties he may be called on to perform are often so diversified and uncertain that they cannot be anticipated by a superior in rank, and much depends on the *intelligence*, *tact* and *good judgment* of the officer.

With thanks for the kind courtesies shown me by the Selectmen and Committee on Police,

I am, respectfully, your obedient servant,

ALONZO BOWMAN,

Chief of Police.

Report of the Probation Officer.

BROOKLINE, January 31, 1881.

To the Board of Selectmen:

GENTLEMEN, — I have the honor to submit my first annual report. Although the work has not been extensive, the results are very satisfactory.

The whole number of cases placed on probation since June last, was twelve, for the following offences :

| | | | |
|-----------------------------|---|-----------------------------|---|
| Violation of the liquor law | 1 | Violation of the Lord's Day | 5 |
| Disturbing the peace | 2 | Larceny | 1 |
| Drunkenness | 2 | Truancy | 1 |

Of this number nine have been discharged, one surrendered, and two are now on probation ; and in every case but one they have faithfully complied with the terms of their probation.

Respectfully, your obedient servant,

GEORGE F. DEARBORN,

Probation Officer.

Report on Suits against the Town.

BROOKLINE, February 1, 1881.

Charles H. Drew, Esq.,

Chairman of the Board of Selectmen :—

DEAR SIR,—We make the following report of the suits of which we have charge for the town, to wit :—

FIRST,—

THE MOTHER BROOK AND NEPONSET RIVER MILL OWNERS,
vs.
THE TOWN OF BROOKLINE.

There are nine of these suits pending in the Superior Court for Suffolk County for the recovery of damages alleged to have been caused to mill privileges, by reason of the taking of the water of Charles river by the town. The cases were referred by the Court to Dwight Foster, Nathaniel J. Bradlee, and Samuel D. Warren, Esquires, that they might hear the cases of the petitioners and report thereon to the Court.

The cases have been accordingly tried, as one case, before the Commissioners, Asaph Churchill and Charles A. Mackintosh, Esquires, appearing as counsel for the petitioners, the hearings occupying a number of days.

The petitioners claimed that the flow of Mother brook, which runs out of Charles river, was affected by the operations of the town two miles below the junction of the river and the brook, the difference of level between the two points being almost imperceptible.

James B. Francis, the eminent hydraulic engineer of Lowell, supported the petitioner's case by his opinion.

The town claimed that the petitions were not seasonably filed ; that petitioners had not been damaged at all, and, that, upon any theory, their claim of \$35,000 was excessive.

The Commissioners have awarded \$4,580, which is equivalent to \$3,300 and interest thereon from the time the town took the water.

SECOND,—

THE TOWN OF BROOKLINE *vs.* CHARLES G. MACKINTOSH.

This is a bill in equity brought by the Selectmen in pursuance of the vote of the town passed at the town meeting held in November, 1880, for the purpose of restraining the defendant from corrupting the waters of Charles river at a point some 4000 feet above the pumping station.

The cases were heard by Mr. Justice Soule of the Supreme Judicial Court, and reported by him to the full bench of that Court for ultimate decision, upon the following findings, to wit :

First,—That the operations of the defendant do not impair the water supply of the town, as the town takes and uses its water at present from a filtering gallery adjacent to the river, and

Second,—That the operations of the defendant would make it dangerous for the town to take its supply of water directly from Charles river, as it has the right to do at any time.

The case will be argued in March, 1881, before all the Judges. As the town has been heretofore compelled by the Supreme Court to pay full damages for the taking of the waters of the river, it seems eminently proper that it should now ask that the purity of these waters be protected. It is believed that the decision must be favorable to the town.

THIRD,—

HENRY H. RICHARDSON *vs.* THE TOWN OF BROOKLINE.

This is an action in which the plaintiff seeks to recover back the sum of \$282.71, being the amount of taxes which he alleges to have been illegally assessed upon him, and which he has paid under protest.

The action is pending in the Suffolk Superior Court, and will probably be tried in March next.

Respectfully yours,

M. & C. A. WILLIAMS.

Report of the Superintendent of Streets.

OFFICE OF THE SUPERINTENDENT OF STREETS,
TOWN HALL, BROOKLINE, Feb. 2, 1881.

To the Honorable Board of Selectmen :

GENTLEMEN, — I respectfully submit my fifth annual report of the work done and the expense incurred in the highway department. The amount appropriated at the annual meeting for the support of highways, was \$15,150. It was all expended, and the details are as follows :

| | |
|--|-------------------|
| Alton Street : repaired | \$19 88 |
| Aspinwall Avenue : macadamized in part, patched and fences re-built | 148 24 |
| Beacon Street : macadamized from town line to Tappan street, gravelled and repaired in sun- dry parts | 1,794 54 |
| Boylston Street ; upper end gravelled, new catch basin and drain put in at Fisher avenue, and culvert taken up, cleaned out and repaired . . | 605 74 |
| Brookline Avenue : repaired and macadamized in part | 81 50 |
| Carlton Street : repaired, macadamized in part . | 44 25 |
| Chestnut Street : sidewalk partly graded, new catch basin curb set, &c. | 38 25 |
| Cleaning gutters, streets and sidewalks . . . | 1,172 73 |
| Cleaning street crossings | 193 38 |
| Clyde Street : repaired | 16 75 |
| Colchester Street : patched and repaired . . | 24 00 |
| Coal and other supplies for crusher | 107 61 |
| Crossings, labor and materials, repairing old cross- ings | 168 09 |
| <i>Amount carried forward</i> | <i>\$4,414 96</i> |

| | |
|---|-------------|
| <i>Amount brought forward</i> | \$4,414 96 |
| Crushing stone in Brighton pit (now on hand) | 162 50 |
| Cutting grass on sundry streets | 85 00 |
| Engineering | 8 88 |
| Englewood Avenue: gutter paved | 15 00 |
| Fisher Avenue: gravelled in part | 28 75 |
| Gorham Avenue: catch basin built | 15 00 |
| Gravel: cash paid for gravel and stone | 121 25 |
| Gravel land: bought of John Zecher on Heath st | 250 00 |
| Grove street: repaired | 11 75 |
| Gutters: repairing and skim-coating concrete gutters in Irving, St. Paul and Colchester streets | 457 44 |
| Hammond Street: macadamized in part, repaired | 186 38 |
| Harvard Street: macadamized from Gibbs' pit to Pleasant street | 471 60 |
| Heath Street: gravelled from town line to Tower Hill road | 661 04 |
| High Street: new fencing, sidewalk filled out, &c. | 78 81 |
| Horses and Stable: care and maintenance, including hostler's wages, repairs, new blankets, etc., board of Superintendent's horse, cash paid for new horse, etc. | 2,362 48 |
| Ivy Street: macadamized from Prescott street to Carlton street | 51 00 |
| Kent Street: repaired with stone screenings | 34 50 |
| Longwood Avenue: repaired | 88 52 |
| Miscellaneous work not included in other streets. | 297 64 |
| Mountfort Street: repaired | 10 00 |
| Newton Street: repaired and gravelled | 349 59 |
| New shed over engine in Brighton pit | 58 68 |
| Picking off loose stones | 44 44 |
| Pond Avenue: repaired | 25 44 |
| Prescott Street: macadamized in part | 40 00 |
| Pruning trees, etc. | 82 50 |
| Preparing material in spring of 1880, not charged on other streets: In Brighton pit | 653 68 |
| In Newton street pit | 130 25 |
| Repairing sundry streets, not elsewhere charged | 247 06 |
| Repairing engine and crusher after fire in Brighton pit | 170 46 |
| <i>Amount carried forward</i> | \$11,614 60 |

| | |
|--|-------------------|
| <i>Amount brought forward</i> | \$11,614 60 |
| Re-paving sundry gutters, not elsewhere included | 42 50 |
| Sign-boards repainted, etc. | 61 23 |
| South Street: repaired | 19 51 |
| St. Paul Street: hollows north of Beacon street graded up, sundry other repairs, | 276 91 |
| Summit Avenue: gravelled | 46 50 |
| Sundry work in winter of 1880-81, levelling and carting off snow, sanding sidewalks, opening gutters, etc., etc. | 978 68 |
| Tools: repairs and sharpening, new tools, etc. | 303 67 |
| Toxteth Street: repaired | 12 87 |
| Washington Street: macadamized in two places, from Beacon street southerly to Robinson's tan- nery, and from crossing at W. B. Sears' to be- yond top of hill, sundry other repairs | 1,715 02 |
| Water pipe and sewer trenches repaired | 14 62 |
| Winchester Street: repaired, and fences rebuilt | 63 89 |
| Total amount expended, | <hr/> \$15,150 00 |

On the night of Thursday, March 18, 1880, the shed over the engine at the Brighton pit was set on fire by incendiaries, and totally destroyed; the loss, including some repairs which were necessary on the engine before the fire, amounted to \$264.75.

During the past summer the city of Boston has laid a forty-eight inch main pipe in Beacon street throughout its entire length. The travel over the street was necessarily interrupted, but it is due the Boston Water Board to say that the work was pushed as rapidly as possible, and all drains and culverts which were crossed, were repaired in a most thorough manner. A large surplus of stone and gravel was left, which was used in repairing the street; the poorer material, excepting that claimed by the abutters, was used in making Thayer street.

HORSES.

One of the horses died of spinal disease on the 5th of May last, and has been replaced by a young horse, for which the sum of \$250 was paid. I renew my recommendation of last year that the poorer animals should be disposed of, and replaced by younger stock. Of the nine horses owned by the town, two are unfit for the work required of them; the others are in fair condition, but as they have been constantly worked in all weathers for the last eight or nine years, it is but natural that the weaker animals should give out.

LONGWOOD BRIDGE.

The cost of re-planking this bridge, as far as it was done, was paid out of the special appropriation of \$500 made for that purpose. Before the rest of the bridge was re-planked, Messrs. Lynam & Foster, whose work on our sidewalks for the last ten years has been so generally approved, offered to cover the bridge with coal-tar concrete, on condition that if the work proved satisfactory they were to be paid fifty cents per square yard for it, but if, on the contrary, it proved worthless, no charge would be made. The offer was accepted, and the coal-tar concrete applied, but it was so late in the season when it was done, that no opinion can yet be formed as to its merits. The Selectmen are to decide whether or not it will be paid for.

BROOK STREET.

Some months after Brook street and the two short streets were finished by the contractors, they were re-shaped and rolled by this department, at a cost of \$134.25.

THAYER STREET AND THAYER PLACE.

These streets, which were built by the Highway force, are practically finished, but the season was so far advanced when

the contractors for building the sewers finished their work, that considerable frozen material was used, and there will be therefore more or less settling in the spring. The fences, curbstones and gate-posts remain to be set, and two catch basins are to be built, but the whole work can be done in a few weeks after the frost is wholly out of the ground. White place, Davis avenue and private grounds were cleared of débris after the sewers were built, but the early frost prevented the work from being finished.

STREET CROSSINGS.

One street crossing has been laid across Cypress street at Chestnut street; the cross walks in several places were repaved.

REMOVING SNOW.

Of the \$2,000 appropriated for this purpose, \$666.76 were expended last season, and the balance proved insufficient for this winter. There was a balance of the Highway appropriation unexpended which was devoted to this work.

SIDEWALKS

Edgestones were set on Cypress street, between Gorham avenue and Cypress place, 277 feet, and corner of St. Paul street and Longwood avenue, 12 feet.

New concrete walks were laid on Aspinwall avenue, $133\frac{1}{3}$ square yards; Gorham avenue and Cypress street, $736\frac{3}{4}$ square yards.

The concrete walks were mended in various places, and were skim-coated on parts of the following named streets: Harvard, Francis, Park, Walnut, Irving, Boylston, Cypress, Colchester, and Harvard and Longwood avenues.

New plank walks were laid as follows :

| | |
|----------------------------|-----------------|
| Beacon Street | 1,285 feet. |
| Chestnut Street | 1,480 " |
| Cypress Street | 715 " |
| Sewall Street | 690 " |
| Dudley Street | 2,650 " |
| Warren Street | 1,280 " |
| Hammond Street | 720 " |
| Marion Street | 590 " |
| Toxteth Street | 720 " |
| Aspinwall Avenue | 930 " |
| Total | 11,060 " |

Those on Warren and Hammond streets are nineteen inches wide; all the others are thirty-nine inches wide. Board walks still remain on Brighton and Beacon streets, Summit avenue and part of Marion street. They are not worth mending, and I hope they will be ordered up as soon as the walks are dry in the spring.

The expenditures for sidewalks were as follows :

| | |
|---|-------------------|
| Repairing board and plank walks | \$465 74 |
| New plank walks | 1,568 91 |
| Edgestones and setting | 202 29 |
| New concrete walks | 565 54 |
| Skim-coating and repairing concrete walks | 813 86 |
| Gravel walks and sundries | 383 66 |
| Total | \$4,000 00 |

CARE OF SEWERS.

The street catch basins, culverts, brook channels and sewers have been cleaned out by this department as heretofore. The culvert under High street, having proved inadequate to carry off the storm water, and being too small to allow one to enter for the purpose of cleaning it out, was taken up, and

a new one sufficiently large for all purposes was built at a grade nearly two feet lower. The expenditures for all purposes amounted to \$1,255.68.

PUBLIC GROUNDS.

A curbstone was set around the triangular plot of ground at the corner of St. Paul street and Aspinwall avenue, the lot was spaded over, manured and laid down to grass, and a drinking trough for horses placed at the apex. A pedestrian track was built by the Brookline Athletic Club at the upper end of the Cypress street play-ground, towards the cost of which the town contributed the sum of fifty dollars. The usual work on other public grounds and school-house lots was done, the total expenditure being \$582.14.

COLLECTING ASHES.

The ashes have been collected weekly throughout the town at a cost of \$934.10.

The customary schedule of property belonging to the department is appended.

Respectfully submitted.

MICHAEL DRISCOLL,

Superintendent of Streets.

REPORT OF THE AGENT
OF THE
BOARD OF HEALTH.

ABATEMENT OF NUISANCES.

During the year the board has ordered the abatement of nearly forty nuisances. There have been three prosecutions for non-compliance with the orders of the board.

REMOVAL OF HOUSE-OFFAL.

A contract was made and executed with Francis Mealey, April 26th, for the removal of house-offal for the period of one year, said contract to expire May 1st, 1881.

LICENSES.

Twenty licenses have been issued and renewed for the collection of grease. These licenses are now limited to that number. One undertaker's license has been renewed.

NUMBER OF DEATHS DURING THE YEAR.

The number of deaths within the town is one hundred and twenty-three against ninety-six last year.

CONTAGIOUS DISEASES.

There have been reported during the year ending December 31, 1880, seventeen cases of scarlet fever, and twenty-five of diphtheria, occurring as follows :—

| | SCARLET FEVER | DIPHTHERIA. |
|---------------------|---------------|-------------|
| January | 4 | 2 |
| February | 0 | 2 |
| March | 0 | 0 |
| April | 1 | 1 |
| May | 2 | 4 |
| June | 3 | 3 |
| July | 1 | 4 |
| August | 0 | 0 |
| September | 0 | 0 |
| October | 0 | 1 |
| November | 2 | 3 |
| December | 4 | 5 |
| | <hr/> 17 | <hr/> 25 |

The cases of diphtheria occurred in the following localities :

| | |
|---|---|
| Webster Place | 1 |
| Irving Street | 1 |
| School Street | 2 |
| Walnut, cor. Chestnut | 2 |
| Linden Place | 2 |
| Park Street, near Vernon | 4 |
| Monmouth Street | 1 |
| Washington Street, between Cypress and Park | 1 |
| Carlton Street | 1 |
| Brookline Avenue | 1 |
| St. Paul, near Francis | 1 |
| Harvard Street, opposite Harvard Avenue | 1 |
| Harvard Street, corner Pierce | 1 |
| Harvard Street, corner Vernon | 2 |
| Boylston Street, opposite the Reservoir | 2 |
| Boylston Street, near Pound | 1 |
| Boylston Street, in the Village | 1 |

The following table shows the number of cases of scarlet fever and diphtheria reported during the last four years : —

| | SCARLET FEVER. | DIPHTHERIA. |
|----------------|----------------|-------------|
| 1877 | 46 | 29 |
| 1878 | 15 | 19 |
| 1879 | 16 | 12 |
| 1880 | 17 | 25 |

TYPHOID FEVER.

Typhoid fever, which prevailed so extensively during the months of August, September and October of the preceding year, was almost entirely absent during the last.

MUDDY BROOK.

The Board, in connection with the Boston Board of Health, employed J. W. Steere, as during the two or three previous years, to tend the tide-gate on Brookline avenue, from the beginning of May till the first of November.

The necessity of keeping the flats covered with water during the warm weather will continue until the stream is kept free from sewage matter.

The following are some of the special orders passed by the Board : —

MAY 10th, 1880.

Ordered,— “ That the manure of the livery and horse-car stables shall not be removed from the stables between the hours of sunrise and sunset during the months of June, July, August and September.

MAY 24th, 1880.

Ordered,— “ That during the months of June, July, August and September, no vaults shall be emptied by any other than the odorless process, within the district bounded by Chestnut, Cypress and School streets and Aspinwall avenue, and that in the other parts of the town during said months, no privies shall be emptied by Mr. Murray or any other person, in the ordinary way, by carts not of the Odorless Excavating Company, except permission be first obtained from the Chief of Police.”

AUGUST 23d, 1880.

Ordered,— “ That no dead body of any person shall be carried to any cemetery, or from one place to another within the town, in any public vehicle other than a hearse or undertaker's wagon provided for that purpose.”

The order first passed in 1876, requiring that all cases of diphtheria and scarlet fever shall be reported to the Board, still remains in force. Whenever such cases are reported, the Truant Officer is at once notified of the fact, and children living in the house where any such case exists are prohibited from attending school. By this means a spread of these diseases is, no doubt, frequently prevented.

HOUSE DRAINAGE, &c.

Although more attention is paid each year to the subject of house-drainage, still it is very imperfect in the vast majority of instances, especially in tenement houses. Drains should not only be thoroughly trapped, but should be ventilated by a straight pipe (4 in.) extended above the highest point of the roof of the house, terminating at a distance from any chimney or other ventilator. The custom of top-dressing near dwellings which has been referred to in a number of previous reports, still continues to be practised. The dressing is frequently *very* offensive and *may* be injurious. The practice should be prohibited.

Instances have come to the knowledge of the Board where the bodies of children who have died of diphtheria have been carried to the grave in a public carriage; consequently the Board passed the order, already referred to, in regard to the conveyance of dead bodies of persons in public carriages other than a hearse, &c.

SMALL-POX.

In view of the fact that small-pox now prevails somewhat extensively in New York and Philadelphia, and that the epidemic will, in all probability, soon extend to Boston, attention should be at once directed to the importance of vaccination and re-vaccination.

G. K. SABINE, M. D.

Report of the Inspector of Milk.

In the spring of last year a very important law was enacted by the Legislature regulating the sale of milk. The law as now in force requires that every one selling milk shall obtain a license, for which a small fee is paid, and comply with certain regulations mentioned in the Act.

The following is a list of those holding licenses : —

| | Number. | | Number. |
|---------------------------------|---------|--------------------------------|---------|
| George W. Stearns, Brookline, | 1 | J. H. Clark, Belmont, | 22 |
| J. & R. English, Jamaica Plain, | 2 | Robert Stanfield, Brookline, | 23 |
| Hugh Banigan, Brookline, | 3 | A. McCullough, | 24 |
| R. F. Goodrich, " | 4 | E. J. Curtis, | 25 |
| William Wyman, Waltham, | 5 | S. Burt, | 26 |
| L. W. Hastings, Brookline, | 6 | James Lynch, | 27 |
| F. C. Hebard, South Boston, | 7 | Margaret Roach, | 28 |
| Peter E. Bradley, Roxbury, | 8 | John Garrity, Roxbury, | 29 |
| E. D. Everett, Brookline, | 9 | Brown Brothers, Brookline, | 30 |
| Mrs. G. Stitt, " | 10 | Nelson Brothers, | 31 |
| N. M. Wright, Arlington, | 11 | Margaret Burke, | 32 |
| John W. Stearns, Waltham, | 12 | Johanna Hayes, | 33 |
| Margaret Donovan, Brookline, | 13 | Patrick Murray, | 34 |
| H. W. Lamb, Quincy, | 14 | E. B. Reed, | 35 |
| Andrew White, Brookline, | 15 | Michael O'Rourke, | 36 |
| James Shillady, " | 16 | Hugh Murray, | 37 |
| James Love, " | 17 | James McIntosh, Needham, | 38 |
| John O. Kane, Needham, | 18 | Frederick Beck, Brookline, | 39 |
| Mrs. B. Maloney, Brookline, | 19 | Thomas T. Robinson, Brookline, | 40 |
| Julia Hayes, " | 20 | Gross & Co., Allston, | 41 |
| E. W. Packard, " | 21 | Henry R. Page, Lincoln, | 42 |

But few complaints have been made of the quality of milk delivered, and there have been only two prosecutions for non-compliance with the law.

G. K. SABINE.

SCHEDULE OF TOWN PROPERTY.

| | |
|---|---------------------|
| New Town Hall (stone), Washington street, and about 24,000 feet of land | \$180,000 00 |
| Pierce Primary school-house (brick), Pierce st., and about 16,000 feet of land | 27,000 00 |

WATER WORKS.

The total cost of the water works to Feb. 1, 1881, amounts to \$598,960. Of this amount \$448,528 is represented by twenty-seven miles of iron mains for conducting the water from the pumping station at West Roxbury, and distributing it throughout Brookline, the stand-pipe at Walnut hill, 158 fire hydrants, 18 water cart hydrants, and 5 drinking fountains, together with the right to take water from Charles river, and the right of way over any private property where the mains are now laid, such rights having been acquired either by purchase or by settlement at law. The balance, \$150,432, is as follows :

| | |
|--|----------------|
| 211,810 feet of land on Fisher's hill, bought for reservoir, and owned by the town in fee | \$25,000 00 |
| 316,028 feet of land on line of filtering galleries, and owned by the town in fee | 2,277 00 |
| 74,050 feet of land for old station and owned by the town in fee | 3,000 00 |
| 24 acres of land adjoining the filtering gallery lot, taken and held for purposes of works | 9,608 00 |
| Reservoir, &c., on Fisher's hill | 53,312 00 |
| Filtering galleries, including extensions | 10,000 00 |
| New pumping station and outbuildings | 16,000 00 |
| Engineer's house and old pumping station | 1,500 00 |
| Two pumping engines and boilers complete and in working order | 25,000 00 |
| Tools, &c., at the pumping station | 1,250 00 |
| Tools, &c., at Brookline | 600 00 |
| Eight tons iron pipe at station | 320 00 |
| Thirty " " " " at yard in Brookline | 1,200 00 |
| Line of telegraph, &c. | 1,365 00 |
| | <hr/> |
| | \$150,432 00 |
| 27 miles iron mains as above | 448,528 00 |
| Sewers | 250,000 00 |
| | <hr/> |
| | \$848,960 00 |
| <i>Amount brought forward</i> | 783,150 65 |
| | <hr/> |
| Total valuation of town property | \$1,632,110 65 |

GENTLEMEN,—The undersigned herewith submits the report of the vital statistics of the Town of Brookline, for the year ending December 31st, 1880.

MARRIAGES BY MONTHS.

| MONTHS. | Whole Number. | First. | Second. |
|----------------------|---------------|--------|---------|
| January, - - - - - | 9 | 17 | 1 |
| February, - - - - - | 2 | 4 | |
| March, - - - - - | 1 | 2 | |
| April, - - - - - | 8 | 16 | |
| May, - - - - - | 5 | 8 | 2 |
| June, - - - - - | 7 | 14 | |
| July, - - - - - | 7 | 14 | |
| August, - - - - - | 7 | 14 | |
| September, - - - - - | 7 | 12 | 2 |
| October, - - - - - | 6 | 10 | 2 |
| November, - - - - - | 12 | 24 | |
| December, - - - - - | 4 | 8 | |
| | 75 | 143 | 7 |

OF THE ABOVE MARRIAGES,

1 was the second marriage of groom and second of the bride.
 5 were the second marriage of groom and first of the bride.
 64 were the first marriage of groom and first of the bride.

BIRTHS BY MONTHS.

| 1880. | | | | | | Total. | Males. | Females. |
|--|---|---|---|---|---|--------|--------|----------|
| January, | - | - | - | - | - | 25 | 15 | 10 |
| February, | - | - | - | - | - | 18 | 11 | 7 |
| March, | - | - | - | - | - | 14 | 7 | 7 |
| April, | - | - | - | - | - | 26 | 8 | 18 |
| May, | - | - | - | - | - | 14 | 10 | 4 |
| June, | - | - | - | - | - | 15 | 6 | 9 |
| July, | - | - | - | - | - | 22 | 15 | 7 |
| August, | - | - | - | - | - | 20 | 14 | 6 |
| September, | - | - | - | - | - | 20 | 6 | 14 |
| October, | - | - | - | - | - | 19 | 11 | 8 |
| November, | - | - | - | - | - | 14 | 9 | 5 |
| December, | - | - | - | - | - | 15 | 8 | 7 |
| 1878. | | | | | | 222 | 120 | 102 |
| February, | - | - | - | - | - | 1 | | 1 |
| June, | - | - | - | - | - | 1 | | 1 |
| 1879. | | | | | | | | |
| January, | - | - | - | - | - | 1 | 1 | |
| August, | - | - | - | - | - | 1 | | 1 |
| September, | - | - | - | - | - | 1 | | 1 |
| December, | - | - | - | - | - | 1 | | 1 |
| | | | | | | 228 | 121 | 107 |
| Of the above there were two births of twins. | | | | | | | | |
| April, | - | - | - | - | - | 1 | | 2 |
| July, | - | - | - | - | - | 1 | | 2 |

B. F. BAKER, *Town Clerk.*

REPORT OF THE TRUSTEES OF WALNUT HILLS CEMETERY.

The Trustees of Walnut Hills Cemetery present herewith their annual report for the year ending January 31, 1881.

Thirteen new lots have been trenched and graded during the year, and the grounds have been well cared for and kept in good order.

Twelve burial lots and twelve single grave lots have been sold.

For the details of the work done reference is made to the report of the Superintendent, as follows, to wit: —

SUPERINTENDENT'S REPORT.

REPORT
OF THE
OVERSEERS OF THE POOR
OF THE
TOWN OF BROOKLINE,
FOR THE YEAR ENDING JANUARY 31, 1881.

ANNUAL REPORT.

THE Board organized April 7th, 1880, by choosing Charles H. Drew, as Chairman, and Charles D. Lincoln as Clerk. A portion of their duties is embraced in the following report.

The following table gives the names of persons regularly relieved : —

- 1 Baker, Ann M., daughter of James Mitchell, deceased ; She has been at the Insane Asylum, Tewksbury, since May 22, 1879, at \$3 per week.
- 5 Barrett, James, children of,— four boys, at House of the Angel Guardian, at \$2 per week ; one girl at Saint Vincent Asylum, at \$1.50 per week. The father has agreed to reimburse the town to the extent of \$10 per month, but has not yet paid anything — he is out of the State.
- 3 Burke, John, aged 10 ; Katy, aged 8 ; Mary, aged 6, — children of Thomas or Michael Burke, deceased. They are boarded with Martin Costello at \$15 a month for the three.
- 1 Casey, Mary, invalid, boards with B. C. Clark. We pay \$8 per month for board.
- 3 Casey, Nellie, widow of Thomas, and two young children. We pay her \$6 per month, and supply her with fuel, and pay her rent.
- 2 Collins, Mary, widow of Peter, and one invalid child of brother, James Kilnan. She works for her relief, \$1.75 per week, and her fuel.
- 1 Conway, John. We allowed him \$2 per week and fuel, and paid Mrs. Fleming \$8 per month for his care, until July, 21, 1880, when he went to Carney Hospital, where he has since remained at \$5 per week.

- 2 Conway, John F., 16, and Mary, 11, children of John, above-named, are boarded with their aunt, Mrs. Conway, at \$3 per week.
- 2 Corcoran, Ann, widow of Henry, and one child. We have paid \$3 per month for her rent. Her husband died March 10, 1879.
- 2 Corcoran, Michael, aged 71, and wife. We give them \$2 per week and fuel and rent.
- 5 Coughlin, William, and wife and three children. She is authorized to work \$2 per week for relief and for fuel, and we pay rent. He is disabled by rheumatism.
- 1 Crawley, Mary, aged 63, boards with Mrs. Bridget McMahon at \$8 a month.
- 6 Cronan, John, and wife and four children. She has been allowed to work \$2 per week for relief. He died September 1.
- 1 Curry, Hannah, aged 63, widow of James. She boards with her son-in-law, Thomas Finn, at \$3 a month.
- 1 Dalton, James, aged 12, son of James and Mary, afterwards wife of Thomas Burke. He boards with Mrs. Bolan at \$8 a month.
- 1 Dolan, Mary E., daughter of Thomas, deceased ; she is lame, lives in Boston, and we pay her board, \$2 a week.
- 5 Donovan, Julia, widow of Michael, and four children. We pay for food, fuel, and rent.
- 1 Dwyer, William, 71. We pay his rent, \$4 a month, and his daughter-in-law prepares his food.
- 2 Fallon, John W. and Eunice, children of Michael. They live in Lawrence, and we paid that city last year for their support \$76. John's ceased August 1.
- 3 Finnegan, Ann, wife of Arthur, who has deserted her and two children. We allow her \$1 a week.

- 1 Flanagan, Mary, widow of Joseph, aged 87. She boards with her son Martin, at \$6 a month.
- 5 Fleming, Patrick, and wife and three children. We allow \$2 a week, if the same is worked out.
- 1 Ford, Sarah A. She is boarded at the Asylum for Chronic Insane at Worcester. We paid last year for her \$184.25.
- 1 Gleason, Ann, aged 65, widow of James. She boards with her daughter, Bridget Sullivan, at \$8 a month.
- 2 Haley, David, and wife, about 72 years of age, and unable to work. She is allowed \$1.50 a week for relief, and we supply rent.
- 2 Hill, Eliza, widow of Thomas, and one child. We give her \$1.50 a week, fuel and rent.
- 2 Hogan, John, and wife, aged 79. We pay for their food \$8 a month, and their house rent and fuel.
- 2 Horregan, Bridget, widow of Michael, and one daughter, 12 years old. We allow her to work \$1 a week, and supply fuel and pay rent.
- 2 Jewett, Benjamin N., aged 72, and wife. Rent paid and some fuel.
- 1 Kennedy, Ann, wife of James. She boards at John Monahan's, at \$6 a month.
- 3 Killinan, Fanny, widow of John, and two children. She works out \$1.50 a week for relief and fuel. We have also paid her rent.
- 1 Lamb, Mary, widow of Lawrence. The City of Boston admits her settlement. We allow her to work \$1 a week. The city reimburses us.
- 4 Liddy, Patrick, aged 5, John 8, at the House of the Angel Guardian, at \$2 a week each; Joanna 10, Mary Jane 12, at St. Vincent's Asylum, at \$1.50 a week each — are the children of John Liddy; they have no mother.
- 2 Lynch, Bridget, widow of Cornelius, and one child Annie, who is at St. Vincent's Asylum, at our expense.

The mother lives in the Town House, Heath street, and we allowed her \$1 a week and fuel. She is now at Sherborn Female Prison.

- 4 Lynch, Mary, wife of John (daughter of Batt. Cusick), and three small children. She has been deserted by her husband, and we allow her \$1 a week and fuel, rent and some medical care.
- 10 Lyons, Patrick, and wife and eight children. We allow rent, \$4 a month.
- 2 Madden, Mary, widow of Charles, and one child. We allow Mrs. Madden \$1 a week, her fuel and pay rent.
Madden, Daniel, step-son of the above, is boarded at the House of the Angel Guardian at \$2 per week.
- 5 Mangan, Jane, went to Taunton Lunatic Hospital August 4, 1880, at \$3.25 a week, and we pay Bridget Maloney \$4 a month as house rent for her four children.
- 1 McCarthy, Julia, widow of Jeremiah, aged about 65. We pay \$7 a month for her board.
- 5 McDonald, Thomas, five minor children of, are boarded with their aunt, Mrs. O. Hillern, at \$24 a month.
- 1 McGrath, Michael, has a military settlement, and is boarded at the Northampton Asylum for the Insane. We paid last year \$176.53.
- 1 McNamara, John, is at the House of the Angel Guardian. We have paid for his board \$2 a week.
- 1 Morrissey, Bridget, aged 71; \$1 a week and fuel.
- 1 Mountain, Ellen, widow of Patrick. We allow \$1 a week, fuel and rent.
3. O'Hare, Ellen, widow of Michael, and two children. They are Boston paupers. We allow her rent. Boston reimburses us.
- 6 Powers, Johanna, widow of Edward, and five children. We allow her to work out \$1.75 a week, and we pay her fuel and rent.

- 1 Powers, Mary, widow, aged 63. We pay her rent and fuel occasionally, and \$1 a week for food: The last item ceased May 26.
- 3 Quinlan, Mary, widow of Thomas, and two children. They are Boston paupers. We supply rent, but the family mainly support themselves. Boston reimburses us.
- 4 Ryan, Martin, wife and two children. Boston paupers. He died of consumption, January 3, 1881. We have allowed them \$2 a week, fuel and rent, and paid doctor's bill of \$26.60. Boston reimburses us.
- 1 Sheehan, Hannah, \$1 a week and rent and some fuel; 61 years of age.
- 1 Splaine, David, aged 76, at Tewksbury Alms House. Paid last year for his support \$143.28.
- 1 Tobin, Bridget, aged 62. She is blind and unable to work. We allow her \$8 a month for board.

128

This gives 128 as the number regularly relieved. Boston pays for eleven, and two have died; so that 115 are now liable to be regularly relieved by the town at its sole expense, instead of 144 as last year.

The following table gives the names, &c., of those whom we have occasionally relieved during the last year: —

- 2 Blake, Samuel, and wife, \$2 in 1880, lives in Boston.
- 6 Clary, Patrick, and wife and four children. They are State paupers. With the consent of the Board of State Charities, we have allowed them \$2 a week for their relief, December 1, 1880, to February 1. He has disease of the eyes.
- 6 Coughlin, John, and wife and four children. We have allowed Mrs. Coughlin to work \$2 a week for relief from February 4 to May 12. Relief ceased May 12.

- 6 Crawford, Delia, and five children, State paupers. Deserted by her husband. Gave relief in food and fuel, \$15, from July 26 to October 6, when they left town. State allows us for 4 weeks' relief, \$8.
- 5 Crotty, Mary, and four children. They live in Boston, and Overseers there furnished relief to the amount of \$36.99.
- 1 Darrah, Lizzie. Paid her house rent \$4 a month, from March 1 to August 1, 1880.
- 2 Denehy, Thomas, and wife. Live in Dedham. We paid that town last year \$30.55.
- 9 Donahoe, Martin, and wife and seven children. We allowed him to work for relief \$2 a week till April 14, 1880, when it ceased.
- 1 Gannon, Delia, at Police Station 5 days January 8 to 12, in a comatose condition, at an expense for physician's services, woman's care, &c., of \$25. Settled in Boston, and that city reimburses us.
- 1 Hall, Mrs. James. Allowed her \$1 a week since December 1, 1880.
- 1 Houlihan, Catherine, widow of John. Paid rent occasionally during the year. Some fuel has been supplied.
- 5 Keenan, John, and wife and three children. We have given him \$2 a week since November 17 —worked out.
- 2 Keenan, Catherine, and one child, alias Mary Ann Gould, alias Mrs. Larry Finnegan, but apparently never married — daughter of James Keenan. Lives in Boston, where she was relieved by Boston Overseers, \$1.
- 5 Kelly, Mrs. Redmond, and four children. Paid rent, \$4 a month, from December 1, 1880.
- 2 Mitchell, Michael, and wife, about 65 years of age. We allowed them \$2 a week and fuel up to April 14, when it ceased. The rent is continued.
- 1 Murray, Ann, daughter of Patrick. We have paid for her support at Tewksbury Alms House \$27.43, from May 22 to July 24.

- 3 McAuliffe, Kate, and two children, settled in Boston. Gave her \$4 for food October 4 and 14. Claimed of the city.
- 6 Powers, James, and wife Catherine and four children, has a military settlement and lives in Lawrence. We paid last year for their support \$15.
- 1 Ryan, John, settled in Boston. Has received food to the amount of \$18, ceased March 31, 1880.
- 4 Roy, Joseph, and wife and two children. We allowed her to work out \$1 a week, and they live in the Town House on Heath Street. Relief ceased August 26.
- 1 Welch, Rose, wife of Thomas. We paid \$4 a month rent till June, 1880, when she died.

70

This gives 70 as the number of persons occasionally relieved, instead of 125, the number for the previous year. One has died during the year. We require some equivalent in work in every case for the amount of general relief afforded, when the applicant is able to work.

The following report shows the labor which has been performed by the female poor under the direction of Mrs. Codman and Mrs. Cabot of our board :—

| | | |
|---|--------------|-----------|
| Balance on hand Feb. 1, 1880 | \$ | 42 |
| Cash received from sale of garments | 160 | 48 |

} *Overseers
of the Poor.*

REPORT
OF
THE WATER BOARD
OF THE
TOWN OF BROOKLINE.

REPORT.

THE Water Board herewith submit their annual report for 1880.

Oliver Whyte was elected Chairman at the annual meeting in April. The officers and employés connected with the works remain the same as at the time of making the report for 1879. The terms of service for which the members of the Water Board were elected will expire as follows : —

| | | | | | |
|-------------------|---|---|---|---|-------|
| William J. Griggs | . | . | . | . | 1881. |
| Francis Hunnewell | . | . | . | . | 1882. |
| Oliver Whyte | . | . | . | . | 1883. |

As Mr. Whyte, owing to his intended absence from town, has tendered his resignation as a member of the Board, to take effect after the election in March next, it will be necessary to elect two persons to fill the vacancies, one to serve for three, and one for two years.

STREET-MAINS.

Various street-mains, as authorized by the town, have been laid, as shown by the Superintendent's report herewith annexed. There have also been laid sixty-four service-pipes.

The Water Board in their annual report for several years past have called the attention of the town to the advisability of laying a street-main from the reservoir on Fisher's Hill through Boylston street, to connect with the main on Cypress street ; but owing to the large expense (some \$17,000), and

the small revenue likely to be received directly from water-takers on the line, they did not urge, at the time of making their report, that the work should be done. They now think, and would recommend, that the work should no longer be delayed, and for the following reasons : —

First, On sanitary grounds, it is very important that the water in the reservoir should have a more perfect circulation than it now has. Most of our citizens are aware that, as the pipe to the reservoir is now arranged, the surplus of water pumped, over that used by consumers while the pumps are running, finds its way to the reservoir and is retained there until the pumps are at rest or working slowly, when it leaves the reservoir by the same pipe by which it enters and is distributed through the town. Very often, for several days or weeks, the water remains at about the same level in the reservoir, very little entering or leaving until at a time when the pumps are stopped ; the entire supply is then taken from the reservoir, and the quality of the water becomes a cause of complaint.

Secondly, The danger or risk of a break occurring in the main through Warren from Clyde street, or Walnut to Cypress street, by which the larger part of the town is supplied. Should such a break occur, the water would be entirely cut off from nearly the whole of the town until repairs could be made ; but the main, if laid as proposed in Boylston street, would obviate all trouble from such an accident, as it will give, if necessary, an entirely independent supply of water to the town.

Thirdly, The need of water by the residents on the line of Boylston street. There are several very large and valuable estates on the street, the owners of which are very desirous to obtain a supply of water which cannot be had without a main being laid in said street. On one estate extensive alterations and improvements are being made, and there will be a very

large increase in the taxable property, both real and personal, brought into town. A supply of water to this estate is of great importance. On another estate the occupant has been obliged for a number of years to cart the water used on the premises from the hydrant on Walnut street.

For the foregoing, as well as for other minor reasons, the Water Board have no hesitation in urging that a main be laid in Boylston street, and they ask the town to pass a vote authorizing the work to be done.

The only petition for new street mains which have been received by the Water Board up to the time of making this report, and which has not been reported to the town, is the one by the residents on Boylston street, for the main above recommended. In the Water Board's report for 1879, there were two petitions mentioned, one from Henry E. Raymond for main in Goddard avenue, and one from T. C. Brown for main in Beacon street and Englewood avenue. In that report, as the Board could see no immediate prospect of an increase of the water-takers on these lines, and as the income likely to be received would be but nominal as compared with the cost of the work, they did not advise the laying of a main; but since that time, as it is very desirable that the parties should have a supply of water from the town, the Board have proposed to them, that if they will in each case guarantee a payment of 5 per cent. per annum for five years on the estimated cost of laying such mains, as is generally done in the neighboring cities and towns, then the Water Board will recommend the work to be done. This proposition has been assented to by both parties, they agreeing to give such a guarantee.

NEW PUMPING STATION.

At the last annual meeting of the town, the committee having the charge of moving the Pumping Station to Cow Island was discharged, and the completion of the work was

left with the Water Board,—since which time the work has progressed as rapidly as circumstances would admit. With the exception of the building of a house for the engineer, the work as originally intended may be called completed, though it is of importance, and for convenience in the storing of fuel, that another method from that now in use should be adopted for housing the coal used in the furnaces; and this can be accomplished by building a bridge or tramway from the hill opposite the pump-house, by which means some three or four hundred tons of coal can be housed without the expense or waste of extra handling. Such a bridge, including grading, etc., would cost, as estimated, \$550. As the conveniences for storing wood, as well as the many articles used occasionally about the works at the new station, were altogether too limited, a shed 20x40 feet, with loft over it, has been erected, which gives ample room for all storage, as well as for horse-sheds and the privies connected with the works. At the time the estimates for removal of Pumping Station were made, it was thought that a suitable house for the engineer could be erected (using the material as far as practicable from the old station) for about \$1000, but that is found to be an error, as the grounds cannot be prepared, and the house built, for less than \$2300.

For several reasons, among which was the very great increase in price of all kinds of manufactured iron work and parts of machinery, which were obliged to be purchased in large quantities; and also, the fact that when the machinery was taken apart after being in use five years, there was a great amount of labor and expense to be incurred to put it in first class condition in its new locality; and that the lagging or wooden covering which encloses the steam cylinders on the engine was originally put directly on the cylinders without any protection against the heat, and on taking it off was found so badly charred as to be almost worthless, and necessitated a large expense to replace it and have it done in such a man-

ner as to guard against further damage by excessive heat,—these, as well as many other expenses necessarily incurred, and which could not have been foreseen at the time of making up the estimates, have exhausted the appropriation originally made, and leave undone and to be constructed the building of the engineer's house as was intended at a cost of \$1000, and also a balance due the contractor for building the engine-house, of about \$500. There is left of the appropriation of \$35,000, a balance of \$534.58, which lapses into the treasury.

The Board, while endeavoring to make no unnecessary expenditures, have not hesitated to have all the work over which they had charge, done in the best and most durable manner, believing it for the best interest of the town that parts of the original plans should be left undone, rather than any part of the work should be slighted.

The town, at a meeting held September 16, 1880, voted to allow \$1700 of the balance of the appropriation for the extension of the water works, then in the treasury, to be used toward building the engineer's house; but as there was soon after that meeting quite a demand for service-pipe, etc., for which that appropriation was in part originally made, and as it was late in the season, the Board decided to do nothing about the house until spring, and therefore did not draw any part of that sum for that purpose. Shortly after the boilers at the new Pumping Station were put in position, and the fire started, it was found that the great heat arising from them caused the three-inch planking, of which the roof is constructed, to warp and twist in such a manner as to break the slates and very much injure the roof, in fact, so much so that it will be necessary to make very extensive repairs, estimated to cost some \$475. From this cause a disagreement arose between the engineers who furnished the plans and specifications, and the contractor who erected the building; the engineers claiming that according to the terms of the contract, the builder was bound to provide that the roof should remain

in good shape under all conditions, and the contractor demanding his pay on the ground that though the work was done fully up to all the requirements of the plans and specifications, the plans were at fault, and a roof could not be constructed according to them, and remain in good condition. Under these circumstances it was thought best that the original committee of six who had charge of the work from the start, should be called to meet with the engineers and contractor, and endeavor to arrange the affair, rather than have a suit at law brought against the town. A meeting was accordingly held, and it was decided to pay the contractor the amount of his claim less \$475, the estimated cost of putting the roof in good condition, and that the opinion of an architect and also a competent builder be obtained as to the rights of the parties in the case. Such opinions have been furnished, and the committee have reached the conclusion that the contractor cannot be held to repair the roof at his cost, and that if a suit be brought the contractor will collect the full amount of the balance now withheld. They therefore ask the town to pass a vote appropriating the sum of \$475 for the purpose of repairing the roof.

WATER SUPPLY.

The past year has been one of great drought, the water in Charles river falling to a point seven inches lower than it has done since the works have been in operation. During the latter part of June it was found that while the pumps were constantly moving, the amount of water from the filtering galleries would not exceed 1,000,000 gallons daily, while the demand of the town supply was over 1,200,000 gallons. Therefore, acting on the suggestion of General G. S. Greene, C. E., of New York, the Water Board caused a canal 150 feet long to be dug along the banks of the river and parallel with the filtering gallery, and distant from it some thirty to fifty feet, the bottom of the canal being some three feet below the level

of the river, and connected therewith by a gate which can be opened or closed as desired. It was found on digging the canal, although it was but a short distance from the river, and three feet below the level of the water, there was no sign of water finding its way from the river into the canal until the bank of the river was cut and the water allowed to flow in, thereby showing that the bed of the river is so thoroughly cemented by the accumulation of sediment as to be practically watertight. In a short time after the water was allowed to enter the canal, the effect on the supply at the pumps was apparent, and increased the amount some 300,000 gallons each twenty-four hours. The Board do not think the filtering galleries can be depended on to supply more than from eight to nine hundred thousand gallons per day through the dry seasons, but they do not recommend the extension of the galleries, as the estimated cost is so large,—being about \$12 per foot; and the amount of water, according to the opinion of the engineers, will be much less per foot than that supplied by the galleries now in use. Any deficiency in the supply from the galleries can be made up by filtered water from the river by means of the canal. The cost would be but a nominal sum, any amount can be supplied without regard to drought, and at any time the water can be excluded by means of gates.

WASTE OF WATER.

Before the removal of the pumps to the new station, the water supplied to the town, owing to the leakage of the wooden conduit, was of a poor quality; consequently, much was obliged to be wasted at the street hydrants. Therefore, the Water Board took no action on what they knew was an excessive use of the hand-hose, thinking it was better for the citizens to enjoy the benefit of the water on their grounds, than that it should run to waste in the sewers. But now that the water is pure, and owing to its excessive waste by hose

during the summer months (many of the citizens using the hose from six to twenty-four hours per day), and as the number of takers of water, for household purposes, have largely increased, the Water Board will hereafter be obliged to enforce more strictly the ordinance restricting the use of the hand-hose to one hour each day.

POLLUTION OF WATER.

Last fall the Water Board learned that after a discontinuance of several years, parties were about to re-commence the business of washing sheep-skins at the building on Spring street bridge, about a mile above the pumping station. They therefore brought the subject, through the local board, to the notice of the State Board of Health, and were advised to apply to the Supreme Court for an injunction restraining the parties from carrying on the business. That the Water Board proceeded to do, but before the case came before the court, the town placed the matter in the hands of the Selectmen, and therefore no further action has been taken by the Water Board.

BILLS PRESENTED AND UNPAID, CONNECTED WITH THE MOVING OF THE PUMPING STATION.

The Board desire to lay before the town a matter connected with the final disbursements for removing the pumping station, and have subjoined a few bills, to which they call attention.

At the special town meeting, held October 10, 1878, a committee was appointed "to examine the cause of the alleged impurity of the water supply; the best way to remedy it, with power to consult experts." At a subsequent meeting held April 29, 1879, the sum of one thousand dollars was appropriated to meet the expense of these investigations. Of this amount one hundred and twenty-five dollars and seventy-five cents were paid for sinking test wells, etc., near the site

of the proposed pumping station, and the balance, eight hundred and seventy-four dollars and twenty-five cents, was paid Messrs. Shedd & Sawyer for various preliminary surveys, drawings, and consultations. This amount they received, as the committee regarded it, as a full settlement for this portion of their services, although their bill rendered was for one thousand dollars. In the report submitted to the town by Messrs. Shedd & Sawyer, with their estimate of the cost of removing the pumping station, dated March 29, 1879, the sum of fifteen hundred dollars is named therein for engineering services, and in these estimates, upon which the appropriations were made for this work, no other sum is mentioned as incidental to the engineers' services.

Various sums at sundry times were paid the engineers during the progress of the work, until the sum had amounted to eighteen hundred and twenty-five dollars, as is shown in the final report of the Special Committee, submitted to the town March, 1880. The excess of \$325 over the estimate for engineering services is explained in the receipt given by Messrs. Shedd & Sawyer, which reads, "Plans for Engine House." Now, at a late date, as the annual report is about ready for print, the subjoined bills are rendered. It may be proper to state in relation to the bill for architectural services in connection with the new house for engineer, that the plans and specifications submitted were found to be unsuitable, on account of the estimated cost of the building, as well as for other reasons, and were made no use of.

BOSTON, January 20, 1881.

THE TOWN OF BROOKLINE,

TO SHEDD & SAWYER, DR.

| | | |
|--|------------|----------------|
| For services and expenses for Water Committee, | | |
| to April 1, 1879, as per bill rendered, | \$1,000 00 | |
| Sept. 18, 1879. Cr. by Cash on account, | 874 25 | |
| | | \$125 75 |
| For personal services, services of Assistants, and | | |
| expenses in relation to Water Supply, under | | |
| direction of a Committee of the Town, in April | | |
| and May, 1879, | | 325 29 |
| | | <hr/> \$451 04 |

PROVIDENCE, January 29, 1881.

THE TOWN OF BROOKLINE,

New Pumping Station,

To SHEDD & SAWYER, Dr.

For estimated cost of engineering, in reference to
the New Pumping Station, \$1,500 00

Cr. by Cash received at various times, 1,425 00

Balance, , . . . \$75 00

Received Payment.

PROVIDENCE, January 29, 1881.

THE TOWN OF BROOKLINE,

New Pumping Station,

To SHEDD & SAWYER, Dr.

For balance due for architectural services in relation
to Engine House, etc. \$225 00

Received Payment.

PROVIDENCE, January 29, 1881.

THE TOWN OF BROOKLINE,

New Pumping Station,

To SHEDD & SAWYER, Dr.

For architectural services in relation to new house
for Engineer, \$105 00

Received Payment.

PROVIDENCE, January 29, 1881.

THE TOWN OF BROOKLINE,

To SHEDD & SAWYER, Dr.

For professional services for the Board of Health in
reference to purity of water supply, and tem-
porary arrangements for improving the same,
in September, 1879, \$37 50

Received Payment.

PROVIDENCE, January 29, 1881.

THE TOWN OF BROOKLINE,

New Pumping Station,

To SHEDD & SAWYER, Dr.

For services for Wm. M. Brown, Jr., as foreman,
from December 16, 1879, to March 7, 1880.
Thirty-one days, at \$3.00, \$93 00

Received Payment.

These bills amount in the aggregate to \$986.54, and should the town decide to pay them, an appropriation will have to be made for that purpose.

The extension of the grounds connected with the pump-works, the addition of another engine and other machinery, thereby largely increasing the consumption of coal, together with the large increase of water-takers throughout the town, have augmented the amount of work to be done, and added materially to the cost of maintenance; and the Water Board ask that the appropriation of \$8000 be made for that purpose. The Board also ask for the passage of the following vote:

Voted, That there be appropriated for the several purposes connected with the construction and extension of the water works as hereafter named, the sum of \$26,970; and that the Water Board are authorized to carry out the different works as specified, viz:

| | |
|--|----------|
| For laying main in Fisher's avenue and Boylston street, to connect the reservoir with main in Cypress street | \$17,000 |
| For laying main in Beacon street and Englewood avenue, to a point opposite the estate of T. C. Brown, provided the said Brown signs an agreement to pay to the town five per cent. per annum on the estimated cost of laying the same, less such an amount as may be chargeable to water rates on said street and avenue; said payment to be made yearly, in advance | 2,725 |
| For laying a main in Goddard avenue, from Cottage street to a point opposite the estate of Henry E. Raymond, provided the said Raymond shall sign an agreement to pay the town five per cent. per annum on the estimated cost of laying the same, less such an amount as may be chargeable to water rates on said avenue; said payment to be made yearly, in advance | 1, 620 |
| For putting in service-pipes throughout the town, and other work incidental thereto | 1,200 |
| For building house for engineer's use. | 2,300 |
| For building bridge at coal house | 550 |
| For repairing roof of engine house | 475 |
| For bills remaining unpaid on account of moving pumping station | 1,100 |

The following statistics are compiled from the books of the Water Registrar :

WATER TAKERS.

| | |
|----------------------------------|-------|
| Families | 1,278 |
| Public boarding houses | 4 |
| Private hotels | 4 |
| Stores and shops | 60 |
| Public stables | 11 |
| Private stables | 151 |
| Greenhouses | 26 |
| Bakery | 1 |
| Gas-house | 1 |
| Halls | 2 |
| Railroad stations | 4 |
| Town buildings | 10 |
| Churches | 4 |
| Printing office | 1 |

REVENUE COLLECTED.

| | 1879. | 1880. |
|--------------------------------|-------------|-------------|
| From private consumers | \$11,598 99 | \$12,828 69 |
| Rent of engineer's house | 200 00 | 200 00 |
| Sale of pipe | 78 59 | 42 88 |
| Sale of old material | 6 83 | 16 90 |
| Meter and repairs of meters | | 17 25 |
| From Town of Brookline :— | | |
| Highway Department | 2,028 00 | 2,028 00 |
| Fire Department | 3,833 00 | 3,988 00 |
| School-houses | 78 00 | 78 00 |
| Police station | 28 50 | 28 50 |
| Town Hall | 56 00 | 56 00 |
| Public Library | 18 00 | 18 00 |
| | <hr/> | <hr/> |
| | \$17,925 91 | \$19,302 22 |

The rates are usually promptly paid. But few fines have been levied, occasioned by the shutting off of water to delinquent tax-payers. In the five years of collection of rates, which have amounted in the aggregate to more than \$50,000, there has been a loss of only \$33.41.

The cash water receipts for the five years since the introduction of water, are shown below :

| | | | | | | |
|------|---|---|---|---|---|------------|
| 1876 | . | . | . | . | . | \$6,600 78 |
| 1877 | . | . | . | . | . | 8,877 13 |
| 1878 | . | . | . | . | . | 10,816 24 |
| 1879 | . | . | . | . | . | 11,884 41 |
| 1880 | . | . | . | . | . | 13,105 72 |

The annual revenue of the Water Department is now sufficient (unless the extensions of mains, etc., by vote of the town, in any one year should be exceptionally large,) to defray the annual expenses of both the maintenance and the extension accounts.

CONSTRUCTION ACCOUNT.

Expended to Feb. 1, 1880 (see last report) \$591,189 55

Expended from Feb. 1, 1880, to Feb. 1, 1881,
as follows :

| | | |
|----------------------------|---|------------|
| On account of street-mains | . | \$4,360 35 |
| service-pipe | . | 1,186 58 |
| hydrants and gates | | 305 75 |
| new shed | . | 837 49 |
| engine indicator | . | 50 00 |
| miscellaneous | . | 31 17 |

Cash paid from water receipts to Moses

Williams, Jr., for legal services in the
suit of mill owners on Mother Brook

and Neponset River . . . 1,000 00

7,771 34

Total . . . \$598,960 89

MAINTENANCE ACCOUNT.

From Feb. 1, 1880, to Feb. 1, 1881.

| | |
|---|------------|
| Pumping expenses, wages, oil, &c. | \$2,380 69 |
| Fuel | 2,383 77 |
| Repairs, engine, boiler, furnace, &c. | 776 50 |
| Repairs, service pipes | 26 83 |
| Repairs, street-mains, hydrants, gates, and care of | 187 09 |
| Repairs, reservoir, and care of | 51 82 |
| Repairs, filtering gallery, conduit, and force-main | 79 89 |
| Repairs, engine house | 25 70 |
| Salaries and office expenses | 1,201 03 |
| Miscellaneous | 442 07 |
| Road and grounds at pumping station | 23 55 |
| | <hr/> |
| | \$7,578 94 |

We take pleasure in commending the efficient services of the Water Registrar, the Superintendent of the works, and the Engineer at the pumping station, who have greatly aided us by the intelligent, faithful and skilled labor, performed in their respective important departments.

OLIVER WHYTE,
F. HUNNEWELL,
W. J. GRIGGS,

Brookline Water Board.

BROOKLINE, Feb. 8, 1881.

REPORT OF THE SUPERINTENDENT.

To the Brookline Water Board:

GENTLEMEN, — I have the honor to present herewith the annual report of the Superintendent for the year ending Feb. 1, 1881.

EXTENSION OF STREET-MAINS.

Owing to the enhanced value of materials and labor, the cost of street-mains was correspondingly increased. The system of doing all work by the day has been followed the past year, with results quite favorable to the town, both in regard to expense and quality. The list of streets and private ways in which the water-pipe has been laid, with cost of each, is as follows :

SIX-INCH MAINS.

| | |
|---|-----------------------------|
| Tappan street, from Beacon street to Gorham avenue, along Gorham avenue to Davis avenue, a distance of 4151.9 feet. | Total cost . . . \$3,745 71 |
| Ridgway street, from Freeman street, a distance of 241 feet. | Total cost . . . 320 57 |

TWO-INCH MAINS.

| | |
|--|-------------------------|
| From end of pipe on Webster place, to Harrison place, easterly along Harrison place, a distance of 429.5 feet. | Total cost . . . 207 78 |
| Kerrigan place, from end of pipe as before laid, a distance of 93.5 feet. | Total cost . . . 72 82 |

The change of grade in Thayer place, now called Thayer street and Thayer place, necessitated the re-laying of the two-inch pipe there, and as Thayer street was to be carried through to Davis avenue, it was thought best to re-lay that part in Thayer street with six-inch pipe; a portion of the expense was charged to the building of Thayer street. The total cost was \$223.47.

SERVICE-PIPE.

The number of service-pipes laid the past year was 64.

| | |
|--|-----------------|
| 45 of these were laid with lead, at an expense of | \$727 01 |
| and 19 with tarred iron pipe, at a cost of | 192 31 |
| Total cost | <u>\$919 32</u> |

In October, a small leak was detected in a service-pipe in Brookline avenue, and upon examination, the iron was found badly corroded by action of the salt-peat mud, by which it was surrounded; this knowledge led to a careful examination of all other service-pipes in the same materials, and without exception they were found in an unsafe condition, and were re-laid with lead pipe, at a cost of \$102.85.

LEAKS.

| | |
|---|----------------|
| The number in street-mains was 3, costing to repair | \$33 90 |
| in force-main, 1, costing | 6 10 |
| in service-pipe, 3, costing | 13 36 |
| Total number of leaks, 7. Total cost | <u>\$53 36</u> |

Below is a summary of leaks for the last four years. In 1877, 29 leaks; in 1878, 27 leaks; in 1879, 22 leaks; in 1880, 7 leaks;—by which it will be seen that the record for the past year is much smaller than for any previous year since the water was introduced.

HYDRANTS.

Five hydrant-valves have been renewed, at a cost of \$27.32, and this, with frequent inspection, has been the only outlay on them. None have ever frozen.

RESERVOIR AND FILTERING GALLERIES.

The reservoir was carefully cleaned last April, since which time nothing has been done outside of the regular maintenance.

The filtering galleries were examined last December by going through them, and no signs of any recent disturbance in the masonry could be detected, and they are apparently in condition to last many years. An accumulation of fine sand on the bottom should be removed the coming season. The apprehension that the greater influx of water, due to the admission of river water into the gravel beds surrounding the galleries, would undermine the walls, seems to be unfounded.

The total cost of opening the canal to the river and maintaining it was \$82.04.

CONSUMPTION OF WATER.

The consumption of water is quite large, but that very little is lost by leakage from the mains, has been quite definitely settled by experiment. The method pursued was to shut off sections of the town during portions of the night and keep an accurate record of the fall in the reservoir; by comparing this record with one within the same section in communication with the reservoir, the amount of leakage could be determined, and in every case the leakage was traceable to water fixtures, either out of repair or left open. To prevent this waste, frequent examinations have been made, water fixtures reported leaky repaired, and the water cut off, in cases where it was left running through carelessness; but to stop the waste without the aid of a water meter, in certain classes of tenement houses, is an exceedingly difficult task. The water wasted to prevent freezing is a serious item in the consumption during the cold months.

The plumbing in every house should be so arranged that the pipes and fixtures would not freeze. . This could be done in nearly every case, and those who do not so arrange their plumbing have no reason to complain if the water is cut off. One-half inch faucet left running for twenty-four hours would waste 10,000 gallons, which if paid for by meter would cost \$2 per day, or \$730 per year. Very few water-takers realize this.

I subjoin the following tables, the record of consumption, location of gates, hydrants, etc.

All of which is respectfully submitted.

F. F. FORBES,

Superintendent.

LIST OF HYDRANTS.

Number of hydrants set, as per last report, 154. The following have since been set in 1880 : —

- One on Tappan Street, near D. H. Rogers's house.
- One on Tappan Street, near W. I. Bowditch's house.
- One on Tappan Street, near H. V. Long's house.
- One on Ridgeway Street, near John Keegan's house.

Total number to date, 158.

LIST OF STOP-GATES SET IN 1880.

- One 8-inch gate, Washington and Thayer Streets.
- One 8-inch gate on Washington Street, near Gas House.
- One 6-inch gate, corner Tappan and Beacon Streets.
- One 6-inch gate, corner Davis Avenue and Gorham Avenue.
- One 6-inch gate, corner Freeman and Ridgeway Streets.
- One 2-inch gate, near hydrant on Webster Place.

WATER-CART FEEDERS.

Number, as per last report, 17.

Set in 1880, one corner Harvard and Second Streets.

Total number to date, 18.

DRINKING-FOUNTAINS SET.

One in Harvard Square.

One on Boylston Street, near Duffy's shop.

One on Boylston Street, corner of Brighton Avenue.

One on playgrounds, Cypress Street.

Set in 1880, one corner Aspinwall Avenue and St. Paul Street.

List of tools and materials on hand Feb. 1, 1881, is on file at office, Town Hall.

RECORD OF CONSUMPTION.

| | Average Daily Consumption. | | Total Consumption. | |
|------------------|----------------------------|---------|--------------------|-------------|
| | 1879. | 1880. | 1879. | 1880. |

Total, 141,964 feet, or $26\frac{4884}{5980}$ miles.

REPORT OF ENGINEER.

PUMPING-STATION, BROOKLINE WATER-WORKS,
WEST ROXBURY, Feb. 5, 1881.

To the Brookline Water Board.

GENTLEMEN,— I have the honor to present the report of the Engineer for the year ending Feb. 1, 1881.

The pumping engines are in first-class condition. Engine No. 2 was connected to the force-main in February, and was run steadily for three months while the old engine was being moved. It works very well, and can easily pump all the water used by the town without running it to its full capacity.

Engine and boiler No. 1 have been moved and set up in position. Before erecting the engine all the working parts were put in first-class order. A new plunger, $1\frac{1}{4}$ inches less in diameter than the old one, has been put in the high-pressure side, and metallic packing put on the piston rods. The steam cylinders and steam pipe are covered with ash felting. Additional stays and a surface blow-off have been put in the old boiler. The feed-pump has been fitted with new plungers, pistons, and piston rods.

The moving and erection of engine and boiler, building of engine foundation, and all the pipe work, was done under my supervision. The boilers were set according to plans furnished by Messrs. Shedd & Sawyer, Civil Engineers. The duty of the engine is not so good as it was last year. This is mainly due to the way in which the boilers are set, for, although it takes more coal than heretofore to pump a given quantity of water, a comparison of the indicator cards taken here and at the old station, show that the engine uses less steam than before to do the same work.

The following tables show the record of both engines, and the pumping expenses for the year.

Respectfully submitted,

RICHARD J. FLINN,

Engineer.

ENGINE RECORD FOR THE YEAR ENDING FEBRUARY 1, 1881.

Engine No. 1.

| MONTHS. | Separate Days Pumping. | | Work. | | Pumping Time | | Total Gallons pumped. | Water Pressure—lbs. per Square Inch. | Water in Well below Gauge. | Total Head against Pump. | Gallons Pumped per lb. of Coal. | Coal Value of Total Fuel. | Duty in Feet-lbs. per 100 lbs. of Coal. |

ANNUAL REPORT
OF THE
BOARD OF SCHOOL COMMITTEE
OF THE
TOWN OF BROOKLINE,
FOR THE YEAR ENDING JANUARY 31, 1891.

REPORT.

At the first meeting of the Board for organization, W. H. Lincoln was chosen Chairman, and W. Goddard, Jr., Secretary.

The terms of service for which the several committee-men were elected, expire according to the following table :

| 1881. | 1882. | 1883. |
|-----------------|------------------|------------------|
| A. MASON. | W. H. LINCOLN, | D. B. VAN SLYCK. |
| L. K. STORRS. | W. T. R. MARVIN. | C. CURRY. |
| W. GODDARD, JR. | L. J. MORRIS. | M. DRISCOLL. |

MEMBERS OF THE ADVISORY BOARD OF LADIES.

| | |
|-------------------|-----------------------|
| MISS E. Q. GUILD. | MISS M. C. STEVENSON. |
| MISS BOWMAN. | MRS. FRANCIS CABOT. |
| MRS. F. S. FISKE. | MISS S. G. LITTELL. |
| MRS. F. HAVEN. | MRS. W. H. WILDER. |

The following are the various sub-committees of the Board :

| HIGH SCHOOL. | GRAMMAR SCHOOLS. |
|----------------------|------------------|
| W. GODDARD, JR. | W. H. LINCOLN. |
| A. MASON. | L. J. MORRIS. |

SUMMARY OF STATISTICS.

| | |
|--|---------------------|
| Population of Brookline (U. S. census for 1880) | 8,074 |
| Number of children between five and fifteen years of age, May 1, 1880 | 1,303 |
| Decrease upon number returned May 1, 1879 | 49 |
| Valuation of school buildings and grounds, May 1, 1880 | \$116,500 00 |
| Approximate value of other school property, as desks, pianos, books of reference, etc. | 5,200 00 |
| Assessed valuation of real and personal estates of Brookline, May 1, 1880 | \$22,869,700 00 |
| Amount raised by taxation for support of day schools, including repairs | \$36,500 00 |
| Total expenditure for schools for year | 35,363 19 |
| Percentage of valuation expended for schools | .00154 |
| —or a little more than a mill and a half per dollar. | |
| Cost of instruction for each pupil, based on average whole number, including incidentals | \$32 00 |
| Whole number of different pupils enrolled in all the schools for the year | 1,418 |
| Average whole number for year | 1,105 |
| Per cent. of attendance in all the schools, based on an average whole number | 92.6 |
| Number of pupils over fifteen years of age | 162 |
| Number of pupils enrolled in all the schools for the week ending Jan. 22, 1881 | 1,198 |
| Of which there were in High School | 80, or 6.7 percent. |
| Grammar Schools 626, or 52.2 percent. | |
| Primary Schools 492, or 41.1 percent. | |
| Average number of pupils to each teacher in High School | 20 |
| Average number of pupils to each teacher in Grammar Schools | 37 |
| Average number of pupils to each teacher in Primary Schools | 38 |
| Number of teachers in High School | 4 |
| Grammar Schools | 17 |
| Primary Schools | 13 |
| Special teachers : drawing, 1 ; music, 1 ; sewing, 1 | 3 |

THE School Committee herewith present to the town a report of their labors during the past year, and a review of the general condition of the schools under their charge. The Advisory Board of Ladies and the Superintendent of the Grammar Schools also render reports, which are embodied in that of the School Committee.

Regular meetings of the School Committee, excepting during the summer vacation, have been held on the second Monday evening of each month. Special meetings have also been called as occasion required. The Committee have met the Advisory Board on the Thursday afternoons preceding the regular Committee meetings, and some of the Committee and Advisory Board have attended the monthly Teachers' meetings. At these meetings, topics, usually assigned at the previous meeting, relating to school work, are discussed. Occasionally some one connected with the State Board of Education has been invited to address the teachers. The Chairman of the Board, at the request of the teachers, has presided, and Miss Deane, of the High school, has performed the duties of Secretary. Perfect freedom in the expression of views has been given to all the teachers, and an opportunity has thus been afforded the Committee, not only of learning their opinions, but also the difficulties that lie in the way of the faithful, earnest teacher. A new interest in school work has been created by these meetings, and by mutual sympathy and counsel, all have been better enabled to perform their duties to the schools. The Advisory Board freely "compare notes" with the Committee, and thereby both have been aided in arriving at wiser conclusions.

Much of the real work of the Committee has been done by the various sub-committees into which the Board is divided. Few changes during the past year have been made, and the school work has progressed in a satisfactory manner. Mr. Daniels has continued to discharge the duties of Superintendent, and the schools have prospered under his direction.

No important change has been made in the course of study. The High School Committee have been engaged in preparing a new course of study for that school, and it will probably be ready for adoption before the opening of another school year. This Committee unanimously favor extending the time to five years for completing the classical course of study.

In the Grammar schools, more attention has been given to reading and composition. A detailed account of what has been done in the Grammar and Primary schools is given by the Superintendent.

The Evening school has not been so well attended this year as formerly. The Sub-Committee on that school are unable to understand why this state of things exists. Peculiar circumstances, such as the national election, may have affected the attendance this year. The Committee think it wise to open the school another year, and to include drawing in the branches taught, but recommend that it be immediately closed if a sufficient number of pupils do not present themselves at the opening of the school. It ought to be said that those who have attended have been faithful and studious.

TRUANCY.

Special attention has been given to the work of reclaiming truants, and with unusual success. The truant officer has been efficient, and his labors have been well supplemented by the teachers, who have exerted not only a personal influence upon the pupils, but upon the parents. The cases of truancy have greatly diminished, and the *morale* of the Ward school, particularly, has greatly improved.

WARD SCHOOL.

Mr. Farnham, the head teacher of this school, lately of Quincy, and recently appointed, has succeeded admirably in securing proper discipline and in obtaining the respect and esteem of the pupils. This school has suffered from frequent but necessary changes of teachers in the upper grades, and has received our most solicitous care. To secure a proper person for Principal's head assistant, was a matter of the highest importance; such an one should unite firmness with kindness, and at the same time have the ability to instruct. Mr. Brown, who had been doing well, was called to the superintendency of the schools of Quincy, and we were fortunate in securing so able a successor as Mr. Farnham. The cases of corporal punishment are rare, and yet most excellent discipline, both in the building and yard, is preserved.

SEWALL STREET SCHOOL.

It was found necessary to occupy both of the rooms in this building, on account of the rapid increase of pupils in the lower grades. All of the rooms in this building are now in use, and it is fortunate the town responded so promptly to our request for a new building.

VENTILATION.

Considerable space was allotted this important subject in the last annual report. The system introduced last year has continued to work well. The quality of the air in the school-rooms is much improved, as is very perceptible to those in the habit of visiting the schools. The system, in the vacation, was introduced into the High school building. Our thanks are due Dr. Van Slyck for time and effort devoted to this subject. The town has been liberal in its

appropriations for this object, but we are confident the money has been well spent. All of our school-rooms are now thoroughly ventilated without exposing pupils and teachers to draughts of cold air, and thus endangering their health.

EXAMINATIONS.

No change has been made in the methods of conducting the written examinations. With the exception of the Ward school, the results attained compare favorably with those of previous years. For reasons already given, the Ward school has been hindered in its progress, but we look forward to a future for that school which has not been equalled or approached in the past. Important changes were made in the primary course of study over a year ago, particularly relating to methods of instruction, and these schools were never in so good condition as at present. The grammar classes have kept up to their former high standard.

MUSIC.

Mr. O. B. Brown has continued in charge of the musical instruction in the schools. The same system is now pursued which was adopted four years ago.

DRAWING.

Miss Emma T. Parker, after the resignation of Miss White, was appointed teacher of drawing. Miss Parker reports a decided and increased interest in drawing among the pupils of the High school, and a corresponding improvement in their work. Drawing-books have, for the first time this year, been put in the hands of the Primary children; and good results are expected to be shown by the more advanced work they will be able to do in consequence of this change.

REPORT OF THE ADVISORY BOARD.

The report of this year will be more of what we hope may be done than of what has been done; yet we have much pleasure in stating the success of the system of penny savings which has been tried in three rooms of the grammar classes, in the Ward, Pierce and Harvard schools.

The interest of the children was at once awakened by the offer of the School Committee. Books were prepared for recording the amount of money received. When the account in any child's book amounts to fifty cents, the money is deposited in the Brookline Savings Bank.

The first collection in the Ward school amounted to \$3.60; in the Pierce school, to \$6.76; and in the Harvard school, to \$10.97; in sums varying from one cent to three dollars; this last from a boy nine years old, who earned it, and has since earned eighty cents more. We feel a strong wish that the system of penny savings should be carried into all the rooms of the grammar classes, and believe the teachers will be willing to receive the money once a week, if some arrangement can be made for recording and depositing it outside of the school-rooms.

The ladies are still convinced of the wisdom of teaching sewing, only they wish it might be carried farther, into the higher classes.

We wish as strongly as ever some teaching could be given in the Grammar schools on trade, finance, and representative government. Would it not be possible to hire some competent person to give a lesson or lecture on these subjects once a month to the teachers, who might take notes and give oral instruction, or lessons in dictation, to their different schools? We already hire teachers in drawing, elocution, music and sewing.

It is, however, still more important to give some practical teaching to a large class of our boys who leave school at

fourteen or fifteen years of age to earn their living by their hands. "What training have their hands received in the school, that will be of much use to them?"

In Denmark, under the superintendence of Herr Classen Kause, a workshop is connected with each public school, in which each pupil is required to spend part of every day, that the fingers may be taught skill, and the brain understanding to direct skilled fingers. When this is done the difficult problem of how to prevent crime is half solved.

Is it not possible to provide next summer a vacation school four mornings in the week, at the Ward school-house, with teaching from a carpenter, and perhaps a cobbler. For it is something to know how to handle tools, and even to drive a nail straight. It might be tried for one vacation, by subscription.

We wish, also, to emphasize our confidence in nature's method of teaching,—teaching the youngest pupils in the schools as they are taught to talk and to walk; by imitation, to lure them on by kindness and excite their interest and pleasure in learning, not puzzling them by rules and discipline. To teach them to respect and love their teacher, and be kind to one another; to give up using bad words, to want to be clean, and to know what it is to speak the truth, is far wiser and better teaching than to enable them to pass an examination in reading and spelling before strangers, or to meet the requisitions of the programme: so much learned in so much time, which is the stumbling-block in the way through all the grades of our public schools.

It is very difficult to come to a fixed opinion upon the subject of exhibitions. At first sight it seems all wrong, and as one lady expressed it, "Worse than useless, and unworthy of the intelligence of this age and community, that this early sowing of the seeds of self-consciousness, vanity, and love of display, should form a part of our public school system." Another thinks the number of parents present, interested

and pleased with the success of their children, should be taken into consideration, and thinks it a good rather than an unwise thing to connect some entertainment with the school. Another thinks there is no object in the exhibition of music at the Town Hall, and thinks it should not be oftener than once in five years, and then only as an exhibition of the mode of teaching

An English writer on education says: "I would have no woman speak before an audience unless she was under ten or over thirty."

We wish to call attention again to the need of forming a Teachers' retiring fund. A committee of the Boston School Board offered a report on this subject last June, "School Document No. 10," which may suggest a plan for the Brookline School Committee to follow.

E. Q. GUILD,

Secretary of Advisory Board.

REPORT OF THE SUPERINTENDENT.

To the School Committee of Brookline.

In compliance with the requirements of your regulations, I herewith respectfully submit my report, for the year ending Jan. 31, 1881:—

IRREGULAR ATTENDANCE AND TRUANCY.

In former reports the committee have laid considerable stress upon the evil effects upon the schools, arising from irregular attendance and they have in some cases suggested a remedy, but still the evil, although recently somewhat abated, continues to be an obstacle too formidable to pass by unnoticed.

If we could feel assured that all absentees have good and valid reasons for staying away from school, we might safely let the matter rest; but we are forced to believe that in many cases of absence, no justifiable excuse can be given.

After giving the matter careful consideration, I find that a very large proportion of the absence is confined to few children kept at home by their parents, thoughtlessly, and from habit, for the most trivial reasons, rather than from any real necessity. Other parents, apparently with no less inconvenience to themselves, but evidently appreciating the advantages of an education, as some have voluntarily expressed to me, are willing to make a personal sacrifice to keep their children regularly at school.

The statutes plainly do not leave the matter to the convenience, caprice, or indifference of either parents or children, but they must attend some school. The duty of School Committees is so clearly defined that to err ignorantly is next to an impossibility.

All admit that for a child to derive the greatest benefit possible from his school, he must be punctual and regular in his attendance — be at school when it begins, and stay till it closes.

That there are unavoidable cases of absence, no one will deny, but I believe they are much fewer in number than we have supposed.

The chief causes of absence from school are the following: —

1. Sickness of pupils or other members of the family.
2. Destitution.
3. Indifference of parents.
4. Truancy.

(1.) The first cause, except temporarily while some contagious disease is prevailing among children, does not materially affect the schools. Absence from sickness of pupil is unavoidable and often justifiable when there is other sickness in the family.

(2.) Where there is health there should be no destitution to the extent of depriving children of school privileges. There may be isolated cases where frugal, industrious parents, with a large family of children, and without steady employment, find it difficult to provide suitable clothing for them to wear to school; but surely in Brookline, all families of this kind, on making their necessities known, would be promptly and cheerfully supplied. It will not do to assume that there is good cause for absence, but inquiries must be promptly made.

The truant officer should not be regarded as an enemy to parents or children, but as a friend and helper to both. Who can so well procure information, and with so little obtrusiveness, as he who visits every day the schools where absence may occur from the circumstances mentioned? Who can so quietly, and with so little display, distribute such articles of clothing as may be needed? The parents would be convinced thereby that we intend to make it possible, so far as within the power of the Committee, for every child to receive all the benefits which the statutes contemplate in the education of the rising generation. And here I cannot refrain from saying, that this winter, at the suggestion of the teachers, many articles of clothing have been contributed by pupils, and sent to schools where they were needed, the teachers manifesting real interest in their pupils, and in some cases taking the garments home and mending them for the children.

(3.) But how shall we reach the indifferent parents and cause them to become interested, and not only to send their children, but to see that they go to school and stay there through the session?

It may be said that the schools should be made so attractive that the children would not willingly be absent. If the responsibility rested alone with teacher and pupil, there would be fewer cases of absence than now; but the irregu-

larity will be greater or less as the *parents* feel the importance of keeping their children constantly at school. The personal visits of teachers to the parents, have in some instances been productive of good results.

A practice, which has of late diminished through the personal influence of the teachers, has long existed in the Ward school, of allowing pupils to be dismissed as early as half-past eleven o'clock, to carry dinners to their fathers or brothers who are at work at so great distance from home as to make it either inconvenient or impossible for them to go home and get dinner and return in season for the afternoon work. I am happy to say that this custom has been far from universal. Many parents would not allow their children to be dismissed for any such purpose, and in order to prevent the necessity, they take their dinners with them when they leave home in the morning; and I believe all, or nearly all, could do the same thing with little inconvenience to themselves, if they were so disposed.

Children who are thus dismissed lose on an average one-third of their time at school; often are absent at important recitations; become a drag upon their class; have little or no interest in their school, and fail so badly at recitations and examinations that they are a source of mortification to themselves and their class; and still in many cases the fault is not their own. If no one suffered but themselves, the mischief done would not be so serious, but the class is delayed to listen over and over again to explanations and illustrations which have become stale to them, but without which the absentees or irregular pupils must surely drift back to the lower classes. This custom, unknown elsewhere, if continued, will in the future, as it has in the past, be a serious obstacle to progress in the Ward school.

(4.) One of the most difficult problems connected with our school system, and which is yet to be solved, is just what to do with boys who occasionally absent themselves from school

without the knowledge or consent of their parents. They are as yet an entirely different class from the confirmed truants. A boy does not voluntarily stay away the first time, but he is enticed by some acquaintance who is more or less experienced in "bunking," as the boys call it, and he yields to temptation. If wisely managed, this may be his only attempt at truancy, but if he escape detection, and at the same time the love of home and school do not restrain him, he will find it easier to yield a second time and perhaps not return so promptly; and finally he becomes unmanageable at home, a constant absentee from school, loafing about the streets, and soon falls into vice of one kind or another, and sooner or later he is sent to some reformatory institution.

I think, in nearly all cases of confirmed truancy, on inquiry being made, it will be found to be due mainly to inefficiency in the family government.

If all parents, as many do, could and would coöperate with the teachers, truancy would soon be a thing of the past.

COURSE OF STUDY AND EXAMINATIONS.

The course of study prescribed by the Committee for Grammar and Primary schools more than a year ago remains substantially as adopted at that time, and meets our present wants quite well; but it is impossible to prepare a course of study which will meet the demands upon the schools for all time. To stand still or to rest satisfied with the past, or even with the present condition of our schools, would be virtually to retrograde, and they would soon fail to meet the demands of this age of progress.

It must be understood that the course of study, with the suggestions contained therein, leave the method and general plan of presenting subjects largely to the teachers.

Examinations, written so far as practicable, are given twice a year, under the direction of the Sub-Committee on Exam-

inations, and the questions are intended to be of such a character as will enable them to determine with some degree of accuracy what knowledge the pupils have of the branches taught, and to ascertain as far as possible their power to grasp and solve problems other than those in their text-books, and indirectly to ascertain the success of the teachers,—the great object of instruction being to enable children to think closely and connectedly, to reason and apply principles and draw their own conclusions, rather than to memorize.

While our course of study clearly indicates the work to be done from term to term in the various branches of study, the statutes lay equal stress upon the moral training of the youth,—and here we cannot so satisfactorily apply a test which will show on paper the moral standing of the pupil in regard to purity of thought, truthfulness, generosity, charity, honesty, and the other virtues; but we have reason to believe that the teachers generally are faithful and conscientious in this particular, and that they recognize the paramount importance of building up characters which will make the pupils become honorable citizens.

GEOGRAPHY.

In watching the work of the several classes, and considering the relative value of the different branches taught, I am forced to the conclusion that geography has an undue prominence in the schools. It is a memory study occupying five and a half years in our course, with an average of three lessons per week, largely spent in lumbering up the mind with a mass of comparatively unimportant details in the shape of map-questions soon to be forgotten.

The most important facts to be taught in geography are the following: Outlines and features of a country, to be fixed in the memory by map-drawing and moulding; surface; mountain and river systems; climate; productions,

including animal and vegetable life; occupations; exports and imports; religion; government; a few of the great cities of the world, and the great commercial centres; the size of states, countries, continents, length of rivers, and heights of mountains,—should be learned relatively.

A knowledge of the above and a familiarity in the use of encyclopædias, would give facility in looking up details which might be needed for any specific purpose, and thus bring relief to the already over-taxed memories.

BOOK-KEEPING.

I think the plan adopted last year, of giving the graduating classes in the Grammar schools some knowledge of simple accounts, was wise. Many children cannot well afford the time to pursue their studies beyond the Grammar schools, and it was for them mainly that this branch was added to the list of studies. Of course it would not be practicable or desirable to give them any extended insight into all the intricacies of what is called double-entry book-keeping, but to give them such instruction as will enable them to keep a journal and ledger suitable to their wants in after life.

READING.

The greater part of our pupils on leaving the public schools will discontinue a systematic course of study, but almost all of them will read more or less, as time and circumstances may allow. To my mind, our schools exert too little influence in forming a taste, positive and marked, for good and substantial reading, such as travels, histories and biographies. But it would seem to be the province of the teacher to know what books the pupils are reading, and also to recommend books of unquestionable value, and to set apart a small portion of school time for the discussion of the books read.

It is to be hoped and expected that the schools will be indirectly benefited by the lessons in elocution recently given to the teachers by Miss E. M. Ballou, and which have been so eminently practical. I believe they were needed, and I think the money was judiciously expended. If there is any one branch of study in our schools which needs, more than any other, the most assiduous attention of the teachers, it is in the education of the children to a just and ready appreciation of the thoughts contained not only in the various reading books, but in all the other text-books which the children are using.

CONCLUSION.

In presenting this my second annual report, I can say, briefly, that I have devoted my whole time the past year to the schools, examining and inspecting them, and advising with the teachers, thereby enabling me to form definite and settled opinions of the various schools and teachers.

This, however, is not a report in which to go into a detailed account of the condition of individual schools, nor to discuss the merits of individual teachers; neither must it be inferred that all schools are equally good, nor that all teachers are equally able, or that they can be made so. Different elements enter into the composition of the schools, sometimes embarrassing, and often beyond the control of the teachers; then, again, all teachers have not the same fitness, either in preparation or natural aptitude, for their special work. Some are constantly improving in their methods of instruction and discipline. We cannot judge wholly of the teacher's success by the percentage of correct answers which her class may be able to show at examinations. Very many circumstances and conditions should be considered before a teacher is pronounced a success or a failure. If the teacher can control her school, and at the same time

is so interested in and devoted to her work that she will give her time and study to her school and its needs, and will avail herself of the means within the reach of all teachers for information and improvement, she will in the end succeed.

In closing, I am impelled to express my gratitude and heartfelt thanks, first, to the Committee, from whom I have uniformly received firm support and wise counsel; and, second, to the teachers, who have so kindly received suggestions, and so willingly and ably aided me in all attempts to improve the schools; and lastly, but not least, to the many children, who have at all times been so respectful and who have so generally been faithful in the many tasks which to them have often been arduous.

D. H. DANIELS,
Superintendent.

APPROPRIATIONS.

There will be needed the coming year to defray school expenses :

| | |
|--------------------------------|--------------------|
| For Salaries | \$29,200 00 |
| Sewing teacher | 550 00 |
| Music " | 600 00 |
| Drawing " | 250 00 |
| Care of school-rooms | 1,400 00 |
| Fuel | 1,500 00 |
| Sundry expenses | 2,500 00 |
| | <hr/> |
| | \$36,000 00 |
| | <hr/> |

For Evening School, including instruction in drawing \$500 00

CONCLUSION.

While much of the detail of the work of supervision and direction devolves upon the Superintendent, and can be more efficiently and satisfactorily discharged by him than by individual members of the Committee, the responsibility rests upon the Board. It is to the Board that the town looks for a proper maintenance of the schools and for a creditable standard of education. The town is liberal in its appropriations; it responds with alacrity to whatever seems requisite to secure good results, and it should have in return as excellent schools as can be found in the State. We do not claim that perfection has been reached; we do not deny that there are improvements yet to be made; but our system appears adapted to existing wants. The excellence of a school depends mainly upon the character and ability of the teacher, and it is the duty of your School Committee to make the best selection possible, and the responsibility rests upon them to dismiss a teacher when it is evident the work cannot be performed in a satisfactory manner. A careless selection; in a very short time, will work incalculable harm.

Without desiring to make any invidious distinctions, we cannot refrain from giving our testimony to the untiring devotion and unsparing efforts of some of our teachers, upon whom unusual responsibility has rested. There are those who have a large number of pupils under their charge, and some have a class of scholars that require especial care and training. Their influence and work have not been confined to the school-rooms or to school-hours, but have penetrated to the homes. It is in this way that the teacher can attain to eminent usefulness in her calling.

We congratulate ourselves upon possessing a corps of teachers, all of whom are earnest and faithful, and a large majority of whom are especially fitted by nature and education for their high and noble mission. Our teachers have

been selected from large numbers of applicants, and with the greatest care. For two years past, whenever it has been practicable, the Superintendent and Committee on Teachers have visited the schools where the applicants were teaching, and thus have been enabled to form more correct and intelligent opinions. The old theory, that anyone can teach a primary school, has been utterly discarded, and we have given as much care in the selection of our lowest primary teachers as of those who are to instruct the highest grammar grade.

The problem has ever been, and should be, how to render education most completely subservient to the welfare of the State. The future of our nation depends upon this solution.

Respectfully submitted.

W. H. LINCOLN, *Chairman.*

W. GODDARD, JR., *Secretary.*

TRUSTEES' REPORT.

THE Trustees herewith submit their twenty-fourth annual report, together with the reports of the librarian and of the treasurer of the board.

The number of books in the library is 25,181.

The circulation during the year has been 47,036.

The additions to the library during the year have been 1,163 volumes and 313 pamphlets.

For the details of the management and work of the library reference is made to the report of the librarian, hereto appended.

The Gardner Fund and the Hall Fund are well invested, and the income, in accordance with the previous practice of the board and the intention of the founders, has been expended in the purchase of books of a superior character.

These funds have enabled the board to gradually raise the standard of the library to a much higher point than a restriction to town appropriations, generous as they have always been, would have permitted.

The books are generally in as good condition as might be looked for in a library worked as hard as this. Frequent renewals of favorite works are demanded, and no inconsiderable portion of the purchases in each year consists of replacements of books worn out.

The work of examining, cleaning and repairing incoming volumes requires the almost constant services of an extra assistant. Most of the labor is necessitated by mischievous mutilation or culpable carelessness, although the last year has

shown a marked improvement in this respect. Every boy or girl who reads this statement should understand that the board would be able each year to add nearly two hundred more story books to the juvenile department if the money now expended in repairing unnecessary damages could be devoted to the purchase of new works.

The growth of the library has already forced the board to commence the occupation of the upper story of the building. One of the larger rooms has recently been shelved from floor to ceiling for additional accommodation. This will not only give room for the large number of bound newspapers, but will also provide for about 1,500 volumes of public documents. From time to time as the necessity arises, as it certainly will at no distant day, the other rooms can be utilized in the same way, and if the walls of the board room also be thus occupied, possibly from 8,000 to 10,000 volumes might be accommodated.

In the book hall some changes are contemplated. The alcove devoted to natural science will probably be soon required by works of travel, and the scientific books thus displaced will be then transferred to one of the gallery alcoves. Other classes are also outgrowing their old quarters, involving other changes.

The reading room has been much more used during the past year than ever before. The trustees have endeavored to make the tables attractive by the variety and amount of serial literature supplied, and they believe that few town libraries in the country show a longer list of periodicals and newspapers than this.

The supplementary catalogue is well under way, and will be in due time ready to go to press. This will include the most costly and most intrinsically valuable portion of the library. No effort has been spared to make a volume that will be of the greatest use to the hundreds of townspeople who are daily seeking books. It will be almost entirely the unaided work of the librarian.

One must know something of the science of cataloguing to appreciate the amount of learning, skill and perseverance involved in a work of this character and extent.

The board hope and have reason to believe that the result of the outlay involved will be highly satisfactory to the town.

The Brookline library is one of the largest, and, it is believed, one of the best of town libraries. In its historical and scientific departments it offers opportunities for researches of an extended character, while its departments of poetry, fiction and other lighter literature embraces all that is likely to be called for. If in any one department it has not met the expectations of any person, the trustees will be glad to have their attention called to the supposed deficiency.

The suggestions of all persons familiar with library matters or interested in literary pursuits will always be welcome to the board. A book may be found at the delivery desk in which the titles of any works called for, not already upon the shelves, may be entered. Such entries receive critical attention, and frequently bring before the board works of merit that might otherwise escape notice.

It is gratifying to the trustees to be able to state that all the duties of the library in the various departments have been, as usual, discharged in an entirely satisfactory manner during the year past, and they desire to express their full appreciation of the valuable services rendered by the librarian and her assistants.

BROOKLINE, January 31, 1881.

LIBRARIAN'S REPORT, 1880-81.

BROOKLINE, FEB. 1, 1881.

To the Trustees of the Brookline Public Library:

GENTLEMEN,—The doings of the library for the official year 1880-81 are herewith respectfully presented in my ninth annual report.

Little or no deviation from the beaten track has marked the course of library matters, and its history might almost be told by last year's report revised and corrected to date. Nor does such a fact indicate lack of vigor or inactivity on the part of the library, but rather the harmony of a working system in such complete running order that its ends are accomplished with nearly uniform results, and always without resort to experiments and expedients which are the bane of library existence.

That our library is enabled to maintain such a practical and convenient system, is undoubtedly due to the fact that, thus far in its history, it has never appealed in vain to the liberality of the town for either measures or means, when shown to be for the real advantage of the library. How great a source of congratulation this generous support is, can scarcely be appreciated enough!

To this support in the past we owe our present position among the representative town libraries of the land,—with its continuance in the future we may justly hope to stand without a rival in all that is excellent in library work.

In presenting the following statistical items, I beg indulgence for the familiar form they wear, pleading absolute impossibility of avoidance when dealing, year after year, with obstinate facts and figures on identical topics.

CONDITION OF THE LIBRARY.

The aggregate number of volumes now in the library amounts to 25,181, which, with the exception of 1,596 duplicates, are subject to all demands of circulation and reference, and yet no year in our history exhibits a more satisfactory record as to the general preservation of the property of the library.

This is true not only of the books, which usually suffer most seriously, but also of the library rooms that, for cleanliness and order have no rival, if one may credit the universal testimony of library visitors and strangers.

A marked feature in the present condition of the books is the rarity of carelessness and abuse while in borrowers' hands, a state of affairs as gratifying as unusual, and undoubtedly brought to pass by our practice of daily examinations; a practice therefore, to be commended for continuance.

In evidence of this improvement, I have to report less than a dozen fines imposed for maltreatment of books, only 53 volumes worn out and withdrawn, and but 192 volumes rebound — an experience which certainly has not occurred in the last nine years.

As agreeable as this record seems in comparison with former complaints, one cannot help regretting that the result has been obtained through compulsion of fines, rather than through that nice sense of honor which should prompt conscientious care on the part of all who share the benefits of the library.

ACCESSIONS.

Since the last report the library has acquired 735 volumes by purchase, 249 volumes by gift, and 179 volumes by the binding of the year's periodicals, making a total increase of 1,163 books.

The accession of pamphlets amounts to 313, and all of them gifts. Beside these, 107 unbound numbers of magazines and

reviews have been contributed, together with 29 government maps, 1 wall-map of Massachusetts, several broadsides, and Mr. Atkinson's chart of "Our national domain."

The new books exceed in number those of last year, and certainly equal them in standard merit and usefulness. In the absence of the usual annual list it will be impossible to call attention to the general excellence of the purchases as a whole, nor will space admit any special mention of the more important works save as they occur in the appended lists of purchases from the Gardner and Hall funds.

We are indebted, as in years past, to a host of friends for numerous and valuable gifts—especially to Hon. William Claflin for United States government documents, Hon. E. I. Thomas for state documents, and Hon. Charles L. Flint for a valuable collection of agricultural reports. To these and the hundred other benefactors our acknowledgments are tendered for the favors of the past year.

The annual growth of the library is rapidly filling up all available shelves, so that, even with the present moderate rate of increase, not many years can elapse before additional shelf-room will be needed, the first movement having already been forced upon us by the over-crowded state of the alcove of voyages and travels, which can only find relief by displacing its next neighbor, which in its turn relegates the public documents to the upper story, where they will, when arranged, form a special department. This work is only planned and the preliminary step of shelving the necessary room in progress; before our next report I hope to see this work completed, but do not propose to undertake it until the supplement to the catalogue is finished.

CIRCULATION.

The statistics of circulation register 305 working-days, in which 44,585 volumes were delivered for home use, averaging 146 per day. This account shows a decrease of several

thousand from the last report, and may be partially explained by the fact that the average circulation of juvenile books has been greatly reduced—a change in nowise to be lamented.

Among the items of possible interest in connection with this delivery for home use, may be mentioned the largest and smallest daily loans, which scored respectively 368 volumes on the 17th of April, and 45 volumes on the 1st of July, 1880.

Besides the 44,585 volumes reported above, an additional 2,451 volumes have been charged for special reading or reference within the library, making the entire circulation, so far as recorded at the desk, amount to 47,036 volumes.

The unregistered loans of bound volumes of pictorial papers, like Harper's Weekly, London Illustrated News, and Punch, are so frequent and numerous that anything approaching an accurate statement of statistics would be regarded as fabulous.

Incident to the circulation, four volumes have been lost and replaced by borrowers, and two lost beyond recovery through non-residents.

Postal notices have been sent on 3,163 overdue accounts, the fines thereon amounting to \$126.95. The sum of \$3.30 in fines on pencilled books has also been collected.

THE SUPPLEMENT TO THE CATALOGUE.

My earnest wish and endeavor has been to announce the supplement not only in the printer's hands, but well advanced toward completion, and I confess to a keen sense of disappointment at not being able to report its progress up to my anticipations. Yet, in looking back over the year's work, I cannot find occasion to take myself to task for many idle moments for hand or brain, therefore can only solve the discrepancy between my anticipations and actual results by the fact that my regular duties from month to month have occupied so great a share of my time that from five to eight days

per month have been all I could bestow upon the preparation of the manuscript, and they who are conversant with the difficulties of cataloguing or the arrangement of copy for the printer will understand that the manuscript for a catalogue of more than 10,000 volumes cannot be successfully prepared and finished in the space of seventy-five days or less, even when consecutive, an advantage which our supplement has not enjoyed.

Notwithstanding these disadvantages, no small portion of the alphabetical arrangement is completed, so that I think I may report, with reasonable confidence, that the printing can begin in June, and if fair success attends the work, the supplement may be ready for use by the middle or last of September, at which time begins the busy season, when the need of a complete catalogue is most urgent.

The principal work remaining to be done, after the completion of the alphabetical arrangement, is the final revision of the entire manuscript, with a last search for unknown authors; a critical eye to all possible inaccuracies of cataloguing and numbering; and a careful supply of the necessary directions and signs for the guidance of the compositor. This revision exacts the strictest attention and care, since upon its faithfulness depends the accuracy and reliability of the catalogue.

In consequence of the anticipated supplement, in which all the new books of the year have been incorporated, no annual list of accessions will accompany this report. This list will undoubtedly be missed by many of our constant readers, but it is hoped that the temporary inconvenience will be counterbalanced by the greater convenience of the full catalogue when ready for service.

The bulletins of the past year can partially supply the lack of the annual list; and the interleaved catalogue at the desk, which continues to be posted from month to month, may be relied upon for authoritative information as to the contents of the entire library.

CONCLUSION.

From the foregoing statements may be gathered all the principal features of condition, accession and circulation; the details of every-day library duties can never be written or sung, for their name is legion, but being met one by one and day by day, it gives me pleasure to record that the library corps faithfully hold the vantage ground.

Thus another library year has accomplished its work, rendered its account, and taken its place with its predecessors in the long line of years whose annual reports must serve as milestones along the way of progress for nearly a quarter of a century, and in entering the twenty-fifth year I beg to suggest the propriety of making it a *memorial year* worthy the institution and worthy the town of Brookline.

MARY A. BEAN,
Librarian.

REPORT
OF THE
PARK COMMISSIONERS
OF THE
TOWN OF BROOKLINE.

REPORT.

THE undersigned, elected Park Commissioners of the town of Brookline at the annual meeting of March 30, 1880, met on April 5th, and organized by the choice of Mr. Lawrence as Chairman, and Mr. Sargent as Secretary.

The plan for the improvement of Muddy River has been the only matter of importance which has been brought before them, and the information respecting that plan will be found in the report of the committee on that subject.

No money has been expended by the Board.

FRANCIS W. LAWRENCE,
THEODORE LYMAN,
CHARLES S. SARGENT,

. Park Commissioners of Brookline.

BROOKLINE, February 7, 1881.

REPORT OF COMMITTEE
— ON —
MUDDY RIVER IMPROVEMENT.

AT the annual meeting, held March 30, 1880, the subject of the "Improvement of Muddy River" was referred to a committee, consisting of the Selectmen and the Park Commissioners.

That committee herewith present to the town for its consideration, the "Suggestions for the Improvement of Muddy River" of Mr. Frederick Law Olmsted, the eminent landscape architect.

These "Suggestions" will fully explain the plan by which it is hoped that the present unsightly and unhealthy stream may become, at a comparatively small cost, an ornamental park-way.

MR. OLMSTED'S LETTER AND PLAN.

SUGGESTIONS FOR THE IMPROVEMENT OF MUDDY RIVER.

To the Commissioners of Parks:

GENTLEMEN, — In a plan which I had the honor, in conjunction with the City Engineer, to submit to you a year ago, the drainage difficulties of Back Bay were proposed to be met by forming a part of it into a basin in which water would, under ordinary circumstances, be maintained at a nearly uniform level, but in which, when an unusually high tide would for a few hours prevent outflow, a larger amount could be harmlessly stored. Public roads were to be laid out around and across this basin, and its banks to be planted and otherwise treated picturesquely.

The plan was adopted, and with the concurrence of the City Council work is now advancing under it. In presenting it last January to the Council, you pointed out that while its scope was limited to that part of the Back Bay which had some years before been placed in your charge with a view to a public park, the evils which it was designed to meet would still remain to be dealt with in that arm of the bay known as Muddy River.

The question has since been raised whether the best plan for this purpose might not be found in extending a corresponding arm of the Back Bay basin to the head of tide-water in Muddy River, and the present report is designed to present this suggestion (as far as practicable in advance of surveys and mature study) in a form to invite preliminary discussion.

The tidal part of Muddy River above the basin now under construction has the usual character of a salt creek winding through a valley, the marshy surface of which, lying from fifteen to twenty feet below the general level of the adjoining uplands, is partially submerged at extreme high water. The tide ordinarily flows to a point about a mile above the basin. Streets have been laid out upon the uplands upon no continuous system; those of each side independently, and regardless of what may be eventually required in the low lands; the leading motive being to make small bodies of land immediately available, at little cost, for suburban residences. The city is rapidly advancing in compact blocks towards the region, and public convenience will, before many years, require a more comprehensive treatment of it.

It usually happens when a town is building up on both sides of a small water-course and valley that the sanitary and other disadvantages of the low ground prevent it from being much occupied, except in a way damaging to the value of the adjoining properties. In process of time the stream and valley and the uses to which they are put, come to be

regarded as a nuisance; and radical measures, such as the construction of a great underground channel, and the filling up of the valley, are urged as the only adequate remedy. The cost of these, and the local disturbance they make, excite opposition to them; their complete beneficial operation is long delayed, and the character of the district becomes so strongly fixed before this period is reached that it can only be partially changed. Though necessary, therefore, to public health and to convenience of general transit through the district, the result in the increased tax-bearing capacity of the locality is no compensation for the required outlay.

As an alternative to such a possible course the policy now suggested for Muddy River would look to the preservation of the present channel with certain modifications and improvements adapted to make it permanently attractive and wholesome, and an element of constantly increasing advantage to the neighborhood. Except where the valley is now narrowest, it would be reduced in width by artificial banks, so that the river with its shores would everywhere have a general character, resembling that which it now has near Longwood bridge, only that its water would be kept at a nearly uniform level, and guarded from defilement by intercepting sewers and otherwise. The Brookline margin would be the broadened base of the present railroad embankment, bearing a woody thicket. The opposite or Boston bank would have an elevation above the water of ten feet where wholly artificial, rising where the natural bank is used to twenty feet. Upon this would be laid out a public way ninety feet wide, in continuation of that now forming upon the Back Bay basin; divided like that into foot, carriage, and saddle courses, and designed to serve as a public promenade along the river bank, as well as a trunk line giving an element of continuity to the street system of the neighborhood.

It is proposed that this parkway should be continued along the small water-course above and through the valley

to Jamaica Pond, which would add another mile to its length. There are three smaller ponds near the head of the valley, which would thus be skirted, and below them a large marsh, which, though formerly reached by the tide, is now a fresh-water swamp, and cannot long remain in its present condition without great peril to the health and life of the increasing population of the adjoining parts, both of Boston and Brookline. Physicians practising in the neighborhood believe it to have been already the source of serious epidemics.

The supply of water to it from local springs is supposed to be large enough to maintain a pond to be formed by a dam at the lower end, by which it would be changed from a foul and noisome to a pleasing and healthful circumstance. The property is of little value speculatively, and of none otherwise, and the improvement thus projected would be neither difficult nor costly. If the fresh water supply should finally be thought insufficient for the purpose, it would be possible to extend the salt-water basin to cover the ground. The swamp-soil excavated would be of value for covering the slopes below, and the operation would not be costly.

Adopting either expedient, the result would be a chain of pleasant waters, including the four closely adjoining ponds above the swamp, extending from the "mill-dam" on Beacon street to the far end of Jamaica Pond, all of natural and in some degree picturesque outline, with banks wooded and easily to be furnished with verdure and foliage throughout. Except at one point where there are about a dozen cheaply-built wooden dwellings and shops, the whole would be formed on land of little value, occupied by no buildings, and for no productive purposes, and all of it now in a condition hazardous to public health.

Such a chain of waters, even if connected and having a sweeping current, always becomes objectionable in a town, when streets are so laid out that its immediate borders are

private property, or have private properties backing upon them. In such case it is found necessary to give it the character of a canal, to wall its banks with masonry, and, if the water supply greatly fluctuates, to take other measures to prevent its becoming a nuisance. At the best it is an eyesore. But if uniformly filled, its banks made comely, and kept neatly, in the usual manner of public parks, and if no private property is allowed to abut upon them, any natural water-course will be attractive and wholesome.

On the other hand, private property looking upon the park-way would at small cost be well drained; there would be nothing objectionable in its rear but in general a pleasant neighborhood, already formed, and, as it would lie midway between an attractive urban and an attractive suburban residence district, agreeably connected, there would be no doubt as to its ultimate character, or that it would be rapidly taken up for dwellings of a superior class. This prospect would have an immediate favorable influence on adjoining properties, and the entire operation would be attended by an advance of market and taxable values securing the city a rapid return for its outlay.

The indirect course of the park-way, following the river bank, would prevent its being much used for purposes of heavy transportation. It would thus, without offensive exclusiveness or special police regulation, be left free to be used as a pleasure route.

The Brookline Branch Railroad and the drive of the park-way where they come nearest together, would be two hundred feet apart, and there would be a double screen of foliage between them.

Taken in connection with the mall upon Commonwealth avenue, the Public Garden and the Common, the park-way would complete a pleasure route from the heart of the city a distance of six miles into its suburbs. These older pleasure-grounds, while continuing to serve equally well all their

present purposes, would, by becoming part of an extended system, acquire increased importance and value. They would have a larger use, be more effective as appliances for public health, and every dollar expended for their maintenance would return a larger dividend.

The scheme offers hardly less advantage to Brookline than to Boston, and a plan of equitable coöperation in carrying it out is probably feasible.

If the interests of the city required that the region affected should be largely occupied for manufacturing and commercial purposes, and that for this reason it should be provided with frequent, continuous, and direct lines of communication upon easy grades, the proposition would be more open to objection. But such provisions would be very costly, and if the tendency at present manifest on every side to make the district a residence quarter, with only such provisions for trade as local convenience may call for, is not desirable to be checked, then the suggestion would seem to offer a much-needed sanitary improvement at moderate cost, and with a promise of large incidental profits.

Respectfully,

FREDERICK LAW OLMSTED.

BOSTON, December, 1880.

These suggestions have been favorably received by the Boston Park Commissioners, and form a part of their annual report. They say "The plan suggested would be mutually advantageous to the city and town, and offers a solution of the matter at the least eventual cost, both from the direct returns in the way of betterments which can be assessed, and the annual increase of tax receipts from increased valuations and improvements." This plan is at present but a sketch, and in order to present full details, with specifications and estimates, your committee ask for an appropriation of one thousand dollars.

REPORT
OF THE
COMMISSIONERS OF THE SINKING FUND
OF THE
TOWN OF BROOKLINE.

REPORT.

The Commissioners of the Sinking Fund for the town of Brookline herewith present their annual report.

The amount received by the Commissioners
from town appropriation is . . . \$393,607 25

From this there have been paid
town notes \$230,608 00

The present value of the invest-
ments held by the Commis-
sioners is estimated at . . . 208,649 25

439,257 25

Showing a gain of \$45,650 00

The securities held by the Commissioners are :

Respectfully submitted,

MOSES WITHINGTON,

Treasurer.

AUDITORS' REPORT
OF THE
TOWN OF BROOKLINE,
FOR THE
YEAR ENDING JANUARY 31, 1891.

REPORT.

The Auditors for the year ending January 31, 1881, have examined the accounts of Moses Withington, Treasurer of the town of Brookline, of the Warren Tree Fund, and of the Walnut Hills Cemetery Fund, and find the same correctly cast and with proper warrants.

At the beginning of the financial year the unpaid taxes for the past six years were : —

| | For 1875. | For 1876. | For 1877. | For 1878. | For 1879. | For 1880. |
|---|--------------|--------------|--------------|--------------|--------------|--------------|
| Received during the year, and abated during this and former years... | \$348 48 | \$587 24 | \$1,487 00 | \$4,744 25 | \$16,526 63 | |
| | 2 00 | 73 44 | 919 00 | 4,151 28 | 10,945 52 | |
| Leaving unpaid at end of year | \$346 48 | 513 80 | \$568 00 | \$592 97 | \$5,581 11 | \$12,147 60 |

The following table gives the recommendations for appropriations for the coming year, and the recommendations and expenditures for the same accounts during the year 1880-81 : —

| OBJECT OF APPROPRIATION. | Appropriation Recommended. | Appropriated and applica- ble last year | Expended last year. |
|--|-------------------------------|---|------------------------|
| Abatement of taxes | \$1,000 00 | \$1,000 00 | \$991 60 |
| Assessors | 2,200 00 | 2,200 00 | 2,200 00 |
| Auditors | 150 00 | 150 00 | 150 00 |
| Cemetery, Walnut street | 200 00 | 200 00 | 162 11 |

ASSESSORS' REPORT.

IN presenting their annual report the Assessors beg to state that they have attended to their multiplied duties in strict accordance with the requirements of the statutes. The natural increase of the town, together with the additional duties imposed on them, have so increased their labors that constant session has been required to complete the records in season for the issuing of the warrant to the Town Treasurer. They would gratefully acknowledge the apparent satisfaction evinced by their townsmen with the result of their labors. The applications for abatements have been few, and the aggregate amount is unusually small. Notwithstanding the loss of some heavy tax-payers, the aggregate amount of taxable property has increased \$375,000, so that, with the prudent economy which has governed the appropriations, we have the gratifying result of a reduced rate of taxation. Should the spirit of careful and resolute economy continue to regulate our town expenses in the future, as it is greatly to be hoped it will, we may fairly expect, from the incoming tide of prosperity which is already perceptible, a steady accession of tax-payers and a steady reduction of tax-rate, which is so desirable. Appended is a condensed statement of the taxation of the town, with a table of expenditures, debt, valuation and rate of taxation extended to the present time.

WILLIAM LINCOLN,
J. ANSON GUILD,
WILLIAM D. COOLIDGE, } *Assessors.*

BROOKLINE, February 14, 1881.

CONDENSED STATEMENT

OF THE TAXATION OF THE TOWN OF BROOKLINE FOR THE YEAR 1880.

REPORT

OF THE

Selectmen, Surveyors of Highways,

AND

BOARD OF HEALTH.

The Selectmen, elected at the annual town meeting of 1881, organized by the choice of Charles H. Drew, chairman, and Charles D. Lincoln, clerk.

Committees of the board were appointed as follows :

Accounts, Mr. Candage.

Fire Department, Messrs. Lawrence and James.

Police, Messrs. Lawrence and Whyte.

Public Buildings, Messrs. James and Whyte.

Public Grounds, Messrs. Drew and Candage.

Sewers, Messrs. James and Candage.

Street Lamps, Messrs. Whyte and Drew.

Town Stable, Messrs. Candage and James.

Town Hall, Mr. Whyte.

ACCOUNTS.

There have been 1043 orders drawn against the appropriations made by the town. Following is a statement of the same.

| SUBJECT OF APPROPRIATION. | Amount. | Expended. | Unexpended. |

| Watering streets..... | 5,000 00 | 5,000 00 | |

In addition to the above the following amounts were paid out of contingencies:—*\$264.64;
†\$24.50; †\$147.48; §\$442.23; ||\$219.85; **\$337.72; ††\$60.15.

§§Including amount received from Commonwealth, \$ 42 00

Other cities and towns, etc..... 006 32—\$648 32

FIRE DEPARTMENT.

The fire department is in a good state of discipline and efficiency. Reference is made to the report of the engineers appended hereto, for particular information. An appropriation of \$8,000 is recommended for the year ensuing.

POLICE.

There have been no changes in the police force during the past year, and the business of the department has been carried on as well as could be expected with the small force which we now have. The report of the Chief of Police will give full information as to the details of the work of the force.

It seems to us very desirable that the number of patrolmen should be increased, in order that the "three-relief system" may be adopted, by which system the whole town will be protected during the whole of the twenty-four hours.

Under the present system, but four patrolman are on duty in our streets during the day, and six at night, supplemented by a mounted officer during the afternoon and evening; but between the hours of six and seven P. M., and four and seven A. M., even this small number is withdrawn, and most of the beats left entirely uncovered.

With five more men, this difficulty may be obviated and the whole of our territory properly patrolled at all hours of the day and night.

We therefore recommend an appropriation of twenty thousand dollars (\$20,000) for the ensuing year.

PUBLIC BUILDINGS.

The public buildings are in good condition, and (except the town hall) will need no considerable repairs during the ensuing year. An appropriation of \$1,500 is recommended.

PUBLIC GROUNDS.

The public grounds are in good condition, except the play-ground in Brookline avenue. No recommendation is made respecting this play-ground, as it seems well to wait until the proposed improvement of Muddy River is carried out before doing anything concerning it.

The Cypress street lot was sold by auction in conformity with the instructions of the town at the annual meeting, to James M. Seamans, who was the highest bidder, for the sum of \$10,000. The board recommend the town to pass a vote ratifying the sale and conveyance to Mr. Seamans. No action has been taken respecting the Heath street estate, and the board suggest the expediency of authorizing the next board of Selectmen to dispose of the same for such price as can be obtained.

The play-ground on Cypress street had seats placed upon it early in the season, for the convenience of those who use it. The fence was repaired and painted, but it will not be a great while before the town will be called upon to make an appropriation for a new fence. The flag-staff has been painted and had new signal halyards during the summer.

SEWERS.

The sewers constructed during the year are as follows :

One in Aspinwall avenue and St. Paul street, commencing at the junction of Aspinwall avenue and Brook street, and continuing up St. Paul street to a point opposite St. Paul's church. Cost of sewer and catch-basins, \$904.40.

One in Prescott street, in front of estates of A. A. Lawrence and Theo. F. Von Arnim, Esqs., to Mountfort street, at a cost of \$543.20.

One in Washington street, from a point opposite the residence of Henry Collins, Esq., to School street. Cost of same, \$1,386.89.

The sewer in Walter avenue has been continued across Washington street, and connected with the sewer in Brookline avenue. This sewer was originally connected with the old sewer in Washington street, but owing to the flat grade of the old sewer, we were troubled with back-water in Walter avenue and other sewers connected therewith. The cost of this work was \$585.12.

MAIN SEWER.

As many of our citizens are aware, the main sewer crosses the sewer along the railroad, at a point just below the Gas Co.'s coal shed, and at about the same grade as the other sewer; and in order not to obstruct the flow of water in the sewer along the railroad, openings were left through the sides of the new main sewer, through which the water might pass. This, while it accomplished that purpose, also allowed the sewage which was forced back by every incoming tide, to escape into the brook and be carried up and down the brook, and also through the brook which crosses the play-ground, to the rear of the houses on Brookline avenue. At the time the main sewer was built, the amount of sewage passing through it being small, no great inconvenience was felt from it, but the amount having largely increased, it became a nuisance which could not longer be tolerated. Accordingly, we have had the main sewer carried under the sewer along the railroad and the nuisance thereby abated. The cost of this work was \$1,570.13.

The above amounts have all been paid from the receipts from sewer assessments, as per vote of the town passed at the last annual meeting.

The Thayer place sewer has been completed, and all legal assessments have been made on all the before-mentioned sewers and the bills placed in the hands of the Town Treasurer for collection.

There are now no applications for sewers on file.

For balance of sewer assessment fund, see Treasurer's report.

SEWER IN THE VILLAGE.

At the last annual meeting an appropriation of \$1.500 was made for the purpose of settling the claims of persons who had rights of drainage in the sewer known as the sewer in the village, and who had been ordered by previous boards of health to cease from draining therein. One person only, viz., Mr. Jacob Morlock, has obeyed the order of the Board of Health, he having changed his drainage in the early part of the year 1880, and presented his claims. They have been settled. See Treasurer's report.

STREET LAMPS.

During the past year the streets of the town have been lighted in part by gas supplied by the Brookline Gas Light Co., and in part by kerosene burned in lamps with the Ritchie reflectors furnished by Messrs. Ritchie & Sons.

The lamps have been lighted all night and every night excepting five nights in each lunar month, at the time of the full moon. There are now in use throughout the town 401 gas lamps and 85 kerosene.

Since the last report nine additional lamps have been lighted, viz: One gas light on Davis avenue and one on Gorham avenue, and four kerosene lights on Tappan street, two on Davis avenue, and one on Thayer street.

Several petitions have been received for lamps in addition to the above, to be placed in different localities throughout the town, some of which seem to be necessary; and the board would ask for an appropriation of \$1,000 for the purpose of erecting lamp posts in such situations as may be deemed important.

NUMBER AND LOCATION OF STREET LAMPS AS LIGHTED UP
TO FEBRUARY 1, 1882.

TOWN STABLE.

The town stable is in good condition. The stable lot has been fenced during the past year.

TOWN HALL.

The board elected Willard Y. Gross janitor and special police officer for the Town Hall. During the year there have been repairs and improvements to the interior of the building costing about \$500. We would recommend the appropriation of the sum of \$2,500, for the care and the interior repairs of the hall for the year ensuing.

The exterior of the Town Hall needs extensive repairs. The tin roofing is in very poor condition, and will need to be thoroughly repaired or wholly replaced. The gutters of the building, which are made of galvanized iron, leak badly, letting the water flow back of the coving, and the whole stone work of the hall needs to be examined and pointed with cement.

The board would ask for a special appropriation of \$1,500 to make the necessary outside repairs on the Town Hall.

APPOINTMENTS.

The Selectmen have made the following appointments, besides those already mentioned :

Inspector of Milk, Alonzo Bowman.

Special Police Officers without pay, Willard Y. Gross, for the Town Hall; Thomas S. Pettengill, for Walnut Hills and Walnut street cemeteries; Eneas Smyth, for Holyhood cemetery; David McCarty, for Cochituate reservoir; William D. Morrison, for the Public Library.

Funeral Undertaker, Thomas S. Pettengill, and after his decease, J. D. Gutterson.

Probation Officer, George F. Dearborn.

Engineers of the Fire Department, George H. Johnson, Andrew Noland and Alfred E. Kenrick.

Janitor of the Town Hall, Willard Y. Gross.

Keeper of the Town Lock-up, Alonzo Bowman.

Superintendent of Streets, Michael Driscoll.

Keeper of the Northern Hay Scales, Wm. D. Coolidge.

Keeper of the Southern Hay Scales, Francis H. Bacon.

Messenger of the Board, Harry Seamans.

LICENCES.

The Selectmen have granted licenses to sell liquors, as follows: To Francis H. Bacon, Solomon Burt and Wm. D. Coolidge, grocers; Jacob Morlock and Charles N. Perkins, inn-keepers; George W. Bird and Warren G. Currier, apothecaries, under the sixth class. All other applications were rejected.

Elijah S. Holmes was licensed to keep a billiard-room in St. Andrew building, Washington street.

Mrs. H. Holmes was licensed to keep an employment office on Walnut street.

Ten persons were licensed to deal in junk.

Nineteen persons were licensed to collect grease, bones, etc.

MISCELLANEOUS.

The contract for furnishing coal for the town buildings was awarded to Shepard Robbins & Son, at \$6.16 per ton.

On petition of the abutters, the way known as "Edge Hill road" has been laid out as a town-way, and the laying out will be submitted to the town at the annual meeting.

The petition to lay out Babcock street as a town-way was considered, but, in consequence of the exorbitant demands of those who own the fee of the street, it seemed inexpedient to grant the petition, and it was therefore laid upon the table.

Petitions to lay out Sewall avenue, and a new road over Aspinwall hill from Washington street to Tappan street, have been received, but the Selectmen have not yet taken final action upon them.

The request of the Boston & Albany Railroad Company, to lay out a foot-way crossing its tracks to Washington street, was considered, and after a public hearing it was thought to be inexpedient to grant the request.

An application for a location of telegraph poles in Washington and School streets and Aspinwall avenue, has been received and considered, but has not received final action.

An application for a location of the Inland Railroad Company has been received by the board, and is now under consideration.

The bond of Town Treasurer was fixed at \$50,000 for the ensuing year.

Full information respecting the suits against the town will be found in the report of the attorneys of the town, Messrs. M. & C. A. Williams, hereto appended. The suit of James McMahon against the town was, upon advice of counsel, settled by the payment of \$300.

The Selectmen annex a list of appropriations which they recommend the town to make at the annual meeting.

The reports of the several officers at the head of departments of the business of the board are appended.

| SUBJECT OF APPROPRIATIONS | Appropriation recommended | Appropriated Last Year | Expended Last Year. |
|--|---------------------------|------------------------|---------------------|
| Abatement of Taxes..... | \$1,000 00 | \$1,000 00 | |

In addition to the above the following amounts were paid out of contingencies:—*\$264.64; †\$24.50; ††\$147.48; \$442.23; ††\$219.85; **\$337.72; ††\$99.15.

SURVEYORS OF HIGHWAYS.

The board organized by choosing Charles H. Drew, chairman, and Charles D. Lincoln, clerk. Highway districts were assigned as follows :

DISTRICT NO. 1, ASSIGNED TO MR. LINCOLN.

Beacon street from Boston line to Pleasant street, Pleasant street, Longwood avenue, Kent, Colchester, Carlton, Ivy, Essex, Mountford, Prescott, St. Paul (north of Longwood avenue), Monmouth, St. Mary's and Green streets, and Monmouth court.

DISTRICT NO. 2, ASSIGNED TO MR. WHYTE.

Beacon street from Pleasant to Washington street, Harvard, Winchester, Park, Marion, Vernon, Alton, St. Paul (south of Longwood avenue), Francis, Toxteth, Perry, Holden, Prospect, School, and Pierce streets, and Summit, Harvard, and Aspinwall avenues.

DISTRICT NO. 3, ASSIGNED TO MR. JAMES.

Washington street from Boylston street to Brighton line, Beacon street from Washington street to Brighton line, Cypress street from Boylston street to Washington street, Boylston street from Cypress street to Newton line, Tappan and Brighton streets, and Davis, Gorham, Fisher, and Englewood avenues.

DISTRICT NO. 4. ASSIGNED TO MR. CANDAGE.

Boylston street from Cypress street to Washington street, Walnut street from Cypress street to Washington street, Washington street from Boylston street to Boston line, High, Irving, Pearl, Emerald, Flora, and Juniper streets, and Brookline, Pond, Morss, and Walter avenues.

DISTRICT NO. 5, ASSIGNED TO MR. DREW.

Walnut street from Cypress street to Boylston street, Cypress street from Boylston street to Chestnut street, Sewall, Chestnut, Warren, Dudley, Heath, Pond Hammond, Grove, South, Newton, Clyde, Cottage, and Avon streets, and Goddard avenue.

The board added to the duties of Superintendent of Streets the supervision of the watering of the streets and the supervision and care of the watering carts. The report of the Superintendent of Streets is appended. The board take pleasure in commending this officer for the manner in which his duties have been performed.

There have been constructed an unusual amount of new side-walks the past year. These walks were absolutely necessary. During the ensuing year, however, it is believed that there will be less need for new side-walks, and a less amount of money will be needed than was appropriated for that purpose last year. The need of extensive repairs in some streets will require a larger expenditure for highways than was made last year, and that, added to the fact of the advance of wages, has compelled the board to ask for an appropriation of \$18,000 for the care of highways.

BOARD OF HEALTH.

The Board of Health elected George K. Sabine, M. D., agent of the Board of Health, at a salary of \$200. His report is appended, and reference thereto is made for particulars concerning this department.

A contract was made with Francis Mealey, to remove house offal for the year, for \$250.

Respectfully submitted,

CHARLES H. DREW,
OLIVER WHYTE,
HORACE JAMES,
RUFUS G. F. CANDAGE,
FRANCIS W. LAWRENCE,

*Selectmen, Surveyors of Highways, and Board
of Health, of the Town of Brookline.*

APPENDIX.

REPORTS TO THE SELECTMEN

OF

OFFICERS AT THE HEADS OF DEPARTMENTS.

REPORT OF THE CHIEF OF POLICE.

OFFICE OF THE CHIEF OF POLICE.
BROOKLINE, Jan. 31, 1882.

To the Selectmen :

GENTLEMEN :—I have the honor to submit my sixth annual report of the Police Department, for the year ending Jan. 31st, 1882.

The organization of the force remains the same as last year, as follows :—

Chief, Alonzo Bowman.

Sergeants.

George F. Dearborn.

Charles B. McCausland.

Patrolmen.

B. C. Clarke.

Mears Orcutt.

Thos. J. Murray.

Wm. W. O'Connell.

Burton R. Willis.

Geo. F. Marston.

Albert S. Paige.

Jos. J. O'Connell.

Alonzo W. Corey.

Robert J. Watson.

William Miller.

Alden A. Manly.

Special Police Officers without pay.

W. Y. Gross, for the Town Hall.

W. D. Morrison, for Public Library.

Eneas Smyth, for Holyhood Cemetery.

David McCarty, for Cochituate Reservoir.

WORK OF THE DEPARTMENT FOR THE YEAR.

Whole number of arrests made, 355. (For corresponding term last year, 305.)

NUMBER OF ARRESTS.

| | | | |
|---|-----|-----------------------|-----|
| Males | 330 | Residents of the Town | 170 |
| Females | 25 | Non-Residents . . | 185 |
| Minors | 66 | Of American birth . | 170 |
| Juvenile offenders less that 17 years of age | 29 | Of Foreign birth . | 185 |

| Number of street lamps reported unlighted:— | |
| Oil lamps from Feb. 1st to May 1st . . . | 815 |
| Oil lamps from May 1st, '81, to Feb. 1st, '82 | 75 |
| Gas street lights unlighted from May 1st, '81, to Feb. 1st, '82 | 34 |
| Number of street lamps reported broken . . . | 35 |
| Number of runaway horses caught by mounted officers | 13 |
| Number of officers off duty, and reporting at the station on alarms of fire being given . . | 53 |
| Number of furnished houses reported as temporarily vacant and special police protection asked for | 65 |
| Number of unfurnished houses | 10 |
| Number of officers detailed by request of citizens for private parties, etc. | 29 |
| Number for public occasions | 30 |
| Number of junk dealers licensed | 10 |
| Number of milk dealers licensed | 41 |

CRIMES AND MISDEMEANORS.

Of the 194 arrested for the offence of drunkenness, 36 have been released on becoming sober, and a spirit of repentance and a desire to do better manifested. In dealing with this class of unfortunates, I have endeavored to reform as well as to punish, and am happy to say, in some instances have been successful. A helping hand sometimes has a wonderful effect on a man when he expects a kick. There is room for plenty of work in this direction. Any individual or organization instrumental in saving any person from this blighting curse, the cause of a large percentage of crime, (the records of our penal institutions and lunatic asylums will verify this statement,) will not only have the satisfaction of saving an individual, but of rendering happy an otherwise blighted home.

Any and all suggestions or efforts by officers towards reforming this class of offenders without severe punishment, by probation or otherwise, has been promptly endorsed and carried out by our Trial Justice.

Of the number arrested the past year for drunkenness, 117 were non-residents.

BREAKING, ENTERING AND BURGLARY.

Nine dwelling-houses, five stables, one store and one shop, have been broken into and robbed of property of more or less value, the past year. In all except two cases of dwelling-houses the loss has been trifling. The parties who burglarized dwelling-houses in the town, in October, November and December last, are believed to be in custody, awaiting trial, the evidence against them being conclusive.

The placing of offenders on probation, especially that class named by the law as juvenile offenders, those under 17 years of age, has been attended with excellent results. (See Report of Probation Officer.) Reformatory institutions, especially our houses of correction, seldom reform their inmates; hence, every effort should be made to reform offenders, more especially the juvenile class, outside of our penal institutions, as the stigma of "jail-bird" sticks to them and often renders them more desperate and vicious.

THE MOUNTED SERVICE.

The usefulness and necessity of a mounted police has never been better demonstrated than in the past year. In discovering and removing obstructions in the outlying streets of the town, many times the extra cost of the mounted service may have been saved. It is also of great use in regulating driving, preventing fast and reckless driving, and in pursuing and stopping runaway horses. In one instance a noted criminal was caught and brought to justice, whose capture could not have been effected except by a mounted officer.

STREET-LIGHTS.

Street-lights are recognized by intelligent police authorities everywhere as important police agents. While acknowledging that our street-lights have been kept in excellent order the past year, I believe the practice of omitting the lights a certain number of nights in the month is a *dangerous one*. There are several locations in which more street-lights should be maintained as a matter of safety to travellers and citizens. The southerly portion of Cypress and Chestnut streets are, in my opinion, deficient in street-lights; also, a part of Warren street, and several locations in the Longwood district.

MISCELLANEOUS.

The Telephone as a police agent has been of great value the past year, and its use in constantly increasing.

The necessity for an increase in the number of patrolmen has been more apparent the past year than ever before,—an increase sufficient to maintain three police reliefs in the thickly inhabited parts of the town, instead of two as now, organized to the end that the town may be protected the whole twenty-four hours of the day. Nearly every case of house-breaking which has occurred in town the past year, has been committed between the police reliefs.

I have found it necessary the past year to employ one officer on special duty a large part of the time. Officer Paige has been detailed for this purpose and has done some excellent work, in the way of convicting house-breakers and thieves. Also, as agent of the Overseers of the Poor, his services have been valuable to the town.

CONCLUSION.

The officers have generously given me their support, and have, in and out of season, promptly and cheerfully responded

to every call, and cheerfully complied with all orders given. This has made the business of the year one which I shall be pleased to compare with previous years.

My dealings with officers of other places have been of the most pleasant nature. To the police authorities at City Hall, Boston, I am under great obligations for valuable assistance cheerfully given at all times.

With thanks for the many courtesies shown me by the Selectmen and Committee on Police,

I am, respectfully, your obedient servant,

ALONZO BOWMAN,

Chief of Police.

REPORT ON SUITS IN WHICH THE TOWN IS A PARTY.

BROOKLINE, FEBRUARY 3, 1882.

Charles H. Drew, Esq.,

Chairman of the Board of Selectmen:—

DEAR SIR,—We make the following report of the cases we have charge of for the town, to wit:—

FIRST,—

THE MOTHER BROOK AND NEPONSET RIVER MILL OWNERS

vs.

THE TOWN OF BROOKLINE.

These are nine suits pending in the Superior Court for the recovery of damages alleged to have been sustained by the owners of mill privileges, by reason of the taking of the water of Charles river.

After the Commissioners' award had been rendered, as set forth in last year's report, the cases were taken by appeal to the Superior Court, and at the October term, 1881, the preliminary question, whether the petitions had been filed within the time prescribed by law, was tried by agreement of counsel, in order to save the expense of a protracted inquiry into the question of damages, which would be rendered unnecessary by a decision in favor of the town on the preliminary question.

All the cases were tried together, and the jury returned a verdict against the town, on this preliminary question.

A motion for a new trial was then made, and argued in behalf of the town, and this motion was overruled.

The cases will now go to the Supreme Court, on the questions of law raised at the trial.

Should these questions of law be decided adversely to the town, so that no new trial can be had upon this preliminary question, the town will still have the right to a trial by jury, upon the question whether the petitioners have sustained any damages.

SECOND,—

THE TOWN OF BROOKLINE *vs.* CHARLES G. MACKINTOSH.

This is a bill in equity brought by the Selectmen, in pursuance of a vote of the town, passed at a town meeting held in November, 1880, for the purpose of restraining the defendant from corrupting the waters of Charles river at a point some 4,000 feet above the pumping station.

The case was reported by Mr. Justice Soule, to the full bench of the Supreme Court, and was argued in March, 1881, but no decision has been made by the Court.

THIRD,—

HENRY. H. RICHARDSON *vs.* THE TOWN OF BROOKLINE.

This was an action brought to recover back the sum of \$282.71, being the amount of taxes which the plaintiff alleged had been illegally assessed upon him.

The plaintiff abandoned his action without bringing it to trial.

FOURTH,—

JAMES McMAHON *vs.* THE TOWN OF BROOKLINE.

This was an action for damages for injuries alleged to have been sustained by the plaintiff, by falling on the ice upon the sidewalk on Emerald street.

The plaintiff claimed that his ankle was badly sprained, and that the injury was likely to be of a permanent nature. He set his damages at two thousand dollars.

The case has now been settled by the payment of three hundred dollars.

FIFTH,—

THE TOWN OF BROOKLINE *vs.* JOHN LANNON.

This was an action brought to recover \$68.52 paid by the town for the support of the defendant's wife, at the Danvers Lunatic Asylum, and was decided in favor of the town, and the full amount recovered and paid over.

Respectfully yours,

M. & C. A. WILLIAMS.

REPORT OF THE PROBATION OFFICER.

BROOKLINE, January 31, 1882.

To the Board of Selectmen :

GENTLEMEN,—I have the honor to submit my second annual report.

The whole number of cases taken on probation since the first of February, 1881, was twenty,—for the following offences :

| | | | |
|-----------------------|---|-------------------------------------|---|
| Drunkenness | 7 | Disturbance of the peace | 6 |
| Larceny | 1 | Violation of town by-laws | 1 |
| Assault | 3 | Vagrancy | 1 |
| Trespass | 1 | | |

Of this number, sixteen have been discharged, having complied with the terms of their probation ; one was surrendered for violation of the same, and sentenced to the House of Correction ; one left the town, and two are now on probation.

Respectfully, your obedient servant,

GEORGE F. DEARBORN,

Probation Officer.

REPORT OF THE SUPERINTENDENT OF STREETS.

OFFICE OF THE SUPERINTENDENT OF STREETS.
TOWN HALL, BROOKLINE, Feb. 1st, 1882.

To the Honorable Board of Selectmen:

GENTLEMEN,—I respectfully submit my sixth annual report of the work done and the expense incurred in the highway department, for the year ending January 31, 1882.

The amount appropriated at the annual meeting, for the support of highways, was \$16,000. It was all expended, and the details of expenditure are as follows:

| | |
|--|-------------------|
| Aspinwall avenue: gravelled near St. Paul street | \$53 50 |
| Beacon street: sundry repairs | 64 37 |
| Boylston street: sundry repairs | 64 13 |
| Brighton street: graded for new sidewalk; repaired | 107 12 |
| Brookline avenue: repaired | 36 75 |
| Carlton street: macadamized in part | 42 00 |
| Chestnut street: gravelled; re-graded in part | 695 81 |
| Cleaning streets, gutters and sidewalks | 2,306 68 |
| Cleaning street crossings | 192 24 |
| Colchester street: macadamized | 289 12 |
| Crossings: labor and materials for new crossings; re-paving other crossings | 474 77 |
| Crushing stone now on hand | 108 50 |
| Crusher: coal and other supplies and repairs | 68 41 |
| Cutting grass and weeds | 108 00 |
| Cypress street: gravelled in part and repaired | 151 17 |
| <i>Amount carried forward</i> | <i>\$4,762 57</i> |

| | |
|--|-------------|
| <i>Amount brought forward</i> | \$4,762 57 |
| Davis avenue : repaired | 19 25 |
| Dudley street : repaired | 144 01 |
| Engineering | 13 38 |
| Goddard avenue : bank wall re-laid ; gravelled in part | 254 77 |
| Gravel : cash paid for gravel and stone | 327 56 |
| Grove street : repaired | 53 25 |
| Gutters re-paved in sundry places | 83 45 |
| Harvard avenue : repaired | 30 31 |
| Harvard street : picked over and gravelled from Longwood avenue to Harvard square | 864 17 |
| Heath street : macadamized in part | 987 21 |
| High street : gravelled in part | 68 00 |
| Horses and stable : care and maintenance | 2,634 11 |
| Horses : cash paid in exchanging two horses | 405 00 |
| Ice : picking and removing ice from streets, etc. | 316 49 |
| Longwood avenue : fence rebuilt ; sundry repairs | 86 64 |
| Loose stones picked off | 89 67 |
| Morss avenue : old elm tree removed ; repaired | 22 75 |
| Miscellaneous work not included in other streets | 117 49 |
| Monmouth street and court : gravelled | 59 25 |
| Newton street : repaired | 192 25 |
| Park street : repaired | 21 00 |
| Pearl street : macadamized in part and gravelled | 173 81 |
| Pond avenue : gravelled, etc. | 187 76 |
| Paving around sewer manholes and gate boxes | 50 75 |
| Preparing material and sundry labor in gravel pits not charged on other streets | 397 13 |
| Pleasant street : gravelled | 206 00 |
| Prospect street : repaired | 13 12 |
| Pruning trees, etc. | 82 37 |
| Repairing sundry streets not elsewhere charged | 333 39 |
| Repairing and painting tree guards, signs, fences, etc. | 40 74 |
| <i>Amount carried forward</i> | \$13,037 65 |

| | |
|---|--------------------|
| <i>Amount brought forward</i> | \$13,037 65 |
| School street : repaired | 21 88 |
| Sewall street : gravelled in part | 55 25 |
| South street : repaired | 76 25 |
| St. Mary's street : repaired | 14 25 |
| St. Paul street : gravelled and repaired | 304 18 |
| Summit avenue : gutter paved and gravelled in part | 140 02 |
| Sidewalks : sundry labor on sidewalks | 159 06 |
| Sundries | 47 38 |
| Tappan street : two catch-basins with drains built, gutter paved and street macadamized and gravelled | 846 04 |
| Tools : repairs and sharpening : new tools, etc. | 344 15 |
| Walnut street : repaired | 26 25 |
| Warren street : two catch-basins built ; street macadamized and gravelled in places : side- walk graded and blasted | 499 73 |
| Washington street : macadamized in village and on railroad bridge ; gutter re-paved ; sundry repairs | 333 68 |
| Water pipe and sewer trenches repaired | 94 23 |
| Total amount expended, | <u>\$16,000 00</u> |

The coal-tar concrete placed on the Longwood bridge in the fall of 1880 proved worthless, and was removed in October last ; the experiment cost the Town nothing. It will be necessary, during the next year, to re-plank that part of the bridge which was not done in 1880.

I desire to call your attention to the fact that Washington street and Boylston street will need repairing during the coming season. These very much travelled thoroughfares are the widest in the town, and will require a very large quantity of crushed stone to put them in good condition. Re-building fences will also form a large item in our expenses

this year; and if the city of Boston shall finally decide to build its new high-service reservoir on Fisher Hill, and lay a thirty-inch main to West Roxbury through our streets, there will be a large quantity of good road material left on the line of the trench, which we should use on our roads instead of allowing it to be carried off. I mention these facts that they may have their proper weight in determining the amount to be appropriated for this department for the coming year.

THAYER STREET AND THAYER PLACE.

These streets were finished in May last and are now in good condition, and will need very little repairs for some time.

HORSES AND STABLE.

Two of the horses, mentioned in my last report as being unfit for the work required of them, were exchanged for younger horses. The nine horses owned by the town are in good condition, except one, which should be exchanged.

STREET CROSSINGS.

The street crossings in many places have been re-paved, and new ones have been laid in the following places :

Monmouth street at Monmouth court.

Marion street at Vernon street.

School street near Washington street.

Cypress place at Cypress street.

Pleasant street at Beacon street.

Francis street at Lawrence school.

Davis avenue at Thayer street.

Thayer street at Davis avenue.

Thayer street at Washington street.

Tappan street at Mr. Bowditch's, for which Mr. Bowditch has paid.

REMOVING SNOW.

Of this appropriation there was expended last winter \$1,196.67, and the balance, \$803.33, was expended this winter.

SIDEWALKS.

Edgestones were re-set in Perry street and several other places, and new edgestones were set on the following streets :

| | |
|-------------------------------------|---------------|
| Harvard street | 98 feet. |
| Morss avenue | 262 " |
| Juniper street | 430 " |
| High street | 497 " |
| Alton, corner St. Paul st | 40 " |
| Total | <hr/> 1,327 " |

New concrete walks were laid on

| | |
|-----------------------------|---------------|
| Brookline avenue | 802 sq. yds. |
| Emerald street | 140 " |
| Washington street | 11 " |
| Morss avenue | 259 " |
| Juniper street | 296 " |
| Harvard street | 103 " |
| Alton street | 25 " |
| St. Paul street | 15 " |
| Aspinwall avenue | 111 " |
| Carlton street | 139 " |
| Total | <hr/> 1,901 " |

The concrete walks were skim-coated on

| | |
|-----------------------------|---------------|
| Washington street | 419 sq. yds. |
| Park street | 170 " |
| Beacon street | 71 " |
| Prospect street | 148 " |
| Colchester street | 400 " |
| Harvard street | 34 " |
| Total | <hr/> 1,242 " |

Repairs were made on the concrete walks on Perry and several other streets.

New plank walks were laid as follows :

| | |
|----------------------------|------------|
| Heath street | 1283 feet. |
| Beacon street | 3224 “ |
| Marion street | 763 “ |
| Vernon street | 298 “ |
| Tappan street | 1819 “ |
| Warren street | 1778 “ |
| Cypress street | 587 “ |
| High street | 800 “ |
| Brighton street | 3910 “ |
| Pleasant street | 388 “ |
| Englewood avenue | 538 “ |
| Walnut street | 1023 “ |
| <hr/> | |
| Total | 16,411 “ |

The expenditures for sidewalks were as follows :

| | |
|---|------------|
| Repairing plank walks | \$662 05 |
| New plank walks | 2,341 95 |
| Edgestones and setting | 1,124 64 |
| New concrete walks | 1,153 82 |
| Skim-coating and repairing concrete walks | 557 83 |
| Gravel walks and sundries | 159 71 |
| <hr/> | |
| Total | \$6,000 00 |

CARE OF SEWERS.

An examination of the village sewer late in the fall, showed that the lower end was again filled up, from two to two and one-half feet in depth of all kinds of filth being held back, first, by the new main sewer, which crosses the village sewer at Brookline avenue, and second, by the bed of Muddy river, which is now two feet higher than the bottom of the sewer which drains into it. This trouble will continue until the

channel of Muddy river is deepened enough to allow the free passage of water from the sewer into it.

The channel along the railroad was cleaned out, and the catch-basins and culverts were kept cleaned, and in good condition.

The expense was divided as follows :

| | | | | | |
|---------------------------|---|---|---|---|-------------------|
| Catch-basins and culverts | . | . | . | . | \$862 25 |
| Railroad channel | . | . | . | . | 211 59 |
| Village sewer | . | . | . | . | 426 16 |
| Total | . | . | . | . | <u>\$1,500 00</u> |

CARE OF PUBLIC GROUNDS.

The plot at the junction of Boylston, Heath and Brighton streets, was enclosed with a neat curbstone, and the old drinking fountain was replaced with one of the Boston pattern, from which the water flows only as it is used. The usual work on the various public lots, and around the public buildings, was done,—the total expenditure being \$571.50.

COLLECTING ASHES.

The cost of collecting the ashes and dry dirt throughout the town, was \$985.14, exclusive of the value of the labor of the horses employed.

The customary schedule of property belonging to the department is appended.

Respectfully submitted,

MICHAEL DRISCOLL,

Superintendent of Streets.

REPORT OF THE INSPECTOR OF MILK.

The following persons have been granted licenses to sell milk for the past year, in the town of Brookline,—forty-one in all :

| | |
|-------------------------------|---------------------------------------|
| George W. Stearns, Brookline. | Patrick Murray, Brookline. |
| Hugh Bannigan, “ | Eben W. Reed, “ |
| E. W. Packard, “ | Hugh Murray, “ |
| Bernard Malone, “ | Edward Holleran, “ |
| Mrs. George Stitt, “ | William J. Griggs, “ |
| Margaret Donovan, “ | Thos. B. Griggs, “ |
| Henry N. Clark, “ | William Finney, “ |
| Andrew White, “ | C. A. McDonald, “ |
| James Shillady, “ | Margaret Hurley, “ |
| James Love, “ | James Hayes, “ |
| Bridget Malony, “ | Daniel H. Rogers, “ |
| Miss Julia Hayes, “ | Johanna Conway, “ |
| Levi W. Hastings, “ | John S. Bond, “ |
| Alex. McCullough, “ | Frank A. Dow, “ |
| E. J. Curtis, “ | J. & R. English, Boston, (J. Plains.) |
| Solomon Burt, “ | John Gerraherty, “ |
| James Lynch, “ | N. M. Wright, Cambridge. |
| Margaret Roach, “ | John Kane, Newton. |
| Brown Bros., “ | William Wyman, Waltham. |
| Nelson Bros., “ | John W. Stearns, “ |
| James Lenney, “ | |

The statute requiring milk dealers to be licensed is a valuable one, and has produced quite satisfactory results. But few complaints have been made of the quality of milk sold, and no prosecutions have been made.

Respectfully, etc.,

ALONZO BOWMAN,

Inspector of Milk.

REPORT OF THE AGENT OF THE BOARD OF HEALTH.

ABATEMENT OF NUISANCES.

During the year the board has procured the abatement of more than twenty nuisances. There have been two prosecutions for non-compliance with the orders of the board.

A number of houses have been inspected as to their sanitary condition, at the request of the owners or occupants.

REMOVAL OF HOUSE-OFFAL.

A contract was made and executed with Francis Mealey, for the removal of house-offal for the period of one year, from May 1st, 1881, the contract being the same as that of 1880, viz: said Mealey to receive \$250.00 for his services.

LICENSES.

Twenty licenses have been granted and renewed for the collection of grease, bones, etc.

On July 5th J. D. Gutterson was licensed as funeral undertaker in place of T. S. Pettengill, deceased.

NUMBER OF DEATHS DURING THE YEAR.

The number of deaths within the town is one hundred and forty-one, against one hundred and twenty-three last year. Ten were from typhoid fever, seven from diphtheria, four from membranous croup, and one from scarlet fever.

A weekly return of the deaths is made to both the National and State Boards of Health.

CONTAGIOUS DISEASES.

There have been reported during the year ending December 31, 1881, but five cases of scarlet fever, twenty-six cases of diphtheria and one of small-pox, occurring as follows :

| | SCARLET FEVER. | SMALL-POX. | DIPHTHERIA. |
|-----------------|----------------|------------|-------------|
| January . . . | 0 | 0 | 1 |
| February . . . | 0 | 0 | 3 |
| March . . . | 1 | 0 | 5 |
| April . . . | 3 | 0 | 5 |
| May . . . | 0 | 1 | 3 |
| June . . . | 0 | 0 | 0 |
| July . . . | 0 | 0 | 1 |
| August . . . | 0 | 0 | 2 |
| September . . . | 0 | 0 | 1 |
| October . . . | 1 | 0 | 4 |
| November . . . | 0 | 0 | 0 |
| December . . . | 0 | 0 | 1 |
| | <hr/> 5 | <hr/> 1 | <hr/> 26 |

The cases of diphtheria occurred in the following localities :

| | |
|---|----------|
| Winchester street | 4 |
| Tappan street | 3 |
| Prescott street | 4 |
| Sewall street | 3 |
| School street | 2 |
| Linden place | 1 |
| Davis avenue | 1 |
| Cypress, near Chestnut street | 1 |
| Boylston street, in the village | 1 |
| Brookline avenue, corner Pearl street | 1 |
| Park, near Marion street | 2 |
| Chapel Station | 1 |
| Clyde street | 1 |
| Carlton, corner Ivy street | 1 |
| | <hr/> 26 |

The following table shows the number of cases of scarlet fever and diphtheria reported during the last five years :

| | | | | SCARLET FEVER. | DIPHTHERIA. |
|------|---|---|---|----------------|-------------|
| 1877 | . | . | . | 46 | 29 |
| 1878 | . | . | . | 15 | 19 |
| 1879 | . | . | . | 16 | 12 |
| 1880 | . | . | . | 17 | 25 |
| 1881 | . | . | . | 5 | 26 |

SMALL-POX.

In May a case of small-pox occurred in a boarding-house in Harvard square. The patient, a young Irish servant-woman, had but lately come to this country and had been in Brookline, when taken ill, only a few days. She was immediately removed to a small house on Heath street, which was previously vacant, but then fitted up for the purpose, provided with nurses, etc. All precautions were taken to prevent a spread of the disease and fortunately no other cases occurred. The small house on Heath street, which was used as a pest-house, was afterwards leased for the remainder of the year.

Should a number of cases of small-pox occur at the same time and it be desirable to remove them, it would be absolutely impossible to do so, as the house is too small to accommodate more than one, or at most two. The town should be provided with a more suitable building for the purpose.

Small-pox now prevails to a greater or less extent in more than twenty of the States and has been the cause of more than 4,000 deaths during the last year. In view of the fact that cases are liable to occur at any time in our own community, the importance of thorough *vaccination* and *re-vaccination* can not be overestimated.

TYPHOID FEVER.

During August, September and October, typhoid fever again prevailed as an epidemic, but unlike that of 1879, the

cases with very few exceptions were confined to certain localities, namely, that part of the town known as the "Marsh" and "Kimball's Farm."

Not less than thirty cases and six deaths occurred on Brookline avenue and a part of Pearl street, which runs parallel to and only a few rods from it.

MUDDY BROOK.

The board in connection with the Boston Board of Health, employed J. W. Steere, as during a number of previous years, to tend the tide-gate on Brookline avenue, from the beginning of May till the first of November. The stream is exceedingly filthy, owing to the presence of sewage matter, hence the importance of keeping the flats covered with water as much as possible during the hot weather.

SPECIAL ORDERS.

The special orders passed in 1880, relating to the removal of dead bodies of persons in public vehicles, the emptying of vaults, the removal of manure from the livery and horse-car stables, were re-issued last year. The order first passed in 1876, requiring that all cases of diphtheria, scarlet fever and small-pox shall be reported to the board, still remains in force.

G. K. SABINE, M. D.,

Agent Board of Health.

REPORT OF THE BOARD OF ENGINEERS.

To the Selectmen of the Town of Brookline :

The Fire Department of this town consists, the same as last year, of three hose companies and one hook and ladder company. The companies occupy the same quarters as last year. The Longwood company occupy the property of Dr. Lawrence, as tenants-at-will. The Board of Engineers would recommend that some steps be taken by the town to secure permanent quarters for that company, if it is to be retained in service.

APPARATUS.

The apparatus is in good condition, with exception of the Steam Fire Engine, which needs some few repairs ; but at the same time, the steamer is ready at a moment's notice to perform her part.

The board would recommend the purchase of a Chemical Horse Engine for Longwood, to take the place of the hose company, which the Engineers think would be a better protection for that part of the town. The first cost of engine, horses, harnesses, etc., would be about twenty-five hundred dollars. The cost of maintaining this branch of the department, exclusive of the rent of building for storing engine and stabling horses, would be about twelve hundred and fifty dollars per year. If the town will purchase a watering-cart,

the driver and horses might be used in watering the Longwood district, for which the town now pays one hundred dollars per month. The cost of maintaining the hose company the past year was five hundred dollars, and this amount must be increased rather than diminished. Therefore, we think if the two things are combined the expense would be no greater than it now is, and the efficiency of the department greatly increased.

We therefore recommend that the sum of twenty-five hundred dollars be appropriated for the purchase of a chemical engine and a pair of horses and harnesses, and other necessary equipments.

HORSES.

The horses number the same as last year; and as in years previous, have been used watering two districts during the warm weather, or in fact from April 1st until December 1st.

BUILDINGS.

The buildings under the charge of the Engineers need some repairs,—new troughs for washing hose in both houses, and partially new floor in upper house, and some oiling and painting.

HYDRANTS AND RESERVOIRS.

We reported last year one hundred and sixty-four hydrants and nine reservoirs. The Water Board the present year have caused six additional hydrants to be placed on the line of their pipes.

HOSE.

We have at present 3600 feet of cotton hose in good condition, and 1500 in fair condition to be used only under light pressure.

TELEPHONE.

As stated in last year's report, the engine houses are connected with the telephone lines. As we have no fire-alarm telegraph, this has proved to be of great value as a means of communication with the department, but with an expenditure of two hundred dollars the system could be greatly improved. The alarm in the engine houses is given from the central office by signals struck upon the small bells attached to the transmitters. As these bells were never intended for this use they do not give sufficient alarm, and should be replaced by the regular fire-alarm gong and striker. A separate wire should also be run between the engine houses, so as to make an independent circuit. This we are informed can be done for the sum named above.

The charge for the use of the telephone the past year was six dollars per month; the price having been changed, it will now be eight dollars per month.

The Engineers would recommend that the sum of \$300 be appropriated to place the additional fixtures in the engine houses and maintain the use of the telephone.

APPROPRIATIONS.

Last year the sum of \$7,400 was appropriated for the current expenses of the Fire Department, watering two districts and care of the police horses, — which the Engineers found insufficient to maintain the department. Consequently they had to notify the Selectmen in May, that the Longwood company would have to be disbanded, and a number of much needed repairs on houses would have to be omitted, in order to keep within the appropriation.

This year the Engineers would recommend that the sum of \$8,500 be appropriated for the current expenses of the Fire Department as now constituted, watering two districts, care of two police horses, and inside repairs of houses and fire apparatus.

| | |
|--|------------|
| For current expenses of the Fire Department as now constituted, watering two districts, board and care of two police horses, inside repairs of houses and repairs of fire apparatus . . . | \$8,500 00 |
| For purchase of chemical engine, horses and equipments | 2,500 00 |
| For telephone, additions and maintenance . . . | 300 00 |

CONCLUSION.

To the Committee on Fire Department for their assistance, the Chief of Police and the men under his charge for their help in maintaining order at fires, and the officers and men under our charge for their promptness in responding to alarms of fire, their conduct while on duty and the courtesies shown us, our thanks are due.

(Signed)

REPORT
OF THE
Trustees of Walnut Hills Cemetery.

OF THE

The Trustees of Walnut Hills Cemetery herewith present their annual report for the year ending January 31, 1882.

The grounds have been well cared for during the year, and have been greatly improved in appearance.

A large amount of work has been done, in trenching and grading avenues and paths, and also in blasting out stone.

A statement in detail of the work done is as follows :

| | | | | |
|----------------------|------------------------------|---|---|-----|
| Total number of lots | trenched and graded | . | . | 122 |
| " | " " " past year | . | . | 11 |
| " | " sold | . | . | 80 |
| " | " " past year | . | . | 9 |
| " | single graves sold past year | . | . | 12 |
| " | headstones erected | " | . | 3 |

INTERMENT RECORD.

| | | | |
|---|---|---|-----|
| Total number of interments as per last report | . | . | 174 |
| “ “ “ for the year | . | . | 21 |
| “ “ “ in single graves | . | . | 8 |
| “ “ “ in private lots | . | . | 13 |
| Removals from other cemeteries | . | . | 10 |
| Of the above, deposited in receiving tomb | . | . | 3 |

The general expenses of the cemetery, including improvements and care of grounds, have been as follows :

| | | |
|--|------------|----------------|
| To cash balance in treasury from last year | \$437 49 | |
| received from sale of wood | 2 50 | |
| received from sale of grass | 25 00 | |
| received from sale of lots and graves | 1,394 75 | |
| received from Church of Advent, grading | 54 85 | |
| | <hr/> | \$1,914 59 |
| By cash paid for labor and materials | \$1,528 26 | |
| loaned Perpetual Care Fund | 24 75 | |
| | <hr/> | \$1,553 01 |
| Balance in treasury | | \$361 58 |
| Due from Perpetual Care Fund | \$24 75 | |
| " on account | 199 00 | |
| | <hr/> | \$223 75 |
| Total | | <hr/> \$585 33 |

PERPETUAL CARE FUND.

| | | |
|--|------------|------------|
| To cash balance in treasury from last year | \$335 75 | |
| received from sale of lots | 639 50 | |
| borrowed, general expense fund | 24 75 | |
| | <hr/> | \$1,000 00 |
| By cash paid Massachusetts Hospital Life Insurance Company, policies No. 4529 and 4950 | \$1,000 00 | |
| | <hr/> | |
| Amount invested in Massachusetts Hospital Life Insurance Company | | \$6,200 00 |

INCOME FROM PERPETUAL CARE FUND.

| | | |
|--|----------|----------|
| To cash balance in treasury from last year | \$179 73 | |
| received interest on investment in policies of Massachusetts Hospital Life Insurance Company | 208 11 | |
| | <hr/> | \$387 84 |
| By cash paid for material and care of lots | | 142 00 |
| | | <hr/> |
| Balance in the treasury | | \$245 84 |

In July, Mr. George Craft was appointed Superintendent for the remainder of the year, to fill the vacancy caused by the death of Mr. T. S. Pettengill. The Trustees feel that to Mr. Pettengill, who, as Superintendent from the time the cemetery was opened until his decease, showed faithfulness and ability in the discharge of his duties, is due in a great measure the success with which the grounds have been developed and the great improvement made in their appearance.

CHARLES H. DREW,
Chairman ex-officio.
 CHARLES S. SARGENT,
 THEODORE LYMAN,
 CHARLES H. STEARNS,
 WALTER C. CABOT,
 DESMOND FITZGERALD,
 WILLARD A. HUMPHREY,
Trustees.

REPORT

OF THE

OVERSEERS OF THE POOR.

THE board organized by choosing Charles H. Drew, chairman, and Charles D. Lincoln, clerk.

The following table gives the names of persons regularly relieved :

- 1 Baker, Ann M., daughter of James Mitchell, deceased.
She has been at the Insane Asylum, Tewksbury, since May 22, 1879, at \$3 per week.
- 5 Barrett, James, children of,— four boys, at House of the Angel Guardian, at \$2 per week; James, aged 15, left the institution Oct. 11, 1881, to take care of himself; one girl at St. Vincent Asylum, at \$1.50 per week. The father has agreed to reimburse the town to the extent of \$10 per month, but has not yet paid anything — he is out of the State.
- 3 Burke, John, aged 11; Katy, aged 9; Mary, aged 7,— children of Thomas or Michael Burke, deceased. They are boarded with Martin Costello at \$15 per month for the three.
- 1 Casey, Mary, invalid, boards with B. C. Clark. We pay \$8 per month for board.
- 3 Casey, Nellie, widow of Thomas, and two young children. We pay her \$6 per month, and supply her with fuel, and pay her rent.

- 2 Collins, Mary, widow of Peter, and one invalid child of brother, James Kilnan. She works for her relief, \$1.75 per week, and her fuel.
- 1 Collins, Michael, committed to Danvers Lunatic Hospital, April 29, 1881. Paid State for his care and support, \$123.92.
- 6 Conway, Jane, and five children — wife of Patrick, who has deserted them. We have paid for food since Nov. 21, \$3 per week, and some fuel.
- 1 Conway, John. We paid for his care, at Carney Hospital, at \$5 per week, until July, 1881, when he went to the Home of the Little Sisters of the Poor.
- 2 Conway, John F., 16, and Mary, 11, children of John, above-named, are boarded with their aunt, Mrs. Conway, at \$3 per week. John went to work, Dec. 28, and takes care of himself.
- 2 Cook, Richard, and wife Eliza, 62 and 61 years old. Relieved to the amount of \$1 per week; we also furnish rent and occasional fuel.
- 2 Corcoran, Ann, widow of Henry, and one child. We have paid \$3 per month for her rent until March 1, when it ceased, also \$10 for doctor's bill. Her husband died March 10, 1879.
- 2 Corcoran, Michael, aged 72, and wife. We give them \$2 per week and fuel and rent.
- 5 Coughlin, William, and wife and three children. She is authorized to work \$2 per week for relief and for fuel, and we pay rent. He is disabled by rheumatism.
- 1 Crawley, Mary, aged 64, boards with Mrs. Bridget McMahon at \$8 a month.
- 5 Cronan, Mrs. John, and four children. She has been allowed to work \$1.50 per week for relief.
- 1 Curry, Hannah, aged 64, widow of James. She boards with her son-in-law, Thomas Finn, at \$3 a month.

- 1 Dalton, James, aged 15, son of James and Mary, afterwards wife of Thomas Burke. He boards with Mrs. Bolan at \$8 a month.
- 1 Dolan, Mary E., daughter of Thomas, deceased; she is lame, lives in Boston, and we pay her board, \$2 a week.
- 5 Donovan, Julia, widow of Michael, and four children. We pay for food, \$2 per week; fuel, and rent.
- 1 Fallon, Eunice, child of Michael; lives in Lawrence, and we paid that city last year for her support \$48.
- 3 Finnegan, Ann, wife of Arthur, who has deserted her and two children. We allow her \$1 a week.
- 1 Flanagan, Mary, widow of Joseph, aged 88. She boards with her son, Martin, at \$6 a month.
- 5 Fleming, Patrick, and wife and three children. We occasionally allow \$2 a week, if the same is worked out; ceased June 8.
- 1 Ford, Sarah A. She is boarded at the Asylum for Chronic Insane at Worcester. We paid last year for her \$188.86.
- 3 Fox, Thomas: his three children sent by Boston Overseers to City Almshouse, Nov. 14, 1880. On the 24th March, 1881, we placed them in St. Vincent's Asylum, where they staid till Oct. 9, when their father took them home. We have paid on their account \$255.27.
- 1 Gleason, Ann, aged 66, widow of James. She boards with her daughter, Bridget Sullivan, at \$8 a month.
- 2 Haley, David, and wife, about 72 years of age, and unable to work. She was allowed \$1.50 a week for relief until Oct. 17, when it was reduced to 75 cts., as they have a daughter able to support them. We supply rent.
- 1 Hall, Mrs. James, \$1 per week, fuel, and rent.
- 2 Hill, Eliza, widow of Thomas, and one child. We give her \$1.50 a week, also fuel, rent and milk.

- 4 Holdsworth, Ann, and three children. Settled in North-bridge, which town reimburses us \$2 per week.
- 1 Houlihan, Mrs. John. We allow rent, \$3 per month, and some fuel.
- 2 Hogan, John, and wife, aged 80. We paid for their food \$8 a month, and their house-rent and fuel till Oct. 1. Mr. Hogan died Sept 2. Mrs. H. now with her children.
- 2 Horregan, Bridget, widow of Michael, and one daughter, 13 years old. We allow her to work \$1 a week, and supply fuel and pay rent.
- 2 Jewett, Benjamin N., aged 73, and wife. Rent paid and some fuel. Mr. Jewett died in March.
- 5 Kelly, Mrs. Redmond, widow, and four children; paid towards rent, \$4 per month.
- 1 Kennedy, Ann, wife of James. She boarded at Dominick Gallagher's, at \$6 a month, until sentenced to Sherburne prison
- 3 Killinan, Fanny, widow of John, and two children. She works out \$1.50 a week for relief and fuel. We have also paid her rent.
- 1 Lamb, Mary, widow of Lawrence. The City of Boston admits her settlement. We allow her to work \$1 a week. The city reimburses us.
- 4 Liddy, Patrick, aged 7, John, 10, at the House of the Angel Guardian, at \$2 a week each; Joanna, 12, Mary Jane, 13, at St. Vincent's Asylum, at \$1.50 a week each — are the children of John Liddy; they have no mother. Mr. Liddy agrees to pay towards their support \$3 per week from Jan. 1, 1882.
- 1 Lynch, Annie, child of Bridget, who is at St. Vincent's Asylum, at our expense.
- 4 Lynch, Mary, wife of John (daughter of Batt. Cusick), and three small children. She has been deserted by her husband, and we allow her \$1 a week and fuel, rent and some medical care.

- 10 Lyons, Patrick, and wife and eight children. We allowed rent, \$4 a month, to June 1.
- 2 Madden, Mary, widow of Charles, and one child. We allow Mrs. Madden \$1 a week, her fuel, and pay rent. Madden, Daniel, step-son of the above, was boarded at the House of the Angel Guardian at \$2 per week, but left to go to work Oct. 28.
- 5 Mangan, Jane, Taunton Lunatic Hospital, at \$3.25 a week. We pay Bridget Maloney \$4 a month as house rent for her four children.
- 1 McCarthy, Julia, widow of Jeremiah, aged about 66. We pay \$7 a month for her board.
- 2 McDonald, Thomas, two minor children of, boarded with their uncle, Mr. O. Hillern, at \$12 a month. Hugh went to live with Mr. Choate, in Southboro, June 1, and Thomas went to Martin Welch's in Lincoln, April 1, 1881, and are now self-supporting.
McGrath, Michael, has a military settlement, and is boarded at the Northampton Asylum for the Insane. We paid last year \$178.51.
- 3 McNamara, Ellen, widow of Thomas. We pay for three step-children, \$2 a week, commencing Dec. 21, and fuel, and rent.
- 1 McNamara, John, at the House of the Angel Guardian. We paid for his board \$2 a week till discharged, Nov. 5, 1881.
- 4 Moran, Mrs. Thomas, widow, with three young children, \$2 per week since June 1, and rent, and fuel.
- 1 Morrissey, Bridget, aged 72; \$1 a week and fuel.
- 1 Mountain, Ellen, widow of Patrick. We allow \$1 a week, fuel and rent.
- 3 O'Hare, Ellen, widow of Michael, and two children. They are Boston paupers. We allow her rent. Boston reimburses us.

- 5 Pottle, Mrs. John S. and four children. Mr. Pottle has again abandoned his family. We have paid Boston \$48.66, and Jan. 23, 1882, agreed to pay \$4 per week for board of children with their grandmother.
- 6 Powers, Johanna, widow of Edward, and five children. We allowed her to work out \$1.75 a week, reduced to \$1.25, Aug. 17, and we pay her fuel and rent.
- 1 Powers, Mary, widow, aged 63. We pay her rent and fuel occasionally.
- 3 Quinlan, Mary, widow of Thomas, and two children. They are Boston paupers. We supply rent, but the family mainly support themselves. Boston reimburses us.
- 4 Quinn, Mrs. Lawrence. Quinn is in Dedham jail. His family received \$2 per week, and rent from March 16, 1881, to April 27, when they went to Worcester. We now allow through the Worcester Overseers, \$3 per week. Mrs. Quinn is disabled with rheumatism.
- 3 Ryan, Martin, wife and two children. Boston paupers. He died of consumption, January 3, 1881. We have allowed them \$2 a week, fuel and rent. Boston reimburses us.
- 1 Sheehan, Hannah, \$1 a week and rent, and some fuel; 62 years of age.
- 1 Tobin, Bridget, aged 62. She is blind and unable to work. We allow her \$8 a month for board.
- 1 Ward, Sarah, aged 60. We pay rent, since Oct. 1, \$4 per month.
- 6 Waldron, Mary, widow of Thomas, and 5 children. \$2 per week, commencing Oct. 19, fuel and rent.

154 persons have been regularly relieved at some time during the year. Boston pays for ten and Northboro for four; two have died and fifteen have ceased to receive aid—leaving 123 receiving regularly relief at the sole expense of the town at the date of making this report.

The following table gives the name, etc., of those whom we have occasionally relieved during the last year :

- 2 Blake, Samuel, and wife, \$2.80 in 1881 ; lives in Boston.
Burke, Bridget, State pauper, went to Mass. General Hospital, Sept. 3, with typhoid fever, where she died. We paid the hospital \$13, Dr. Sabine for medical attendance \$6, and for burial \$12. The State has repaid us the last item.
- 1 Cox, Anne, a small-pox patient, and State pauper. See following.
- 5 Crotty, Mary, and four children. They live in Boston, and Overseers there furnished relief to the amount of \$14.40.
- 2 Denehy, Thomas, and wife. Live in Dedham. We paid that town last year \$41.80.
- 4 Hillern, Owen, has been relieved weekly from \$2 to \$2.50, from Nov. 1 to Feb. 1, on account of the death of his wife and the illness of four children with typhoid fever.
- 5 Keenan, John, and wife and three children. We gave him \$2 a week until May 24 — worked out.
- 2 Manahan, Daniel, and wife, were aided \$2 per week from Dec. 2, to Jan. 18, 1882, when his children assumed their support.
- 1 Murray, Ann, daughter of Patrick. She went to Tewksbury Almshouse, May 3, for eight weeks. We paid for her support there, \$33.14 ; also for support at Dedham Almshouse, \$3, and at Boston City Hospital \$9. She is now in Sherburne prison.
- 6 Powers, James, and wife Catherine, and four children ; has a military settlement and liver in Lawrence. We paid last year for their support and medical attendance \$30.
- 1 Reardon, Catherine, lives in Boston ; paid the city \$8.49 on her account.

- 2 Roy, Joseph, and wife, are allowed to live in the Town house on Heath street.
- 1 Salmon, Mrs. Thomas, formerly Kate Donovan, was deserted by her husband in July. We paid the New England Hospital for her sickness \$10, and for burial — of her infant \$5.

32

This gives 32 as the number of persons occasionally relieved, instead of 70 for the previous year. We require some equivalent in work in every case for the amount of general relief afforded, when the applicant is able to work.

The following report shows the labor which has been performed by the female poor under the direction of Mrs. Cabot and Mrs. Codman :

| | | | | |
|--|---|---|----|-----------|
| Balance in cash on hand Feb. 1, 1881 | . | . | \$ | 54 |
| Cash received from sale of garments | . | . | | 133 94 |
| Massachusetts General Hospital, for sewing | . | | | 36 02 |
| New England Hospital | . | | | 11 50 |
| Private individuals | . | . | | 17 30 |
| | | | | <hr/> |
| | | | | \$199. 30 |
| Cash paid for 1,281 $\frac{1}{4}$ yards cotton | . | . | | \$112 07 |
| 100 $\frac{1}{4}$ yards calico | . | . | | 5 90 |
| thread and buttons | . | . | | 2 50 |
| 12 pairs boots and shoes | . | . | | 14 55 |
| care of office, and fuel | . | . | | 11 25 |
| cutting out work | . | . | | 38 00 |
| | | | | <hr/> |
| | | | | \$184 27 |
| Amount paid to the town | . | . | | 15 00 |
| Balance on hand | . | . | | 03 |
| | | | | <hr/> |
| | | | | \$199 30 |

| | |
|--|----------------|
| Garments remaining on hand Feb. 1, 1881 | 8 |
| Garments made for the town from Feb. 1, 1881, to Feb. 1, 1882 | 495 |
| | <hr/> 503 |
| Garments sold | 496 |
| Garments given away | 7 |
| Garments remaining on hand | 0 |
| | <hr/> 503 |
| New boots remaining on hand Feb. 1, 1881 | 1 pair. |
| New boots purchased | 12 pair. |
| | <hr/> 13 pair. |
| New boots given away | 13 pair. |
| Sheets made for Massachusetts Hospital | 309 |
| Pillow cases made for Massachusetts Hospital | 24 |
| Slippers made for New England Hospital | 46 pair. |
| (From materials supplied by the hospitals.) | |
| Second-hand garments received and distributed | 369 |
| hats | 32 |
| boots and shoes | 77 pair. |
| stockings | 133 pair. |
| comforter | 1 |
| Number of women employed | 16 |
| The appropriation for support of poor was | \$7,000 00 |
| With what might be reimbursed us from the state, other towns and cities, etc., which amounted to | 648 32 |
| | <hr/> |
| Total | \$7,648 32 |
| We have expended for the support and relief of the poor | \$9,135 32 |

But of this amount no less an expense than \$918.30 was incurred in the leasing and furnishing of a building for a

small-pox hospital, and the support, care, nurse and physician of Ann Cox, a patient therein, and a State pauper, a sudden and unexpected event, the cost of which fell of necessity to the poor appropriation. The bill in this case has been rendered to the State Board of Health, Lunacy and Charity, and there is a good prospect of its being paid to the town.

The sum of \$2,137.74 of the expenditure for 1881, was on account of 25 children supported for the whole or part of the year; 9 of them in private families, and 16 in Institutions and Almshouses. Some of these are orphans, some are motherless with no female relatives to care for them, others have been deserted by their parents, and others still, are the children of drunken fathers or mothers.

ALMSHOUSE.

The Overseers present the following report upon the matter of establishing an Almshouse, referred to the board by vote of the town:

The unsatisfactory results of the system of out-door relief for the poor of the town which have come to the knowledge of the present Board of Overseers, have forced them to consider the advisability of building an almshouse, and to ask themselves whether, by adopting a system of in-door relief, they should not secure greater comfort for those necessarily dependent, and stimulate the idle and shiftless to greater exertions for their own support.

In looking at this question we must remember that Brookline is no longer what it was seventy, or even fifty years ago,—a country town with only a few poor families in its borders, whose wants were real and simple.

With the increase of population all the conditions of our poor have changed and become much more complicated. As we remain independant of Boston, we have none of the assistance in disposing of our poor which accrues to the suburban towns. Roxbury, Dorchester, Jamiaca Plains, Brighton and Charlestown, can relieve themselves of a certain class of their paupers by sending them to Deer or Rainsford Islands, while it is well known to the Overseers of the Poor in Boston, that paupers move to Brookline in order to avail themselves of our more lavish and more agreeable form of relief.

The fact that as long as we have no almshouse the town is liable for house rent for its paupers, makes Brookline a most attractive residence for that undesirable class.

In comparing the statistics of pauper expenses in the towns in the state which have nearly the same population as Brookline, (in each case having a larger number of paupers than we, but which are provided with almshouses,) we find the following results for the year ending March, 1881 :

| TOWN. | PAUPERS. | POPULATION. | EXPENSES. |
|----------------|----------|-------------|------------|
| Brookline . . | 126 | 8,053 | \$8,394 00 |
| Natick . . | 142 | 8,480 | 4,445 00 |
| Plymouth . . | 220 | 7,094 | 6,531 00 |
| Marblehead . . | 160 | 7,467 | 6,994 00 |
| Peabody . . | 194 | 9,028 | 7,794 00 |

In administering the Poor Fund, we come at once upon the difficulties belonging to cities : A great number of applicants, a disposition to imposition, a lack of the spirit of independence, extortionate demands and an alarming neglect of the commonest duties of parents to children, and children to parents.

We also find, through our experience with State paupers, that the man who will not support his family while there is any hope of their being supported at home by out-door relief, will find the means to do so, when the alternative proposed to him is the State Almshouse ; or the woman who

cannot afford to "keep" her old mother in her own house, will do so when it is proposed to send her to the Almshouse.

We know so many instances of this kind, that we are forced to believe that the poor of this town need the dread of "going to the house," as they call it, held before them in tangible shape, to stimulate them to proper exertions for their own support, and to a frugality of life which would at least partially provide for their old age.

A still more pressing difficulty is the unsatisfactoriness of any provision we are able to make for the children of our paupers, and the crying need of some provision for reformatory and industrial education, such as might prevent their following in the footsteps of their parents, or sinking even below their level.

The poor-law as it now stands, obliges the town to support, for an indefinite term of years, any needy person and his family who can prove that he has paid his poll-tax for three years out of a residence of five. The plea that there is no work to be had is a sufficient one for making the demand, and men with large families shamelessly appeal to the town for support during the winter, who might, had they been provident during the summer, when work is abundant, have secured themselves against want.

The pauper knows how to avail himself of every inch of the law, however ill he may be informed on other topics.

The husband deserts his wife and children, knowing that his three paid poll-tax bills will oblige the town to support them.

The son who is able to earn good wages, leaves the town, throwing his old mother, whose settlement is certain, upon the care of the Overseers.

The termagant drives her husband from his home, and bringing his tax bills to the board, throws the support of her children upon the town, and goes to live out, which she greatly prefers.

It is such cases as these, which are *not* imaginary, that the Overseers believe would be best resisted by an almshouse, and in various forms they are constantly occurring.

In looking at the experience of other large towns and cities we find that they have universally decided against out-door relief. Brooklyn, N. Y., abandoned it in 1878, and the statistics show not only that there is no increase in the expenditure for the poor, but that the numbers in the almshouses and hospitals are certainly smaller than before the change. It is also found that the charitable societies in the city have expended less.

| | |
|---|-------------|
| No. of paupers in Almshouses in 1878, | 1,371 |
| “ “ “ 1881, | 1,171 |
| Expenses of Charitable Societies in 1878, | \$21,458 00 |
| “ “ “ 1881, | 17,358 00 |

The same results are found in Philadelphia, where out-door relief was given up in 1879, and even taking into account the improvement in the times during those years, these facts show that the change was an economy rather than an extravagance.

In England, the Commissioners on the Poor Laws condemned out-door relief in their report of 1834, nearly fifty years ago, and gave, in substance, these reasons for their opinion: *First*,—That it saps habits of industry. *Second*,—That it discourages habits of frugality. *Third*—That it encourages improvident and wretched marriages. *Fourth*,—That it produces discontent.

In the report of 1874, of the Brixworth Union, England, we find the following remarks, which are much to our point:

“It will be said, with truth, that figures do not represent the whole of the case. They may show a satisfactory balance-sheet to the rate-payers, but tell nothing of the moral effect upon the poor; and the reduction in rates and pauperism may be due to an increased amount of suffering to the poor, which we have no right to inflict.

“With the assistance of the relieving officer, each case that was struck off the out-door relief list has been watched, as far as it was possible to do so, and the subsequent condition and manner of living carefully recorded. During the year 1873, out-door relief has been discontinued from 241 paupers. Of these, two have died, three have accepted the offer of the house, twelve have left the district, nine are maintaining themselves, with occasional help from relatives, fifty-five are supported by relatives who seem well able to do it, and one hundred and sixty are entirely supporting themselves in the district; and of these, only seven appear to have any difficulty in doing so, while four out of the seven are cases manifestly requiring relief, but who persistently refuse to go to the work-house.”

Many other statements to the like effect might be quoted from the English reports, and it does not seem unfair to compare the condition of our poor with that of their country districts.

We are aware of the difficulties in administering an almshouse, and of the liabilities to abuse and extravagance which exist in any such institution; but we believe that the dangers from this source are not inherent, and that they may be guarded against by sufficient vigilance, and are far less than those we are encountering every day under our present system. In fact, we believe that the same amount of time and thought now expended by the Overseers of the Poor, would secure a faithful administration, and much better results, were it applied to a system of in-door relief.

We do not hesitate to say that in spite of every effort on our part to make careful inquiries in each case, and to apply the work-test as far as lies in our power, we believe that the system of out-door relief is encouraging the growth of pauperism in the town.

The board would therefore recommend for adult paupers, an almshouse provided with a hospital ward for the sick, and

with a work-test for able-bodied paupers. We are at present wholly without proper arrangements for the sick and helpless, and have been unable, even at heavy expense, to make suitable provisions during the past year, for cases of suffering for which we were responsible.

This leaves unprovided for a large number of children now dependent on the town, whose education is the heaviest responsibility to be met by the Overseers. The law no longer allows them to be detained in almshouses, and forces us therefore to make other provisions for them. We are dissatisfied with such homes as we can find for them in private institutions. They receive no industrial education or other training to fit them for self-support, and are liable to be thrown back on our hands at sixteen years of age, wholly unable to provide for themselves.

There are various methods of meeting this difficulty, which should be carefully considered.

It is perhaps enough to say at this time, that under the present system, many of the pauper children of this town are growing up, not only to swell the number of the idle and shiftless, but to join the ranks of the drunkard and the criminal.

Several different localities have been examined in the town, as to their availability for a site for an almshouse, and there can be but little doubt that a suitable lot of land could be purchased on the outskirts of the town, for from \$300 to \$500 per acre, and that a plain, substantial house, capable of accommodating some twenty-five persons, and one that could be enlarged, or would answer as a wing to a much larger building, should it be necessary so to enlarge at a future time, together with necessary out-buildings, could be erected at a cost not exceeding \$7,000. Under the vote of the town, the Overseers of the Poor have not thought it necessary to

take any action as to recommending any particular locality or plan of building, but they have no doubt but that the appropriation of \$12,000 would be ample to cover all the expenses as regards the cost of real estate.

REPORT

OF THE

WATER BOARD.

The Water Board herewith submit their annual report for the year 1881.

At the meeting for organization, held March 25th, Oliver Whyte was elected chairman. There has been no change in the officers and employés since the last report.

The terms of service for which the several members of the board were elected, will expire as follows :—

| | | | | | |
|-------------------|---|---|---|---|-------|
| Francis Hunnewell | . | . | . | . | 1882. |
| Oliver Whyte | . | . | . | . | 1883. |
| William J. Griggs | . | . | . | . | 1884. |

STREET-MAINS.

The 6-inch mains authorized by the town at the annual March meeting, to be laid in Goddard and Englewood avenues, and Beacon street, have been completed. The parties principally interested have signed an agreement guaranteeing 5 per cent. per annum for five years, on the total cost of the extension.

The 14-inch main to connect the reservoir, via Boylston street, with the main in Cypress street, has been laid, and now all the water supplied the town east of Heath and Brighton streets, is distributed through the reservoir, thus keeping up a constant circulation in the basin, and preventing stagnation.

There have been put in during the year in different parts of the town, sixty-one service-pipes, making the whole number laid since the introduction of water, 1035.

A petition has been presented from the Aspinwall Land Co., for the laying of a main in the new street over their property, connecting Tappan street with Washington street, and the company has agreed that if the main be laid, to guarantee an income to the water works of 5 per cent. per annum for five years, on the cost thereof, in consideration of which the Water Board advise the town to have the extension made, at an estimated cost of \$4,000.

ENGINEER'S HOUSE.

According to a vote of the town, authorizing the building of a dwelling-house near the pumping station for the use of the engineer, the board has caused to be built a substantial brick house, one and one half stories in height, with slated mansard roof, using therefor as far as was practicable, the material from the old pumping station, and it was occupied by the family of the engineer in November last.

The wooden house formerly occupied by the engineer has remained vacant since his removal, and from its isolated as well as exposed situation, we consider it in great danger of being seriously damaged or even burned by tramps or evil disposed persons, and would advise the town to dispose of it at as early a day as possible; and the board ask for authority to sell it either at auction or private sale, as may appear to be for the best interest of the town,—the purchaser to move the building off the town land.

ROOF OF PUMP-HOUSE.

At the last annual town meeting the board asked for and received an appropriation of \$475 to repair the defects in the roof of the pumping station, which defects arose from the faulty planning or construction thereof, as was shown in our

report at that time. This appropriation asked for was based on the estimates made by builders in the fall of 1880, who made an examination of the roof, and judged that if the part over the boiler-room was secured, that over the engine-room, as it was not subjected to so great heat, would remain in position; but upon later examination it is found that all the roofing with the exception of that covering the coal-room, (where the construction is on a different plan,) is defective, and will have to be repaired, thereby costing more than the first estimate; consequently the board concluded to do nothing in the way of repairs, but to again bring the subject before the town, and ask for a new appropriation of \$550, —the amount appropriated last year having lapsed into the treasury.

FUEL.

A bridge and tramway for the convenience of handling coal at the pump works was built last spring, and has proved a great success. We are now able to store between 400 and 500 tons of coal, and one man can receive from the teams and house 300 tons in one day. From the time of the removal of the pumping engines to their present location, until the tramway was completed and ready for use, in May last, owing to the difficulty in handling the coal, only enough could be received at any one time to feed the boilers for more than one or two weeks, and therefore we were obliged to have it carted from Boston as it was wanted; but early in the spring, as we were then in condition to handle a large amount, we ordered on favorable terms 400 tons, which was about a year's supply, to be delivered at the Spring street railroad station about the first of May, but in consequence of several unavoidable and vexatious delays, among which was the sinking in the sound of a barge laden with coal for us, on the way from New York to Providence, our order was not filled until late in the summer, and we were therefore obliged

to buy during this delay, as before, from week to week. We have thus bought and paid for during the past year, a supply of coal sufficient to last eighteen months, and have at the present time enough in the coal-house to last till August next. The payment for so large a quantity, however, has drawn unusually and unexpectedly upon the appropriation for maintenance, so that there is a deficiency in that account of \$800; but as it is found that coal can be purchased at better rates during May or June than at any other season, and that it can be carted and delivered in the summer much better than in the early spring, we now ask the town to make a special appropriation to cover the arrearages mentioned, so that advantage may be taken of a favorable time for buying and delivery; otherwise, the board with the usual appropriation of \$8,000 for maintenance, can only purchase six month's supply of coal this year, and will be compelled to purchase the supply for 1883, to be delivered in February or March, at probably a much greater cost than if procured some months later.

WASTE OF WATER.

The board would particularly call the attention of citizens who are water-takers, to that part of the report of the Superintendent herewith annexed, which consists of extracts from tables kept by him, showing the consumption and the waste of water. These extracts show a fair average of the waste during the year, and are made from the record of an indicator at the gate-house, which registers the amount of water leaving the reservoir at any and every hour during the day and night, and they indicate the quantity of water drawn from the reservoir between the hours of 12 o'clock midnight, and 4 A. M., between which hours it is assumed that in a town situated as Brookline is, with no manufactories, and the water used presumably only for family purposes, the quantity legitimately consumed would be hardly appreciable; but

granting that with water running at night at the various watering troughs, and for other real wants there is drawn 3,000 gallons, there still remain 35,000 gallons to be charged solely to the neglect of shutting off faucets, and defective plumbing, making at this rate for each 24 hours an average waste of 210,000 gallons, or 44 per cent. of all the water pumped.

The board have used great exertions to prevent so large a waste, but unless some new system, such as the general introduction of meters, or the citizens will personally attend to it, not only in the premises occupied by them, but also in the tenement houses and stables in which they have an interest, the board seem to be powerless to prevent the waste. Several times we have caused to be visited the localities where the greatest waste appeared to exist, and by insisting that the plumbing should be repaired, with threats that the water would be shut off, have for a day or two lessened the waste, but in a few days the trouble returned to its old proportions. By referring to the tables may be seen the effect of such a raid about the 19th and 20th of December, the waste decreasing from an average of 42,000 gallons to 23,475 gallons on the 19th; but soon, again rising to 35,000 gallons.

There are weighty reasons, besides the cost of pumping, why this great waste of water should be reduced,—among the strongest of which is this: that the water which is supplied the town from the filtering galleries is of a pure and spring-like quality, entirely different from that in Charles river, the temperature in the galleries always ranging between 48 and 52 degrees F., summer and winter, and it is found by experiment that the amount of water finding its way from the river to the galleries is very little, if any at all.

The galleries can be relied on to furnish during the dry season, between 900,000 and 1,000,000 gallons daily. Beyond this amount of daily supply, (which has been exceeded several times,) the excess must be filtered from the river,

and although, as the pumping works are now situated, an ample supply can be delivered even in the time of the greatest drought, limited only by the capacity of the pumps, or our rights under our charter, yet it should be remembered that the larger the quantity called for or consumed, over 900,000 gallons daily, the poorer the quality. It would therefore appear that by practising the least economy, the amount furnished by the galleries would be sufficient for several years to come.

APPROPRIATIONS.

We shall need for the coming year as follows :

For extension of the works :

| | |
|--|-------------------|
| New main over Aspinwall Hill, . . . | \$4,000 00 |
| New service-pipes and miscellaneous, . . . | 2,000 00 |
| Total, | <u>\$6,000 00</u> |

For repairing roof of Engine House, . . . \$550 00

[See report, pp. 78-79.]

For maintenance, 8,800 00

This amount includes the sum of \$800, referred to on pp. 79-80 of report, and asked as a special appropriation.

The following statistics are compiled from the books of the Water Registrar :

WATER TAKERS.

| | |
|----------------------------------|-------|
| Families | 1,301 |
| Public boarding houses | 3 |
| Private hotels | 6 |
| Stores and shops | 62 |
| Public stables | 11 |

| | | | | | | | | |
|-------------------|---|---|---|---|---|---|---|-----|
| Private stables | . | . | . | . | . | . | . | 167 |
| Greenhouses | . | . | . | . | . | . | . | 26 |
| Bakery | . | . | . | . | . | . | . | 1 |
| Gas-house | . | . | . | . | . | . | . | 1 |
| Halls | . | . | . | . | . | . | . | 2 |
| Railroad stations | . | . | . | . | . | . | . | 4 |
| Town buildings | . | . | . | . | . | . | . | 10 |
| Churches | . | . | . | . | . | . | . | 6 |
| Printing office | . | . | . | . | . | . | . | 1 |
| Saloons | . | . | . | . | . | . | . | 8 |

REVENUE COLLECTED.

| | 1880. | 1881. |
|-----------------------------|-------------------|-------------------|
| From private consumers | \$12,828 69 | \$13,822 04 |
| Rent of engineer's house | 200 00 | 200 00 |
| Sale of pipe | 42 28 | 67 60 |
| Sale of old material | 16 90 | 79 40 |
| Meter and repairs of meters | 17 25 | 30 00 |
| From Town of Brookline :— | | |
| Highway Department | 2,028 00 | 2,034 00 |
| Fire Department | 3,988 00 | 4,283 00 |
| School-houses | 78 00 | 78 00 |
| Police station | 28 50 | 28 50 |
| Town Hall | 56 00 | 56 00 |
| Public Library | 18 00 | 18 00 |
| | <hr/> \$19,302 22 | <hr/> \$20,696 54 |

The cash water receipts for the six years since the introduction of water, are shown below :

| | | | | | | |
|------|---|---|---|---|---|------------|
| 1876 | . | . | . | . | . | \$6,600 78 |
| 1877 | . | . | . | . | . | 8,877 13 |
| 1878 | . | . | . | . | . | 10,816 24 |
| 1879 | . | . | . | . | . | 11,884 41 |
| 1880 | . | . | . | . | . | 13,105 72 |
| 1881 | . | . | . | . | . | 14,199 04 |

The annual revenue of the Water Department is now sufficient (unless the extensions of mains, etc., by vote of the town, in any one year should be exceptionally large,) to defray the annual expenses of both the maintenance and the extension accounts.

CONSTRUCTION ACCOUNT.

Expended to Feb. 1, 1881 (see last report) \$598,960 89

Expended from Feb. 1, 1881, to Feb. 1, 1882,
as follows :

| | |
|------------------------------|-------------|
| On account of street-mains . | \$18,195 02 |
| service-pipe . | 1,073 36 |
| hydrants and gates | 889 23 |
| pumping station | 815 22 |
| reservoir . . | 64 75 |
| miscellaneous . | 329 07 |
| bridge at coal house | 648 76 |
| roads and grounds | 62 00 |

Cash paid from water receipts, for professional services in the suit of Mill owners on Mother Brook and Neponset River :

| | |
|---------------------------|--------|
| To Walter Rogers . . . | 51 00 |
| Aspinwall and Lincoln . . | 83 00 |
| E. Worthington, jr . . . | 25 00 |
| E. S. Philbrick . . . | 50 00 |
| Henry M. Wightman . . | 100 00 |
| M. M. Tidd . . . | 75 00 |
| F. W. Jenkins . . . | 108 53 |

| | |
|---------------|--------------------|
| Total | <hr/> \$621,530 83 |
|---------------|--------------------|

MAINTENANCE ACCOUNT.

From Feb. 1, 1881, to Feb. 1, 1882.

| | |
|--|------------------|
| Pumping expenses, wages, oil, etc. | \$1,866 72 |
| Fuel | 3,890 35 |
| Repairs, engine, boiler, furnace, etc. | 10 87 |
| Repairs, street-mains, hydrants, gates and care of | 283 47 |
| Repairs, reservoir, and care of | 30 17 |
| Repairs, engine house | 26 77 |
| Salaries and office expenses | 1,346 93 |
| Miscellaneous | 342 12 |
| Road and grounds at pumping station | 158 04 |
| Care of telephone | 44 50 |
| Total | <hr/> \$7,999 94 |

OLIVER WHYTE,
FRANCIS HUNNEWELL,
WILLIAM J. GRIGGS,

Brookline Water Board.

BROOKLINE, Feb. 7, 1882.

REPORT OF SUPERINTENDENT.

To the Brookline Water Board:

GENTLEMEN,—I have the honor to present herewith the annual report of the Superintendent for the year ending Feb. 1, 1882.

EXTENSION OF STREET-MAINS.

The expense of laying 3,950 feet of 14-inch pipe in Boylston street, from Cypress street to Fisher avenue, and 1,550 feet of 16-inch pipe in Fisher avenue, from Boylston street to reservoir, was \$12,740.36,—a less sum than estimated, owing to fall in price of iron.

The 6-inch mains added, with cost of each, are as follows :

Goddard avenue, from Cottage street southerly, a distance of 1237.4 feet. Total cost, \$1,689.46.

Beacon street, from pipe as before laid near Tappan street, to Englewood avenue, a distance of 1501 feet, and from this point along Englewood avenue, a distance of 462 feet. Total expense, \$2,063.18.

SERVICE-PIPE.

The number of service-pipes laid the past year was 61, making total number to date 1035.

Below is number of service-pipes in use at the end of each year since 1877, and total number of gallons consumed during that year.

| YEAR. | NUMBER IN USE. | INCREASE IN PER CENT. | TOTAL CONSUMPTION. | INCREASE IN PER CENT. |
|-------|-------------------|--------------------------|-----------------------|--------------------------|
| 1877 | 587 | | 122,805,027 | |
| 1878 | 702 | .19 6-10 | 128,495,223 | .04 6-10 |
| 1879 | 775 | .10 4-10 | 168,946,694 | .31 4-10 |
| 1880 | 857 | .10 5-10 | 178,977,545 | .05 9-10 |
| 1881 | 930 | .08 5-10 | 208,319,326 | .16 3-10 |
| 1882 | 1013 | .08 9-10 | 174,146,295 | * .16 4-10 |

* Decrease in per cent.

Increase in service-pipes in use since Feb. 1, 1878, 44 per cent. Increase in consumption, 35 per cent.

LEAKS.

| | | | | | |
|---|---|---------------|------|---|----------------|
| The number in street-mains was 8, costing for repairs | | | | | \$49 03 |
| " | " | service-pipes | " 1, | " | 6 17 |
| " | " | force-mains | " 2, | " | 46 79 |
| Total | | | | | <hr/> \$101 99 |

HYDRANTS.

The hydrant repairs for the past year were as follows :

Hydrant on Washington street near Kenrick's shop, broken at fire ; new barrel of improved pattern put in at an expense of \$55.23.

Hydrant on Ivy street, injured by frost and repaired at an expense of \$17.06.

Nut of hydrant on Englewood avenue broken, the repairs costing \$7.22.

The repairs in addition to these consisted in changing valves, and amounted to \$8.71.

RESERVOIR AND FILTERING GALLERIES.

In addition to the regular work at the reservoir, the underground gallery leading from the outlet chamber, was plastered for an additional distance of 75 feet, and an invert laid down the side of reservoir from the old inlet pipe.

The filtering galleries appear to be in as good condition as a year ago. The grounds around the pumping station have been somewhat improved the past year. There is room, however, for a much more extended improvement, and it is hoped each year that something will be done in this direction.

CONSUMPTION OF WATER.

Quite an effort has been made the past year to prevent a waste of water. The result is quite apparent, but by referring

to table annexed it will be seen that still a large proportion of water supplied the town is needlessly wasted. A very careful inspection of every water-fixture in town the last of November and the first of December, resulted in reducing the leakage nearly one-half, or about 100,000 gallons per day, but this lasted for a short time only, and in order to keep the leakage at as small a figure, a regular monthly inspection would be necessary.

It is hoped that every water-taker in town will carefully examine table showing leakage.

I subjoin the following tables, the record of consumption, leakage, location of gates, hydrants, etc.

All of which is respectfully submitted.

F. F. FORBES,

Superintendent.

RECORD OF CONSUMPTION.

| | Average Daily Consumption. | | Total Consumption. | |
|-----------------|----------------------------|---------|--------------------|-------------|
| | 1880. | 1881. | 1880. | 1881. |
| February | 452,652 | 454,992 | 13,126,899 | 12,739,800 |
| March | 492,358 | 407,881 | 15,268,096 | 12,644,307 |
| April | 536,203 | 445,591 | 16,086,088 | 13,367,746 |
| May | 665,938 | 488,134 | 20,307,486 | 15,132,169 |

| August | 667,797 | 588,607 | 20,701,701 | 18,246,828 |
| September | 576,582 | 503,547 | 17,297,465 | 15,106,422 |
| October | 514,286 | 585,690 | 15,942,882* | 18,156,415 |
| November | 456,268 | 478,126 | 13,688,057* | 14,343,807 |
| December | 472,050 | 347,656 | 14,633,549 | 10,777,344 |
| | 1881. | | 1881. | |
| January | 506,018 | 410,492 | 15,686,564 | 12,725,266 |
| Total | — | — | 208,319,326 | 174,146,295 |

* About 3,000,000 gallons used for cleaning reservoir.

LIST OF HYDRANTS.

Number set, as per last report, 158. The following have since been set in 1881 :

- One on Goddard avenue, opposite Raymond's.
- One on Beacon street, about 650 feet from Tappan street.
- One on Beacon street, about 275 feet from Englewood avenue.
- One on Englewood avenue, near Boston line.
- One on Boylston street, 1000 feet from Cypress street.
- One on Boylston street, opposite Warren street.
- One on Boylston street, near Catlin street.
- One on Boylston street, near Fisher avenue.

Total number to date, 164.

LIST OF STOP-GATES SET IN 1881.

- One 12-inch gate, corner of Boylston and Cypress streets.
- Two 10-inch gates on Fisher avenue, by Boylston street.
- One 6-inch gate, corner Goddard avenue and Cottage street.
- One 6-inch gate on Beacon street, about 675 feet from Tappan street.
- Four 6-inch gates on Boylston street, opposite hydrants.
- One 6-inch gate on Boylston street, for blow-off, near house occupied by O'Brien.

WATER-CART FEEDERS.

Number as per last report, 18. None have since been set.

DRINKING-FOUNTAINS SET.

- One in Harvard square.
- One on Boylston street, near Duffy's shop.
- One on Boylston street, corner Brighton street.
- One on play-grounds, Cypress street.
- One corner Aspinwall avenue and St. Paul street.

List of tools and materials on hand Feb. 1, 1882, is on file at office, Town Hall.

REPORT OF ENGINEER.

PUMPING-STATION, BROOKLINE WATER-WORKS,
WEST ROXBURY, Feb. 7th, 1882.

To the Brookline Water Board:

GENTLEMEN,—I have the honor to present the report of the Engineer for the year ending Feb. 1, 1882.

The pumping engines are in first-class condition, and have needed no repairs since my last report. A new set of grate-bars have been put in furnace of boiler No. 2, and some slight alterations made in the steam pipes. The boilers are in good condition, but the foundations still continue to settle, and will need extensive repairs during the year.

The duty of the engine is better than last year, but not as good as it should be. This is owing to the defective boiler-setting. In my report to the Water Board last April on the condition of the boilers, I suggested a remedy for the defect, and would respectfully call the attention of the board to that report.

The following tables show the record of the engines for the year, and the pumping expenses.

Respectfully submitted,

RICHARD J. FLINN,

Engineer.

REPORT

OF THE

BOARD OF SCHOOL COMMITTEE.

The School Committee respectfully submit to the town their annual report as required by law.

The board was organized at its first meeting after the annual election, by the choice of William H. Lincoln as chairman, and Warren Goddard, Jr., as secretary. Sub-committees were appointed, as follows :

HIGH SCHOOL.

WARREN GODDARD, JR.
ALBERT MASON.
WILLIAM T. R. MARVIN.

PRIMARY SCHOOLS.

MICHAEL DRISCOLL.
LEONARD K. STORRS.
DAVID B. VAN SLYCK.

FINANCE.

MICHAEL DRISCOLL.
DAVID B. VAN SLYCK.
CADWALLADER CURRY.

EVENING SCHOOLS.

WARREN GODDARD, JR.
LAURENCE J. MORRIS.
MICHAEL DRISCOLL.

GRAMMAR SCHOOLS.

WILLIAM H. LINCOLN,
LAURENCE J. MORRIS.
CADWALLADER CURRY.

TEACHERS.

WARREN GODDARD, JR.
WILLIAM H. LINCOLN.
LEONARD K. STORRS.

EXAMINATIONS.

WILLIAM H. LINCOLN.
WILLIAM T. R. MARVIN.
LEONARD K. STORRS.

MUSIC.

DAVID B. VAN SLYCK.
MICHAEL DRISCOLL.
CADWALLADER CURRY.

DRAWING AND WRITING.

WILLIAM T. R. MARVIN.
LAURENCE J. MORRIS.
ALBERT MASON.

During the summer vacation Mr. Goddard removed from town, and in September the vacancy upon the board thus created was filled by the election of John B. Brackett, who was appointed on the same sub-committees on which Mr. Goddard had served ; and Albert Mason was elected secretary.

The terms of the several members of the Committee expire as follows :

| 1882. | 1883. | 1884. |
|-----------------------|---------------------|--------------------|
| WILLIAM H. LINCOLN. | MICHAEL DRISCOLL. | LEONARD K. STORRS. |
| WILLIAM T. R. MARVIN. | DAVID B. VAN SLYCK. | ALBERT MASON. |
| LAURENCE J. MORRIS. | CADWALLADER CURRY. | |
| JOHN B. BRACKETT. | | |

The present Advisory Board of Ladies consists of—

| | |
|---------------------------|------------------------|
| MISS ELIZABETH Q. GUILD. | MISS SUSAN G. LITTELL. |
| MISS S. W. BOWMAN. | MRS. FRANCIS CABOT. |
| MRS. F. S. FISKE. | MISS MABEL CHAPIN. |
| MISS MARTHA C. STEVENSON. | |

GRAMMAR AND PRIMARY SCHOOLS.

The report of the Superintendent of Grammar and Primary Schools is printed with this report, and furnishes full information in relation to their work.

HIGH SCHOOL.

The modified course of study in the High school was entered upon in September, the beginning of the school year. The two lowest classes are following that course strictly; but as the other two classes had spent so much time in the old course, it seemed advisable that they should finish, without interruption, the course they had begun; though the most important changes in the new course are made in the studies of the last two years. The proposed changes must be introduced gradually and judiciously. So far as these changes are to be tested by experiment, time as yet does not enable us to decide; but we believe the studies, as now arranged, are an improvement upon the former arrangement, and meet approximately the requirements of the best views on High school training.

It would be difficult to give the town a more concise statement of what is attempted in the schools, and what the Committee believe is accomplished with reasonable thoroughness, than by a transcript of the questions which were given at three stages of the course in the last annual examination.

The lowest Grammar class were given the following:

ARITHMETIC.

1. Add the following numbers: three hundred thousand; six hundred fifty; seven thousand eight hundred thirty-two; eleven thousand one hundred one; ten thousand forty-seven; four hundred nineteen.
2. A man buys a house for \$8,500. He pays \$2,925 down. How much does he still owe?
3. Divide 37,008 by 98, and prove your work.
4. If you buy a book for \$1.50, a slate for \$.06, 5 blank books at \$.85 each, and a dictionary for \$1.16, what will they all cost?

5. If you have in one pocket a 50-cent piece, one quarter of a dollar, two 10-cent pieces, three 8-cent pieces, and one cent, and in another pocket a dollar bill, how much money have you in both pockets?

6. How many oranges can you buy with a dollar bill, if you pay 5 cents for each orange?

7. A boy had 10 marbles in one pocket, and 3 times 5 marbles in another pocket. How many more must he get before he will have 50 marbles?

8. A grocer bought 50 barrels of flour and 20 bags of corn, paying for the lot \$330. He sold the flour at \$7.25 per barrel, and the corn at \$1.87 per bag. Did he gain or lose, and how much?

9. If your school begins at 8 o'clock and closes at 1 o'clock 4 days in the week, and begins at 8 o'clock and closes at 11 o'clock 2 days in the week, how many hours does your school keep in a week? Explain.

10. If you can walk 20 rods in a minute, how long will it take you to walk 1,600 rods?

GEOGRAPHY.

1. Name the continents of the world, and draw a line under those that are on the Eastern Hemisphere.

2. What is a coral island? A chain of mountains? A strait? An isthmus? A peninsula?

3. What do you mean by the Gulf Stream? Describe it, and tell what effect it has on the climate of Iceland and Europe.

4. Why are the rivers in the eastern part of North America more important than those in the northern part? Name four large rivers in North America.

5. Name ten coast States, in order, beginning with Louisiana and going east.

5. Name five imports of the United States, also five exports. Draw a line under the names of exports.

6. Locate the following: Bangor, Lake Champlain, Boston. What State is west of New Hampshire? What State is north of Pennsylvania?

8. Name three cities of New York and two of Pennsylvania.

9. What are pine barrens? Name three staple products of the South Atlantic States.

10. Name three commercial ports and two manufacturing places in the South Atlantic States. Draw a line under the commercial ports.

DICTATION.

Subject.—What is made from Sap?

Directions to the teachers:—

Read carefully 3 paragraphs twice, without comment.

Scale for marking:—

50% for subject matter.

30% for spelling, capitals and punctuation.

20% for neatness.

At the close of the Grammar school work the following questions were given :

ARITHMETIC.

1. Find the value of the following expression : $\frac{1}{2} + (\frac{1}{3} \times \frac{2}{3}) + \frac{1}{4} - (\frac{1}{5} + \frac{1}{6})$.
2. A house is 36 ft. long and 32 ft. wide, and the ridge is 12 feet above the beam. The roof projects one foot over the ends and eaves in all directions. How many shingles will be required to cover the roof, 6 shingles being allowed to the foot?
3. A man bequeathed to his five daughters \$10,000. To the first he gave \$3,000, to the second $\frac{1}{4}$ of what remained, to the third \$250 more than to the second, to the fourth $\frac{2}{3}$ of what still remained, and to the fifth the rest of his property. How much did each of the last four daughters receive?
4. A commission merchant buys for me 1000 bbls. of flour at \$6.50, and sells the same at \$6.75. Allowing him 1 per cent. for buying and $1\frac{1}{2}$ per cent. for selling, do I gain or lose by the transaction, and how much?
5. A school-house which cost \$5,000 is to be paid for by four men, A, B, C, and D. Their portions are to be in proportion to their distances from the school-house. A lives $\frac{1}{4}$ of a mile from it, B $\frac{1}{2}$ a mile, C $\frac{3}{4}$ a mile, D 1 mile. What must each pay?
6. What is the difference between the interest of \$825.16 from August 1, 1842, to November 16, 1846, at $8\frac{1}{2}$ per cent. and $7\frac{3}{4}$ per cent.?
7. In 1464 gills how many hogsheads? In 9,567,805 square inches how many acres?
8. A hare pursued by a dog was 96 yards before him in starting. The dog ran 7 yards while the hare ran 5. How far did the dog run before overtaking the hare?
9. Two ships sailed together from Boston to San Francisco. One sailed at the rate of 6 miles an hour, and the other $5\frac{1}{2}$, on an average, the whole distance. The first arrived in 165 days. In how many days did the other arrive?
10. The wall of a castle, 45 ft. high, is surrounded with a ditch, and a ladder 75 ft. long will reach from the outside of the ditch to the top of the wall. What is the breadth of the ditch?

BOOK-KEEPING.

Jan. 1, 1881. J. L. Smith and J. O. Brown form a partnership under the firm of Smith & Brown, to engage in the retail commercial business in Hillside, N. H., with cash on hand, \$3000; merchandise, \$9000, and a store and fixtures valued at \$6000.

Regard yourself their book-keeper, and write in the Day Book, and afterwards post into the Ledger, the following transactions:

Jan. 3. Bought of Peters & Co., on account, 1600 lbs. of sugar at \$.08, 300 galls. of oil at \$.18, 25 bbls. of flour at \$.75.

Jan. 4. Sold Thomas Alden 35 yds. of cotton cloth at \$.12, 45 lbs. of nails at \$.06, a barrel of flour at \$.25. Cash sales, \$37.

Jan. 5. Bought of Thomas Alden 7 cords of wood at \$.5, 3 tons of hay at \$.18.

Jan. 6. Sold Enoch Day 24 bbls. of flour at \$.8. He gave us in payment his promissory note, due the 18th.

Jan. 8. Settled with Thomas Alden; we gave him our promissory note for the balance due him, payable in 60 days.

Jan. 13. Sold Enoch Day 12 galls. of oil at \$.25, also crockery and wooden ware amounting to \$32.

Jan. 15. Sold Thomas Alger 50 lbs. of sugar at .10, a barrel of flour at \$.25. Cash sales, \$33.

Jan. 18. Enoch Day paid his note. Cash sales, \$45.

Jan. 20. Bought of Peters & Co. 15 bbls. of flour at \$.75, for which, together with what we already owe him (see Jan. 3), we give him our note, due in 30 days. Cash sales, \$75. Paid cash for store expenses, \$27.

Jan. 31. We take an account of stock. We have \$9255 worth of merchandise, \$3355 in cash. Store and fixtures are of the same value as at the beginning of the month.

Close your several accounts and reopen them, Feb. 1, 1881. What are the assets and what the liabilities of Smith & Brown on the 31st of January, 1881?

ENGLISH GRAMMAR.

1. What is English Grammar? What is the object in studying it? Give the principal parts of the following verbs: beat, cast, chide, dive, heat, pay, slide, sting, throw and wear.

2. What is a sentence? What is the distinction between a complex sentence and a compound sentence? Give examples of each.

3. What kind of sentence is the following:—

“Under a spreading chestnut tree the village smithy stands.”

4. “I tell you that which you yourselves do know;
Show you sweet Cæsar's wounds, poor, poor dumb mouths,
And bid them speak for me: but were I Brutus,
And Brutus Antony, there were an Antony

Would ruffle up your spirits, and put a tongue
In every wound of Cæsar that should move
The stones of Rome to rise and mutiny."

Name each verb in this passage, telling also its mood, tense and agreement.

5. How would the sense be changed if "yourselves," "do," and one "poor" were omitted?

" Her giant *form*
O'er wrathful surge, through blustering storm,
Majestically calm would go,
'*Mid* the deep darkness, white as snow!
But gentler now the small waves glide
Like playful lambs o'er a mountain's side;
So stately her *bearing*, so proud her array,
The main she will traverse *forever* and aye.
Many ports will exult at the gleam of her mast,—
Hush! hush, *thou* vain dreamer! this hour is her last.
Five hundred souls in one instant of dread
Are hurried o'er the deck;
And fast the miserable ship
Becomes a lifeless wreck.
Her keel hath struck on a hidden rock,
Her planks are torn asunder,
And down come her masts with a reeling shock
And a hideous crash like thunder.
Her sails are dragged in the brine,
That gladdened late the skies,
And her pennant that kissed the fair moonshine
Down many a fathom lies."

6. Put the above description into prose, using your own language.

7. Parse the words italicised.

8. Write a note of invitation to a friend to make you a visit. Punctuate carefully.

9 and 10. Write a short description (not more than fifteen or twenty lines) of the Public Library building, or of any public building in town.

DEFINITIONS.

Define the words in *italics* :—

Columbus was a man of great and *inventive genius*. The operations of his mind were energetic, but irregular; bursting forth at times, with that irresistible force which *characterises intellect* of such an order. His ambition was lofty and noble, *inspiring* him with high thoughts and an anxiety to *distinguish* himself by great *achievements*. He aimed at *dignity* and wealth in the same elevated spirit with which he sought *renown*; they were to rise from the territories he should discover, and be *commensurate* in importance.

GEOGRAPHY.

1, 2 and 3. Draw an outline of the coast of Asia and Behring's Strait to the Red Sea, locating and naming the countries, four rivers, six seas, important gulfs and bays, five adjacent islands and five cities.

4. State as many facts as you can about Siberia.

5. Chinese Empire. 1st, government and religion; 2d, occupations; 3d, productions, domestic commerce, education, and any other interesting facts which you may have learned from reading.

6. What part of the earth is known as Oceanica? To whom do the Philippine Islands belong? Name five articles of export.

7. Follow the coast of Africa, commencing with Egypt, naming in order the coast countries.

8. What is climate? How affected by latitude? By elevation? By sea winds? Land winds? Ocean currents? By distance from the sea?

9. What countries of Europe are empires? Which are republics? Which is the most extensive monarchy in the world? What countries are embraced in the Russian Empire?

10. From what countries do we import coffee, tea, hides, india-rubber, salt?

HISTORY.

1. Who first discovered Britain to be an island? How did he make the discovery? Why did the Romans make such efforts to establish themselves in Britain? When and why did they call home their forces?

2. What was the Saxon Heptarchy? On what did William, Duke of Normandy, base his claim to England?

3. Who formed the New Forest, and how did he do it? What was the "Doomsday Book"?

4. Who conquered and added Ireland to the English Dominions?

5. What terminated the "Wars of the Roses"? Enumerate the battles fought in these wars; where they took place; and give the names of prominent personages, aside from the kings.

6. Name the sovereigns of the Tudor family, and give some account of the first sovereign of the family.

7. What led to the condemnation of Lady Jane Grey? State some of the circumstances attending her death.

8. What was just the matter of difference between Charles I. and the parliament?

9. When did the party names of Whigs and Tories first become common? How were the names applied respectively?

10. Tell the circumstances which led to the Afghan war of 1838.

SPELLING.

| | | | |
|-----------|-------------|--------------|-------------|
| majesty | scenery | gnarled | memorandum |
| language | ghastly | intellectual | accession |
| sovereign | parliament | melancholy | maintained |
| solicited | unconscious | balance | plantagenet |
| sycamore | exhaust | ledger | chancellor |

COMPOSITION.

Subject.—Circulation of the Blood.

Write not less than 20 lines.

Scale for marking:—

50% for substance.

30% for spelling, capitals and punctuation.

20% for neatness and arrangement.

The pupils who had taken the classical course in the High school passed the examinations required for admission to Harvard University, without conditions, and one with special honors. The scholarship of those who had taken only the English course was tested by the following questions:

ALGEBRA.

1. Reduce to its simplest form the following expression:

$$x^4 - [4x^3 - \{6x^2 - (4x - 1)\}] - (x^4 + 4x^3 + 6x^2 + 4x + 1).$$
2. Resolve into factors the following expression: $x^2 - 64$.
3. Find the value of x in $\frac{x+1}{7} + x(x-2) = (x-1)^2$.
4. A person had £900; part of it he lent at the rate of 4 per cent., and the rest at the rate of 5 per cent., and he received equal sums as interest from the two parts: how much did he lend at 4 per cent.?
5. Find the values of x , y , and z , in the following equations:

$$4x - 5y + z = 6; 7x - 11y + 2z = 9; x + y + 3z = 12.$$
6. A and B run a race which lasted 5 minutes; B had a start of 20 yards; but A ran 3 yards while B ran 2, and won by 30 yards: find the length of the course and the speed of each.
7. Find the value of x in $\frac{3}{2(x^2-1)} - \frac{1}{4(x+1)} = \frac{1}{8}$.
8. A man bought a certain quantity of meat for 18 shillings. If meat were to rise in price one penny per pound, he would get 3 lbs. less for the same sum. Find how much meat he bought.
9. Find the square root of $4x^3 - 4x^2 - 7x^4 + 4x^2 + 4$.
10. Find the square root of $4x^{\frac{3}{2}} - 12x^{\frac{3}{2}} + 25 - 24x^{-\frac{3}{2}} + 16x^{-\frac{3}{2}}$.

PHYSICAL GEOGRAPHY.

1. What are Thermal springs? Where found? Describe one of the most remarkable.
2. What was the condition of Vesuvius at the birth of Christ? Describe its eruption of '79 A. D.
3. What is the theory of earthquakes, as to their cause?
4. Name the different kinds of plains; describe in particular alluvial plains. Why did Egypt, China, India, and Babylonia become great centres of civilization?
5. Describe Volcanic islands. Name any two important ones.
6. What is the difference between a river basin and a water-shed? In what ways do rivers change the surface of a continent?
7. What is the composition of sea-water? Tell what you can about the temperature of the ocean at different depths.
8. What may be the cause of currents in the ocean? Describe fully the Gulf-stream.
9. Name, and give the causes of, any one of the trade winds.
10. Tell how mountains affect the quantity of rain in a country. Name a place where there is little or no rain, and tell the reason.

CHEMISTRY.

1. What is a chemical process? Difference between analysis and synthesis? What are chemical elements? How many are known? Difference between hypothesis and law: illustrate.
2. What is the difference between air and water? Describe experiments by which the difference will be shown.
3. What is meant in chemistry by atomic weights? Illustrate.
4. Explain (draw a diagram) the arrangement and use of the blow-pipe.
5. Describe and explain the process of making nitric acid. Give its symbol.
6. What is aqua regia, and why so called? What is meant by *nascent* state?
7. Describe Ozone. What is allotropism?
8. Describe the manufacture of illuminating gas.
8. How does organic chemistry differ from inorganic chemistry? Describe the process of making leather.
10. What is clay? Why is it so valuable in the arts? Describe the process of glazing in pottery.

PHYSICS.

1. What are the conditions necessary to sound? If there were no ear, could there be any sound? Why?
2. Explain the phenomenon of echo; whispering galleries. What is the velocity of sound?

3. Upon what does the quality, pitch and intensity of sound depend? Under how many and what classes may all musical instruments be included? Describe the organ-pipe.
4. Give several ways (three at least) of showing the pressure of the air.
5. Explain the difference between the vacuum in the barometer and in the receiver of an air-pump.
6. Explain the common suction pump. How high can water be raised by it? Why not higher?
7. Explain Barker's Mill. What other kinds of water wheels are there?
8. What is capillary attraction? Give illustrations. How does mercury, compared with water, behave in tubes?
9. Give an experiment to show how Osmose may be illustrated.
10. Give some of the *universal* properties of matter; some of the *specific* differences between cohesion and adhesion. Give some varieties of adhesion.

ASTRONOMY.

1. How was the velocity of light discovered?
2. What would be the comparative weights of the same body at the surface of the sun and at the surface of the earth? Explain why.
3. Constitution of the heavenly bodies, how known? Tell about the discovery of the asteroids.
4. What are comets? Meteors?
5. Explain parallax and refraction as affecting the apparent position of a heavenly body.
6. Explain the terms *civil* day, and *astronomical* day.
8. Explain solar eclipses, and why they do not occur at every revolution of the moon.
8. Name the signs of the Zodiac. Has the sun always been in the same sign? Why?
9. Explain the various motions of the earth.
10. How can one determine his latitude and longitude at sea?

GEOMETRY.

1. To inscribe a circle in a given triangle. Proof of work.
2. To circumscribe a circle about a given triangle. Proof of work.
3. In any triangle, the square of the side opposite to an acute angle is equal to the sum of the squares of the other two sides diminished by twice the product of one of these sides and the projection of the other upon that side. Prove.
4. To find a mean proportional between two given straight lines. Proof of work.
5. To construct a square equivalent to a given parallelogram, or to a given triangle. Proof of work.
6. The area of a circle is equal to half the product of its circumference by its radius.

Give all the propositions on which the demonstration of the above proposition depends.

BOOK-KEEPING.

What would be your journal expression,—

1. If you sell wine to John Smith for \$5,000, and take his note for the same payable in 30 days?
2. If at the end of 30 days John Smith fails, and you lose the whole debt?
3. If, instead of losing the whole debt, you receive half of it in cash and lose the rest?
4. If, instead of failing, John Smith pays his note to you by giving you a note of equal amount against Thomas Jones?
5. If Thomas Jones pays you his note and the interest in cash, \$5,060?
6. If you buy \$2,000 worth of cloths, and pay for the same in flour?
7. If you sell to Jacob Howe \$50 worth of cloth on account?
8. If Jacob Howe pays his debt to you in one month with cash?
9. If you pay rent for the house in which you live \$100, giving your note?
10. If you pay expenses on a summer excursion, \$75 in cash?

ENGLISH LITERATURE.

1. Name the principal poems written by Tennyson. Give some of the peculiarities of Tennyson as a man.
2. Quote some one of his songs.
3. Quote any three stanzas from "In Memoriam."
4. Give a brief biographical sketch of Thomas Gray's life, and name his chief works.
5. Name some of his contemporaries; also some of the chief historical events that occurred during his life.
6. On what poem does his fame chiefly rest? Quote three stanzas from it.
7. Which author do you read with more enjoyment, Cowper or Hood? Why? Name some of their peculiarities.
8. Quote a half-dozen stanzas from each of the last two named authors

READING.

(Besides an exercise in oral reading, the class were required to answer in writing the following questions.)

1. What is the Lay of the Last Minstrel intended to illustrate? What is the date of the tale itself?
2. "Bards long shall tell
How Lord Walter fell.
Who was Lord Walter, and what was the cause of his death?
3. Define *slogan*, *heriot*, *march-treason*, *seneschal*, *despite*, *mandate*, *vassal*, *ken*, *glaive*, *pursuivant*.
4. Who was Lord Cranstoun?
5. Describe the scene between Lord Cranstoun and William of Deloraine.

6. What was the occasion of the following words?
 "If in the lists good Musgrave's sword
 Vanquish the knight of Deloraine,
 Your youthful chieftain, Brankrome's lord,
 Shall hostage for his clan remain."
7. What is the superstition in the following line?
 "The running stream dissolved the spell."
8. Describe the Goblin Page.
9. Who was Wat Tinlin? Wat Harden? Lord Dacre? Belted Will Howard?
10. "His squire, attending in the rear,
 Bore high a gauntlet on a spear."
 What did the act described in the preceding lines signify?

ENGLISH LITERATURE.

1. Quote a dozen lines from Chaucer. What were the Canterbury Tales? Give an outline of one.
2. Name the authors you have studied since January, with dates when they lived. Which travelled most? Which was most learned? Which was most religious? Which loved nature most?
3. Compare Milton and Herbert as writers.
4. Speak of the times in which Milton lived; how was he influenced thereby?
5. Quote a half-dozen lines from each of the poems, — *Comus*, *Il Penseroso*, and *L'Allegro*.
6. Give an outline, or the plan of *Comus*, and of *Paradise Lost*.
7. Compare *Paradise Lost*, *L'Allegro*, and *Il Penseroso*, in respect to style, and their effects upon the reader.
8. Give a short account of Spenser, and name his distinguished contemporaries.
9. What was designed to be taught by the "*Faerie Queene*?" Quote a few lines from Spenser. Name his principal works.
10. Compare the character of Bacon with that of Milton. What was there in the times of each to effect their characters? Give, if you can, Pope's well-known couplet characterizing Bacon.

READING.

(Besides an exercise in oral reading, the following questions were required to be answered in writing.)

1. Sketch of the life of Hawthorne.
2. Define *formidable*, *subsequent*, *imperceptible*, *fortitude*, *latent*, *bedeck*.
3. What does the Story of Wakefield teach?
4. What traits of character in the Puritans are shown in the pieces from Hawthorne that you have read?
5. In the characters or incidents of what pieces do you find the reasons for your answer to question "4"?
6. In which pieces occur the character of Ellnor? Dominicus Pike? Madame Wycherley? Mr. Ellenwood? The Cynic?

ENGLISH LITERATURE.

1. Give a list of the principal prose writers of America; also a list of the principal poets. In the former list indicate whether the writer was a historian, political writer, a critic, a novelist, theologian, or a scientific writer.

2. Select the prose author you like best; give the chief events of his life; name his principal works; what are the peculiarities of his style? Illustrate, if you can, by quotations.

3. Select the American poet you like best, and do in respect to him as you are above required to do in respect to the prose author.

4. Select a poem of Longfellow's and one of Bryant's, and try by means of these poems to point out the peculiarities of these two writers.

5. Compare the writings of Hawthorne and Holmes.

6. Compare the writings of Cooper and Irving.

READING.

(Besides an oral exercise in reading, the class were required to give in writing the answers to the following questions.)

1. When was Shakespeare's Hamlet probably written, and when first printed?

2. What reason is there to suppose that some other English author had previously written a play upon the same subject?

3. Give the original source of the drama, and tell how it found its way into the English language.

4. Who was Ophelia, and what were her relations to the plot?

5. Describe Polonius, telling who he was, his relations to the plot, and his fate.

6. Describe Hamlet's interview with Ophelia, and comment briefly upon it.

7. Describe Ophelia's account of a previous interview with Hamlet, and explain its purport.

8. Did Hamlet love Ophelia? Your reasons.

9 and 10. Write a brief biography of Prince Hamlet.

HISTORY.

1. The accession and character of George I.

2. Give some account of the Old and the Young Pretenders.

3. What was the South-sea Bubble?

4. Give an account of the war of the Austrian Succession.

5. In what did the Reformation of the Calendar consist? Its date.

6. What is meant by the Family Compact between France, Spain, and Naples?

7. Tell briefly about "Wilkes" and "Junius."

8. Give some account of the Lord George Gordon Riots.

9. Tell what you can of Warren Hastings before his impeachment.

10. Who were the principal leaders of the French Revolution? At what were those leaders aiming?

ANCIENT HISTORY.

1. Give the striking social and political differences between Athens and Sparta. Give a brief outline of the relations of Athens and Sparta to the close of the Peloponnesian War.

2. The geography of Italy. How does it differ from that of Greece? Effect of this difference on the history of the two peoples. Give some account of the inhabitants of ancient Italy.

3. State what you know of Carthage before the Roman wars. Real question at issue and real cause of the wars. A brief outline of two Punic wars.

4. The Augustan age of Roman Literature. Give a list of Greek authors and artists.

5. Compare the Greek and Roman colonies.

6. To what events in Greek history do the following dates point? 146 B.C., 371 B.C., 429 B.C., 480 B.C., 510 B.C.

7. Sicily as a battle-ground for Rome and Greece,—compared.

8. To what event in Roman history does the date 146 B.C. point? State of Rome in 371 B.C. First Mithridatic war. Achæan war. Mamertine war.

9. Where Amphipolis, Metaurus, Messana, Cynosemma, Lusitania? Why were they of importance?

10. Give an account of Hannibal's last attempt against Rome.

FRENCH.

I.

Dictée :

“Mais,” reprit-elle avec vivacité, “c’était une personne admirable! Elle avait un cœur généreux, une charité sans bornes; elle donnait tout ce qu’elle possédait à nos pauvres paysans, qui n’étaient pourtant ni de son pays ni dans ses principes. Je l’aimais bien mieux que la gouvernante allemande qui lui a succédé.”

II.

Translate :

Le Cid, Act III., Scene 6. From the beginning of the scene through efface.

III.

Translate :

L'Avare, Act III, Scene 3.

IV.

Give primitive tenses of *connais*, and the third person plural of tenses derived from the present participle.

Construct sentences to illustrate the rules that govern the place of adjectives in French.

V.

Translate :

"*La Baronne.* Ah! monsieur, vous n'êtes pas Bernard, vous n'êtes pas le fils de notre vieil ami.

Bernard. Madame la baronne.

La Baronne. Non, Monsieur. Votre père était un homme équitable, d'un sens droit, d'un cœur modéré. . . . Ce n'est pas lui qui se fût abandonné aux transports d'une colère irréfléchie : il eût crainte de céder aux suggestions de la calomnie, avant de se décider à la haine, il eût voulu s'assurer qu'il n'était pas l'instrument de la vengeance d'un méchant.

VI.

Construct sentences in French and give an English translation of them illustrating the use of the interrogative pronoun in French.

VII.

Translate (a vocabulary of five words given) :

"On se trouvait au mois de Décembre; l'air déjà humide et froid au moment du départ, devint encore plus glacial à la tombée du jour. Henri, accoutumé à son soleil de Provence, avait beau boutonner jusqu'au menton son paletôt de voyage, il frissonnait comme une feuille sous le brouillard nocturne. Son visage était bleu, ses dents claquaient, bientôt une pluie fine, poussée par le vent, commença à pénétrer ses vêtements."

VIII.

Write French sentences (and give English translations) illustrating the correct use of

Se trouver,
Devenir,
Accoutumer or S'accoutumer à,
Avoir beau,
Jusqu'à.

N. B. Extracts from the quotation in question seven will not be accepted as answers to this question.

IX.

Translate into French (a vocabulary of five words given) :

THE BOY AND THE ECHO. Little Charles had never heard an echo. One day he was playing in the fields; he cried out "holloa." Immediately the same word "holloa" was repeated from the forest. He was much surprised, and cried out, "Who are you?" The mysterious voice answered, "Who are you?" Charles then said, "You are a silly boy." "A silly boy," answered the voice.

X.

Pronunciation.

CHANGES OF TEACHERS.

Since the last school year there have been a few changes in our school management. Miss M. Pickering, a valued Primary teacher, resigned from the Pierce school, and her place was supplied by the transfer of Miss S. L. Harris from the Harvard school. The vacancy thus made was filled by the appointment of Miss Mary E. Kingsbury. Miss M. S. Donaldson of the Pierce school, and Miss C. W. Gookin of the Ward, also resigned at the close of the last school year. The place of the former was filled by the appointment of Miss Anna E. Edwards, that of the latter by the transfer of Miss E. A. Rausch. Miss Annie M. Osgood was appointed to fill Miss Rausch's place. In October, Miss J. C. Carroll having resigned, Miss M. F. Taylor was appointed to that class in the Ward school.

Miss C. E. Ballou, a beloved and successful teacher in the Longwood school, died soon after the schools reassembled in the autumn. She had gained the confidence of both her pupils and the Committee, and will be much missed. Her place was filled by the appointment of Miss C. M. Frost.

Prof. Henry G. Carey, our former music teacher, has been reappointed in the place of Mr. O. B. Brown, resigned.

EVENING SCHOOL.

The Evening school was opened Nov. 28, and now numbers forty-four pupils. It is in charge of Mr. N. H. Harriman as principal, with Miss Nellie Shea as assistant, and Miss E. T. Parker as teacher in drawing. The school has been removed from the old Town Hall to the High school building, occupying the two lower rooms. This change has been advantageous. Two thirds of the pupils are either beginning reading and writing, or have made little progress in them, and would not be able to take up studies which imply power to read and understand what is read. They are, however, for the most

part, young men and women who, conscious of lack, have set vigorously to work to improve the opportunity afforded by the school, and are making good progress.

The introduction of drawing was regarded as experimental, but the interest manifested and the work accomplished seems likely to justify its continuance as a permanent feature.

ADDITIONAL SCHOOL ACCOMMODATIONS.

The subject of additional school accommodation was early in the year referred to a sub-committee, who have made very careful examination of the matter and presented a unanimous report, recommending the enlargement of the Boylston school building. After full consideration the report of the sub-committee was adopted by a majority of the whole board, as the report of the board to the town.

REPORT.

The school population, as will be seen by the accompanying table, has increased largely since 1876. Nearly 200 pupils, or 20 per cent. of the entire number, have been added the past seven years. The High school and the Heath street school show a considerable decrease, while in the Ward and Pierce districts there have been large additions. The Ward, Boylston, and Sewall street schools, are in the Ward district. The number belonging in 1876 was 427; number at present is 539, being an increase of 112, or 26 per cent. The Pierce, Harvard, Lawrence and Longwood schools are in the Pierce district, and we have employed a portion of our space in this district to relieve the Ward, and to such an extent that many of the rooms are now crowded to excess. In 1876 the number in this district was 408; at present it is 535, showing an increase of 127, or 31 per cent. The *apparently* large increase in this district is due to the transfer of pupils already mentioned. There has been, therefore, in the two districts named, an addition of 239 pupils since 1876, and the extra

room provided has been the Sewall street school, affording accommodation for 90 pupils. The large increase of pupils during the past year, and the crowded condition of many of our schools, have caused the consideration of this subject and led to the inquiry, how can the pupils that will probably apply for admission another season be accommodated?

The schools that seem to require relief are those in the Ward and Pierce districts. Considering that the town owns a valuable tract of land surrounding the Boylston school, and that this building was erected and placed upon the lot with a view to future enlargement, and especially as the increase of pupils may be expected largely from that vicinity, we are impressed with the desirability of carrying out the original intention and making the additions as drawn upon the accompanying plan; while not more than two rooms will be required for one, or possibly two years, yet the design of the structure will be more effective, and the interior arrangements more complete by providing for the construction of four rooms, two upon each floor, than in any other way. The addition will thus form the central portion of the building, with the present building as one wing, reserving for future needs to cause the completion by the addition of the remaining wing. This plan seems to present the most economical, and a desirable way of making provision for the future.

As the call for increased room comes mainly from the Primary departments, and of the schools already named, we have investigated the facts as they now exist with respect to these schools. In the Ward school we find the Primary classes occupying four rooms. Two rooms have 43 pupils each, one 46, and one 57 pupils. There is not any first class, and but 29 pupils in the second; so that allowing all the pupils to take regular promotion, this department will be relieved of but 29 pupils another year, besides those that drop out from other causes, but which in a Primary department is quite small. There are 64 pupils at present in the

lowest Primary class, composed of those that have entered within a year. It is fair to assume that the number of pupils that will apply for admission during the year will not differ materially from the past year. Upon this supposition, there will be about 15 to enter the lowest Primary grade in the spring and 60 in the fall, or 65 during the year; deducting 29 pupils that will graduate, leaves 46 as an accession to be provided for in some way. In the Boylston school there are two rooms, one containing 36 pupils and the other 40. In the ordinary course of promotion, 28 pupils will leave the school during the year, and upon the same basis as heretofore mentioned, there will be 28 additions, so that this school will remain in the same condition as regards number. In the Sewall street school there are two rooms, with 40 pupils in one, and 46 in the other. There are 31 pupils in the 5th Grammar class, so that the school is not exclusively Primary. These pupils will be transferred next fall to the Ward school in case room can be made for them. As there are 49 pupils in the class of same grade already in the Ward school, unless there is an unusual falling off, it will not be possible to unite these classes and form one class of 4th grade. A portion could possibly be transferred to the Lawrence school, though the indications are that Miss Bean will have two classes, comprising 45 pupils. In that case, it will not be possible to make any such transfer. There will be about 31 new pupils next fall to provide for at the Sewall school, equal to the number mentioned as in the line of promotion. For the reasons mentioned, it does not appear in what way provision is to be made for the class of 31 promoted. There is certainly a surplus here that will require an increase of room.

The Pierce Primary department is not at present over crowded. It is divided into three rooms, containing 36, 33 and 52 pupils, respectively. Another year, 36 pupils will pass out and about 40 new ones will be added. These

classes are likely to increase rather than diminish, as transfers or entries are being constantly made to accommodate parties residing out of the immediate district, and are especially permitted on account of the crowded condition of the other schools. It is not safe to count upon any surplus room in this school.

The summary of the foregoing is that there will be in all probability from 40 to 50 pupils in the lowest grade in excess of our accommodations, and from 20 to 30 pupils in the 5th Grammar; so that one additional room will positively be required, and possibly two rooms will be needed. It will not be wise or even prudent to delay making provision till the want is actually upon us. In our opinion, work should be commenced early in the spring, so as to have the rooms ready for occupancy in the autumn, and the subject should be laid before the town at the March meeting, and the necessary appropriation solicited.

We should also not lose sight of the fact that the town is growing perceptibly, and the prospect is that another year will witness further growth; and a very important matter in connection therewith is suitable school accommodation.

TEACHERS' MEETINGS.

Monthly meetings of the teachers with the Committee have been continued and the interest in them fully maintained. Alternate months the meetings have been addressed by educators from other places, with advantage to all who attended; but the meetings conducted by the teachers themselves are believed to have been of equal advantage. They have brought the teachers together in a helpful way, and made teachers and Committee better acquainted with the work and purpose of each. The discussions have been frank, suggestive and entirely practical.

INDUSTRIAL INSTRUCTION.

The report of the Advisory Board is printed with this report and the Committee desire to endorse their recommendation for an appropriation for industrial instruction during the summer vacation. The funds for the experiment of last year were provided by private subscription.

TABLE

SHOWING NUMBER OF PUPILS ENROLLED IN ALL THE SCHOOLS FOR THE MONTH OF JANUARY, FROM 1876 TO 1882, INCLUSIVE.

| | 1876 | 1877 | 1878 | 1879 | 1880 | 1881 | 1882 |
|----------------|------|------|------|------|------|------|------|
| High | 103 | 95 | 93 | 83 | 78 | 80 | 85 |
| Pierce | 288 | 295 | 313 | 346 | 337 | 338 | 370 |
| Ward | 338 | 386 | 407 | 421 | 349 | 352 | 359 |
| Heath | 141 | 130 | 126 | 121 | 91 | 92 | 105 |
| Harvard | 73 | 70 | 73 | 61 | 66 | 87 | 96 |
| Boylston | 89 | 105 | 93 | 89 | 85 | 85 | 89 |
| Lawrence | 30 | 31 | 40 | 51 | 60 | 52 | 41 |
| Longwood ... | 17 | 16 | 22 | 24 | 26 | 32 | 28 |
| Newton Street. | 12 | 11 | 8 | 13 | 10 | 8 | 7 |
| Sewall | 0 | 0 | 0 | 0 | 34 | 62 | 91 |
| Totals | 1091 | 1139 | 1175 | 1209 | 1136 | 1188 | 1271 |

APPROPRIATIONS.

There will be needed the coming year to defray school expenses :

| | |
|--|-------------|
| For Salaries | \$30,000 00 |
| Sewing teacher | 550 00 |
| Music " | 600 00 |
| Drawing " | 250 00 |
| Care of school-rooms | 1,400 00 |
| Fuel | 1,600 00 |
| Sundry expenses | 1,600 00 |
| | <hr/> |
| | \$36,000 00 |
| For Evening School, including instruction in drawing | \$500 00 |
| For Industrial School, during vacation | \$250 00 |

Respectfully submitted,

WILLIAM H. LINCOLN,

DAVID B. VAN SLYCK,
LAURENCE J. MORRIS,
JOHN B. BRACKETT,

School Committee of Brookline.

REPORT OF THE ADVISORY BOARD.

The ladies of the Advisory Board are called upon for a report of their observations through the past year.

We are glad to say that the success in collecting the "penny savings" last year has led to the collection being taken in more rooms this year.

"Penny savings" are now collected in two rooms in the Pierce school, one in the Harvard school, one in the Lawrence school, and three in the Ward school,—seven rooms in all.

| | |
|---|----------|
| No. of depositors from the beginning | 174 |
| " deposits withdrawn | 14 |
| Amount " | \$26 47 |
| No of deposits less than 50 cents each | 43 |
| Amount | \$10 69 |
| No. of deposits more than 50 cents each | 117 |
| Amount | \$335 61 |
| Largest amount to the credit of any one pupil | \$15 75 |

The trial of an Industrial Vacation School last summer, after the inevitable mistakes of an experiment were conquered, proved a success, which we hope very much will be recognized as such by the town, and money appropriated for the regular maintenance of such teaching for the boys.

The excellent lessons on elementary physics and botany given at the teachers' meetings, have already brought good results, and given to some of the teachers subjects for familiar talks. The lessons on botany will, we hope, be still more used in the spring.

We cannot be too careful of the influences that come to the child in its earliest years,—the indirect often more strong than that of words or direct teaching.

In this connection the following remarks by one of the board are appropriate :

“When it is said that the public school is the bulwark of the American Republic, I sometimes wonder if teachers consider seriously enough why it is so, and if they realize how easily it becomes a source of danger instead of safety. Only so far as the education received there develops character of the right kind, is it of any use to the nation.

“It is to the personal influence of the individual teacher, for instance, that we must look to prevent the unchristian spirit of emulation from hardening the hearts of boys and girls toward each other, and to see that the working for a high ‘per cent.’ does not degenerate into a love of show, instead of a love of learning.

“Above all must they look to it that the so-called ‘education’ does not beget a contempt for honest labor, and all that goes with it—parents often included.

“To be like the teacher is the secret and worthy ambition of many a pupil. This is a fearful responsibility, but if teachers only knew it, it is also an inestimable privilege. Children who are reached in no other way by any refining or elevating influence, feel it through and through in the personal magnetism of a teacher. In dealing with girls, all teachers do not realize the importance of thought in the matter of dress. The love of dress and the extravagant ideas to which it gives rise are among the most serious dangers to which girls are exposed. Teachers should not forget this.

“Aside from the question of taste and fitness, which would seem to suffice to banish all expensive and dressy fabrics, all elaboration of dress, and especially jewelry from the school room, there is the very serious moral question of the personal influence on the taste of half-educated girls and boys.

“A teacher is to them a type and model; let her be careful to stand for the results of the best education.

“It is a great moral step when girls have been taught to admire simplicity and neatness as seen in the model teacher, and to prefer them to ornament and show, a taste for which

leads to the extravagance which has been the first step in the downfall and ruin of many a character and household.

“To teach these things is in the power of every public school teacher, and it is often a lesson of more value than all the arithmetic in christendom.”

We wish still to repeat our sense of the need of simple lessons on money ; on the conditions which effect the rate of wages,—the principles of honest government by a self-governed people. In that direction we rejoice in the increase in the collection of “penny savings.”

“A child who is helped to deny himself some trifling gratification, who is encouraged to save by degrees a few shillings for helping his parents in a time of family misfortune, or for his own use for equipment on leaving school for work, has received a practical lesson in forethought and self-restraint, which will probably abide with him for life.”

E. Q. GUILD.

REPORT OF SUPERINTENDENT OF GRAMMAR AND PRIMARY SCHOOLS.

To the School Committee of Brookline:

I herewith respectfully submit my report for the year ending January 31, 1882.

The work of the past year shows gratifying results. The teachers have been faithful, and many enthusiastic in their work. Truancy has decreased; tardiness, especially in the Ward school, has diminished, and the pupils have shown more than usual interest in their lessons.

The work done in the schools, but more particularly in the Primaries, is so unlike what it was a few years ago as to lead to wide misconception regarding present methods and courses of instruction, and I have thought it best to depart somewhat from the usual custom, and present what may be well known to the board, but which may serve to give needed information to the town as to our method of procedure, from the time the child enters school at five years of age, or thereabouts, to the end of the Grammar school course, embracing a period of nine years.

READING.

Although I presented my views on reading, to some extent, a year ago, the subject is so important I cannot refrain from adding a few lines at this time. The importance of teaching reading well, and all that is implied thereby, cannot, it seems to me, be over-estimated, as on leaving school the two principal sources of obtaining information are from reading and observation. The pupil must be taught not only to call words readily, but he must be able to appropriate to himself the thoughts the author intends to be conveyed, as expressed in phrases and sentences. To this end, much patient drill in definitions will be necessary, as also practice in expressing in pupil's own language what he reads.

The plan heretofore in use has given too little variety in reading—one book answering for a year, and perhaps two years, and that containing many pieces poorly adapted to the age and capacity of the pupils—and the natural result is that they are drilled to read a very few selections quite well; but little taste for reading is acquired from the narrow limit and meagre supply of books. Much has been done, particularly in the Primary schools, to remedy this defect, but if we expect the best results from reading in the schools, much more remains to be done in the way of supplying a greater variety of reading matter for the Grammar schools.

How can this be done without at the same time adding materially to the cost of the schools? If arrangements could be made with the trustees of the Public Library to furnish a few sets of books—say 25 to 50 books to a set—on such subjects as would meet the approval of the Committee, and then loan them to classes designated, for so long a time as might be necessary to have them read properly, one step would then be taken towards securing good books for the children to read, and without adding directly to the cost of the schools. The teachers could prescribe the number of pages to be read in a given time, the manner in which the books should be read, perhaps requiring the pupils to keep notes, and then set apart an hour a week for conversation and examination upon the subjects read. This is similar to a plan successfully tried in the Wells school in Boston, and I suggest it for your consideration.

Formerly, the child on entering school was confronted with twenty-six characters which we call the alphabet, and which he was required to learn as a preliminary step to aid him to read, often spending weeks, and even months, before they were fully mastered; and still there was no more connection between the letters when learned and the words he used in talking, and which he would soon use in reading, than there is between the various materials which enter into the compo-

sition of a house and the house itself, or the different parts of a chain which go to make a complete whole.

How does a child recognize a bird? Certainly not by having his attention first called to his feathers, then to his wings, feet, legs, beak, etc.; but he sees the bird as a whole. A few repetitions of seeing and observing familiarize him with the object. Synthesis and analysis belong to a later period of his education.

But the question is often asked, "When and how will the child learn his letters?" In brief I would say, very much as he learns many other things almost unconsciously, or at least without special instruction from the teacher or much effort on the part of the child. Further on I will state how he learns them, if at a certain stage of his progress he does not already know them.

HOW DO WE BEGIN?

On entering school every child has a limited vocabulary at his command. He can use his list of words with more or less fluency, and he comprehends what his teacher says, so far as she confines herself to sentences within his range of ideas; but as yet he does not recognize a single word when presented to his eye, either on the printed or written page. So far his sense of hearing has been largely used in acquiring a knowledge of words, and they have a significance *only* when heard, *never* when seen. He is now ready to be taught from the black-board the characters which are simply the representations of the words he speaks. Soon a familiarity with the words recalls vividly the objects or actions for which they stand.

We use script chiefly in teaching reading for the first five months, although some teachers almost from the start take the printed words in connection with the written.

The teacher writes a simple word on the board, as man, or cat, and the child writes it on his slate over and over again,

the teacher adding new words as fast as the child becomes familiar with the list already given. In the course of five months the child has a list of 50 to 100 words which he recognizes at sight, and he ought to be able to read any sentences made from this list of words, although he may never before have seen the particular combination or arrangement.

If we should show a child a dozen objects placed in a line, and ask him to name them in order from left to right, he would do it readily, provided he was sufficiently familiar with them to call them by name. Change the order and he still could do it. He can do the same with words.

But it may be urged that there is a greater similarity between a score of promiscuous words than between the same number of selected objects. This is undoubtedly true, and in teaching words, care must be exercised in pointing out differences which exist. It gives an opportunity to cultivate habits of observation and discrimination.

In the early steps of the child's work, the characters which he makes for words are rude indeed; but they mean something to him, and by recognizing and encouraging every honest effort, and kindly pointing out defects, the progress is often wonderful.

It is impossible in a brief report to state very minutely the progressive steps, but in less than a year some pupils will read quite readily from the primers commonly used in the schools, and in less than two years they will write simple sentences from dictation, or copy in script simple prose from their readers.

The slates are all ruled alike, being uniform in width of spaces, thus giving the child a guide for height of letters, while the oblique lines at the top show their slant. The third year pupils can write quite a passable story or composition upon some simple subject, or from a picture placed before them, which suggests thoughts for them to express.

WRITING.

Copy books are used to some extent in all the classes above the lowest grade. The first book is simply for tracing, and the first half of each page in Book II. is also for tracing. All other books have a copy at the top of each page.

Pupils must be taught their letters in connection with their writing, in case they do not already know them. Great care should be exercised in the drill books, and we aim to secure good position of the body at the desk, and to cultivate correct habits of holding the pen; but in watching the classes in their writing we are convinced that we sometimes fail in the latter attempt. Blank books in which to copy abstracts of lessons, compositions, selections of prose and poetry, etc., alternate with the copy books in the grammar grades. With these suggestions in regard to the use of the blank books, every teacher is left to make her own selections. These books are really a better test than the copy books, as showing what the classes can do, there being no copy as a guide for style, size, or slant of the letters.

DRAWING.

Primary Department.

For lower primary grades,—copying on their slates, lessons given from the black-board by the teacher, comprising all the work in books 1 and 2 of Smith's drawing-books; names and definitions of the most simple terms used in drawing.

Grades 1 and 2,—Drawing in books 1 and 2, learning to use the pencil and rubber, and to draw lines neatly.

Grammar Department.

Books 3 to 9,—each class to complete one book in each term. These books contain lessons in straight and curved line forms, gradually growing more difficult; forms used in design, designs, geometrical and perspective views of objects,

geometry, lessons from the black-board, dictation, memory, and objects, the various styles of ornament used by different nations.

ARITHMETIC.

Arithmetic in some form is taught in all the grades, from the lowest to the highest. In the Primary schools it is taught under the technical name of numbers, and we rely mainly upon the efficiency and ingenuity of the teachers, they availing themselves of the suggestions found in the course of study, together with such hints or advice as may be given from time to time by the Committee or Superintendent. In the earliest stages of teaching numbers, the pupils are gathered around a table, on which are blocks, counters, buttons, acorns or some other simple objects. These the children can handle in counting, adding, subtracting, and in fact, in performing all the operations in numbers for some months. They are not hurried, as all we expect for the first five months' work is to develop the numbers 1, 2, 3 and 4, making no combination greater than 4, and for the year no combination greater than 10; which includes the ability to make the figures used, also a knowledge of the Roman numbers in order, to X.

Instead of teaching the multiplication table as formerly, we use what is known as Grube's method, by which we teach all the processes,—addition, subtraction, multiplication and division, as far as we advance, which is distributed through the Primary course as follows: 1st year, to 10; 2d year, to 50; 3d year, to 1,000.

At first we allow the pupils to see and handle the objects as they make their computations. The next step is to require them to make the combinations while the particular objects are in their minds, but not seen, allowing them to test their answers by immediately referring to the objects; and lastly we require abstract work. It is impossible here to any more than outline the work.

In the Grammar schools the work is carried on with the aid of arithmetics in the hands of the pupils. The object for which we are constantly striving is to enable the pupils in the end to become self-reliant; comprehending principles rather than relying upon rules which soon pass from the mind.

LANGUAGE AND GRAMMAR.

Two years ago I stated somewhat fully what we aimed to accomplish in language. I have already alluded to the work in the Primary schools.

In the course of study, under the head of Language, for the sixth class we find these suggestions:—"Oral instruction, —Exercises in correcting errors in speech or writing, —Practice in the use of capitals, —Read and tell short stories, and require pupils to write all they remember, —Copy paragraphs from reader, —Letter writing."

Hooker's Child's Book of Nature is used at least twice a week in the 4th, 5th and 6th classes, and this gives a variety of subjects for dictation and composition exercises. The 1st, 2d and 3d classes have dictation exercises from other works of Dr. Hooker. In addition to the above, Swinton's Language Lessons are used in the four upper classes, and in whatever form or under whatever name, whether dictation, composition, language or grammar, the object and end in view is the same; namely, to enable the pupils to speak and write the English language correctly.

HISTORY.

We aim in all our grades to interest the pupils as much as possible in the history of nations, their industries, state of civilization, their governments and religion, their intercourse with one another by means of trade and commerce, and the effect produced thereby. United States History is taught in the 2d and 3d classes, and English History in the 1st class.

From the discovery of America in 1492, down to the present time, we try to fix in the minds of the pupils the most important events, the causes, results and effects, without intending to confine them to the language of their text-books. We encourage originality of expression so far as practicable, in their written abstracts, not holding them so much to precise dates, as to natural order and sequence of events ; aiming, however, to fix in the mind a few prominent dates, which may be considered in the light of historical land-marks.

D. H. DANIELS,
Superintendent.

TWENTY-FIFTH ANNUAL REPORT OF THE TRUSTEES OF THE PUBLIC LIBRARY.

HOURS — from 9 A.M. to 9 P.M.

TRUSTEES' REPORT.

THE Trustees herewith submit their twenty-fifth annual report, together with those of the librarian and the treasurer of the board.

The report of the librarian is a full and comprehensive account of the present condition of the library, and tells in detail the story of its management for the twelve months past. The report of the treasurer shows the Gardner Fund and the Hall Fund to be advantageously invested, and the income to have been regularly paid in.

The number of books in the library is 26,158.

The circulation during the year has been 43,699.

The additions during the year have been 977 volumes and 186 pamphlets.

The great undertaking of the year has been the Supplementary Catalogue. It contains all the additions made to the library since the publication of the catalogue of 1873, and contains the titles of more than 10,000 books, with voluminous cross references and carefully studied analyses. Although the number of books included is less than one-half of the total number on the shelves, it is safe to say that it represents the most intrinsically valuable portion of the library. The income of the two funds having enabled the trustees to purchase during the last nine years, numerous works of high character and considerable cost.

The task of compiling this catalogue has been accomplished by Miss Bean, the librarian, without extra aid, and its magnitude can only be appreciated by those conversant with the science of catalogue work. Miss Bean has also had the sole

superintendence of the printing of the five hundred and forty pages, which in itself has involved a great amount of labor.

The Trustees feel that they cannot too much commend this elaborate and skilfully prepared volume, which they believe will compare favorably with the best of its kind.

The sheets are now finished and in the hands of the binder, and the frequenters of the library will soon have the opportunity of availing themselves of the great additional facility thus afforded.

Twenty-five years have nearly elapsed since the germ of the Brookline Public Library, consisting of 900 volumes, appeared in a corner of the old Town Hall building. These were opened to the town on the second of December, 1857. The first quarter of a century of its existence, however, will be rounded out on the 30th of March, this year, that being the month when the town voted its establishment.

Perhaps no institutions have won their way to public favor more rapidly than town libraries during that period, and in no case is this fact more strongly illustrated than in that of Brookline.

When the erection of the library-building was contemplated, so strong was the opposition to it in certain quarters, that an injunction against it was actually applied for in the Supreme Court. To-day a fine building containing over 26,000 volumes, with a reading-room upon whose tables are spread 78 periodicals, provides for the old and young, literary instruction and entertainment, which the inhabitants were formerly forced to seek at a distance or live without possessing.

It has endowments from private citizens amounting to \$15,000, and receives liberal appropriations for its maintenance, annually voted by tax-payers with rarely a dissentient voice.

The duties of the library for the past year, have been, as heretofore, faithfully attended to by those in charge of the

several departments. Whilst testifying to the merit of all, the Trustees would especially recognize the devotion of the librarian, who, tied to her desk by the extraordinary labor required by the new catalogue, voluntarily sacrificed her vacation, and remained at her post without relaxation, during the entire summer.

The Trustees earnestly desire to consult all the varying tastes of those who call for books, and therefore would again call attention to the register kept at the delivery desk, in which the titles of all books called for or suggested, and which are not already in the library, may be entered.

Such entries are always carefully considered by the Trustees, and some of them have brought under consideration books of value, which would possibly not have been otherwise added to the library.

CHARLES D. HEAD, *Treasurer.*

BROOKLINE, January 31, 1882.

This certifies that I have examined the foregoing account with vouchers and securities, and find the same to be correct, and the balance on hand to be the sum of six hundred forty-four and $\frac{90}{100}$ dollars (\$644.09).

R. G. F. CANDAGE, *Auditor.*

BROOKLINE, February 6, 1882.

LIBRARIAN'S REPORT.

BROOKLINE, Feb. 1, 1882.

To the Trustees of the Brookline Public Library:

GENTLEMEN, — My tenth annual report is herewith respectfully submitted, setting forth the details and results of our library work for the official year ending January 31, 1882.

I cannot forget that this contributes to the *twenty-fifth* report of the institution, a point in its history which seems to call for more than the ordinary record of a year's work, and I had hoped to prepare a careful resumé of the history and work of the quarter century as well, but the task of printing the Supplement has so completely absorbed my time up to date that no thorough investigation of the records and reports has been possible, consequently the attempt has been reluctantly abandoned, rather than treat the subject but indifferently well.

I may be pardoned, however, for having appended to this report, as a matter of interest to the curious, and of possible use to the statistician of the future, a tabular statement of the growth and circulation for the whole twenty-five years.

The special history of the year 1881-2 has several elements for congratulation beyond its general maintainance of rank in condition, growth, and circulation; or the accomplishment of its full measure of routine and special work. These elements go below the surface of demand and supply of current reading, and strike the deeper mines of study and research.

There really seems to have sprung up a realization of the fact that there is hidden wealth in the library, which all may share for the asking, and it gives me genuine pleasure to report that some of this wealth is being appropriated in directions which can but produce the best results.

CONDITION.

The library is in every way well-conditioned and well-prepared to do efficient work, its entire collection of books is fully catalogued, and the books themselves in as good condition as constant use will allow.

There are no serious complaints of abuse to make, although several fines have been imposed and collected during the year, and quite a number of cases are still awaiting my attention.

The number of books worn sufficiently to be withdrawn or re-bound has also been comparatively small, only 77 volumes being totally unfit for use, and 214 others sent to the binder for repairs.

Our shelves now contain 24,441 books in actual service, and 1,717 unused duplicates, making an aggregate of 26,158 volumes, and it may safely be added that the library, as a whole has been so carefully and judiciously selected that few changes could be desired, even in the light of recent criticism and discussion.

ACCESSIONS.

The story of accessions may be briefly told: fewer gifts have been received, less books purchased, and a smaller number bound from the current periodicals than usual.

Despite this falling off in figures, the accession catalogue and book-binder's schedules, together record 629 purchases, 231 gifts, and 117 bound serials, making a total increase of 977 volumes, with the additional items of 186 pamphlets and 248 miscellaneous numbers of magazines and reviews.

Contributions of books, pamphlets, and sets of unbound periodicals have been received from numerous friends, and their kindness is gratefully acknowledged. Many of these gifts deserve special mention, both on account of their number and value, but the limits of the report will not permit, and attention can only be called to them in a general way by reference to Appendix A.

CIRCULATION.

The record of circulation shows 306 working-days, in which 43,699 volumes were delivered for home use, averaging 143 per day. The downward tendency of these figures is owing, in a measure, to known efforts on the part of parents, teachers, and library authorities to stem the tide of rapid and indiscriminate reading which has been so prevalent among the young. This indication of partial success becomes, therefore, a matter of rejoicing.

The extremes of daily loans were reached on March 5th and June 17th, when 374 and 18 volumes, respectively, were delivered.

An additional 1,866 volumes have been loaned for reference and special use in the reading-room, making the entire supply of books, as recorded at the desk, amount to 45,565 volumes.

Three books have been lost during the year, two of which were immediately replaced by the losers, and the third promised. One book, accidentally injured, has been rebound at the expense of the borrower.

Postal notices have been sent on 3,014 overdue accounts, and fines to the amount of \$123.07 collected.

THE SUPPLEMENT.

It gives me pleasure to report the completion of the long-needed and long-expected supplement to the catalogue. Its preparation and printing has been the great work of the year, and one which has occupied all my time and thought for nearly ten months. The intense anxiety and mental strain of such labor can never be fully understood except by those familiar with catalogue work and catalogue proof-reading. I therefore despair of giving any adequate idea of the ordeal, even to those of you who are most conversant with my methods of work.

The first draft of titles was in manuscript-slips at the time of my last report, and portions of the work were alphabetically arranged. Since May last, the alphabetical work has been completed, all new books, up to July, have been catalogued and incorporated in the manuscript, and the whole carefully revised and corrected.

The work upon copy was far enough advanced to begin printing September 1st, and the entire catalogue was completed January 31st. The volumes are now in the hands of the binders and will be ready for delivery within two weeks. The work is finished. If it only proves all that I have striven to make it, and wins your approval, the labor will not have been in vain.

In reporting at length upon my special work, I cannot but remember my indebtedness to Miss Woods, who has been indefatigably at her post, relieving me not only of all care of that department, but cheerfully taking many of the details of my usual work upon herself, besides rendering valuable assistance upon the new supplement, by verifying all the numbers from the proof-sheets. My appreciation of these special services, and of the faithful and efficient discharge of duty on the part of both assistants is gratefully acknowledged.

MARY A. BEAN,

Librarian.

APPENDIX D.

TABLE SHOWING STATISTICS OF GROWTH AND CIRCULATION,
FROM DEC. 2, 1857, TO FEB. 1, 1882.

| REPORT. | YEAR. | NO. OF VOLS. | CIRCULATION. |
|-------------|-------|--------------|--------------|
| Established | 1857 | 1,000 | — |
| 1st | 1858 | 2,137 | 2,000 |
| 2d | 1859 | 2,856 | 10,108 |
| 3d | 1860 | 4,118 | 11,000* |
| 4th | 1861 | 5,751 | 11,619 |
| 5th | 1862 | 5,360 | 14,022 |
| 6th | 1863 | 6,239 | 15,005 |
| 7th | 1864 | 6,817 | 17,575 |
| 8th | 1865 | 7,520 | 19,206 |
| 9th | 1866 | 8,502 | 19,793 |
| 10th | 1867 | 9,026 | 19,103 |
| 11th | 1868 | 9,687 | 18,011 |
| 12th | 1869 | 10,500 | 18,144 |
| 13th | 1870 | 12,000 | 22,381 |
| 14th | 1871 | 13,552 | 33,393 |
| 15th | 1872 | 14,448 | 17,389† |
| 16th | 1873 | 15,593 | 37,105 |
| 17th | 1874 | 16,669 | 50,120 |
| 18th | 1875 | 17,893 | 37,949‡ |
| 19th | 1876 | 19,323 | 42,427 |
| 20th | 1877 | 20,282 | 45,619 |
| 21st | 1878 | 21,416 | 50,427 |
| 22d | 1879 | 22,925 | 44,736§ |
| 23d | 1880 | 24,018 | 50,435 |
| 24th | 1881 | 25,181 | 44,585 |
| 25th | 1882 | 26,158 | 45,565 |

* Librarian's report says "a little less than 11,000 vols. have been delivered."

† Library closed several months in summer for re-arrangement. The above figures date from the re-opening, Sept. 11, 1872.

‡ Change in town by-laws, requiring reports to be returned Feb. 15, cut short the library year.

§ Library closed two months for examination and cleaning of books.

REPORT

OF THE

PARK COMMISSIONERS.

At the annual town meeting, held in March, 1881, the sum of one thousand dollars was appropriated for the "Muddy River Improvement." Immediately thereafter, the joint Commissioners of Boston and Brookline authorized Mr. Olmsted to elaborate his sketch of the proposed new Park-way, which was distributed in the Town Report of last year, and also authorized Mr. Wightman, the City Engineer, to make a detailed survey of the territory embraced in Mr. Olmsted's plan—the town to be responsible for three-eighths of the expenses incurred. This work has been completed. Mr. Olmsted's plan has been distributed from the office of Town Clerk, and is familiar to most of our citizens. The Commissioners have also a large plan giving in detail the areas of the different estates which it is proposed to include within the Park-way.

The estimated number of square feet lying within the limits of the town, including marsh lands wholly or in part submerged by every tide, is as follows:—

| | |
|---|-----------|
| Belonging to private individuals and corporations | 1,198,200 |
| “ the town, Pond avenue | 118,500 |
| Ward school lot | 34,800 |
| | <hr/> |
| Total number of square feet | 1,351,500 |

Upon this land are eight buildings on Brookline avenue, valued, according to the Assessors' books, at from one hundred to one thousand dollars, each; and the Ward school-house, which, in Mr Olmsted's opinion, should be removed.

The assessed valuation of this tract of land, as nearly as it can be ascertained, including buildings, exclusive of the town property, is forty thousand dollars.

The valuation of the land lying within the city limits, as given on the same plan, is estimated by the Boston Park Commissioners at \$409,130.

In December last, the city authorities passed an order, directing the Treasurer to borrow the sum of \$200,000, by the issue of bonds, to be denominated the "Public Park Loan," and authorizing the Park Commissioners to expend the same for the taking in fee, by purchase or otherwise, for the purpose of a Public Park, lands to the amount of \$200,000, in assessed valuation, "whenever the town of Brookline shall co-operate, and appropriate a proportionate sum for said (Muddy River) improvement."

The Boston Commissioners are now awaiting the action of the town in the matter.

We therefore respectfully ask the town to authorize the issue of bonds to the amount of forty thousand dollars, to be expended by us from time to time, in procuring, by purchase or otherwise, the land, lying within the limits of the town, required to carry out Mr. Olmsted's plan.

We also ask for an appropriation of two thousand dollars for current expenses for the ensuing year.

The attention of citizens is called to the following extract from the Boston Park Commissioner's Report for 1881:

"In this connection it is instructive to observe the changes in the tax valuations of the lands assessed for betterments, which have taken place since 1871, as evidence, favorable or otherwise, of the judgment of the Commissioners in fixing the assessments as they did, * * * showing

an increase in 1881 over 1877, of \$8,813,849, or 79 per cent., and yielding an increase of revenue in 1881, at the rate of \$13.90 per \$1000, of \$122,509.72, which is the present monetary value of the Park as affecting the city's income, representing a value of three million dollars at 4 per cent., and which justifies the opinion heretofore expressed by the board, that the Park is not a tax upon the city, but that the increased taxes from the surrounding property pay its cost."

In order that the citizens of the town may fully understand the authority under which the Park Commissioners propose to take this land for the purposes of a Park-way, an extract from the so-called "Park Act" is appended.

We also give the names of the land owners, with the amounts to be taken from each, as given on the plan of the City Engineer, which plan can be seen at the office of the Town Clerk.

Respectfully submitted,

FRANCIS W. LAWRENCE,
CHARLES S. SARGENT,
THEODORE LYMAN,

Park Commissioners.

Brookline, Feb. 1, 1882.

EXTRACT FROM CHAP. 185, ACTS OF 1875.

An Act for the laying out of Public Parks in or near the City of Boston.

* * * * *

SECT. 3. Said board shall have power to locate within the limits of the city of Boston, one or more public parks; and for that purpose, from time to time, to take in fee, by purchase or otherwise, any and all such lands as said board may deem desirable therefor; or to take bonds for the conveyance thereof to said city, to lay out, improve, govern and regulate any such park or parks, and the use thereof; to make rules for the use and government thereof, and for breaches of such rules to affix penalties not exceeding twenty dollars for one offence, to be imposed by any court of competent jurisdiction; to appoint all necessary engineers, surveyors, clerks and other officers, including a police force to act in such parks; to define the powers and duties of such officers, and fix the amount of their compensation; and generally to do all needful acts for the proper execution of the powers and duties granted to, or imposed upon said city, or said board, by this act: *provided, however,* that no land shall be taken, or other thing involving an expenditure of money done, until an appropriation, sufficient to cover the estimated expense thereof, shall have been made by a vote of two-thirds of each branch of the city council of said city.

SECT. 4. Said board shall, within sixty days after the taking of any land under this act, file in the registry of deeds for the county in which the land is situated a description thereof, sufficiently accurate for identifying the same.

SECT. 5. Said board shall estimate and determine all damages sustained by any persons by the taking of land or other acts of said board in the execution of the powers vested in them by this act; but any party aggrieved by any

such determination of said board may have his damages assessed by a jury of the superior court, in the same manner as is provided by law with respect to damages sustained by reason of the laying out of ways in the city of Boston.

SECT. 6. The fee of all lands taken or purchased by said board under this act shall vest in the city of Boston, and said city shall be liable to pay all damages assessed or determined, as provided in the preceding section, and all other costs and expenses incurred by said board in the execution of the powers vested in them by this act. Said city shall also be authorized to take and hold in trust or otherwise any devise, grant, gift or bequest that may be made for the purpose of laying out, improving or ornamenting any parks in said city.

SECT. 7. Any real estate in the city of Boston, which in the opinion of said board shall receive any benefit and advantage from the locating and laying out of a park under the provisions of this act, beyond the general advantages to all real estate in the city of Boston, may, after like notice to all parties interested, as is provided by law, to be given by the street commissioners of the city of Boston in cases of laying out streets in said city, be assessed by said board for a proportional share of the expense of such location and laying out: *provided*, that the entire amount so assessed upon any estate shall not exceed one-half of the amount which said board shall adjudge to be the whole benefit received by it.

SECT. 8. No assessment shall be made as provided in the preceding section except within two years after the passage of the order, the execution of which causes the benefit for which the assessment is made.

SECT. 9. All assessments made under this act shall constitute a lien upon the real estate so assessed, to be enforced and collected by the city of Boston, in the same manner and with like charges for costs and interest as is provided by law for the collection of taxes; and such assessments may be ap-

portioned by said board in like manner as assessments for benefits caused by the laying out of ways may now be apportioned by the street commissioners of said city.

SECT. 10. Any party aggrieved by any assessment made by said board as aforesaid, may have the amount of the benefit received by his estate assessed by a jury of the superior court in the same manner as is provided by law with respect to damages sustained by reason of the laying out of ways in the city of Boston.

SECT. 12. For the purpose of defraying the expenses incurred under the provisions of this act, the city council of Boston shall have authority to issue, from time to time, and to an amount not exceeding the amount actually expended for the purchase or taking of lands for said parks, bonds or certificates of debt, to be denominated, on the face thereof, the " Public Park Loan," and to bear interest at a rate not exceeding six per centum per annum, and to be payable at such periods as said council may determine. For the redemption of such loan said council shall establish a sinking fund sufficient, with the accumulating interest, to provide for its payment at maturity. All sums received for betterments shall be paid into said sinking fund, until such fund shall amount to a sum sufficient, with its accumulation, to pay at maturity the bonds for the security of which the fund was established.

SECT. 13. No street or way, and no steam or horse railroad shall be laid out over any portion of any park located under this act, except at such places and in such manner as said board shall approve.

SECT. 16. The mayor of any city adjoining the city of Boston may, with the approval of the city council of such adjoining city, appoint, and the inhabitants of any town adjoining the city of Boston, may, at any legal meeting called for the purpose, elect park commissioners, who shall

have powers similar to those herein before given to the park commissioners of the city of Boston, to lay out, and improve parks within such adjoining city or town in conjunction or connection with any park laid out in Boston; and any park laid out by the park commissioners of such adjoining city or town shall be subject to similar provisions to those herein before made regarding parks in Boston, and such adjoining city or town shall have similar rights and be subject to similar duties to those herein before given to and imposed upon the city of Boston in relation to incurring debts for the purpose of defraying expenses incurred under this act: *provided, however*, that the provisions of this section shall not apply to any such adjoining city that has not accepted the same by a vote of a majority of the legal voters at the annual meeting for the choice of municipal officers.

LIST OF OWNERS, AND APPROXIMATE AREAS OF LAND,
PROPOSED TO BE TAKEN FOR THE MUDDY
RIVER IMPROVEMENT.

Respectfully submitted,

MOSES WITHINGTON,

Treasurer.

REPORT OF THE AUDITORS.

The Auditors, for the year ending January 31, 1882, have examined the accounts of Moses Withington, Treasurer of the Town of Brookline, of the Warren Tree Fund and of the Walnut Hills Cemetery Fund, and find the same correctly cast, and with proper warrants. They have also, so far as possible, examined into the receipts accruing to the town, and find the same correctly entered. They have also examined the accounts of C. D. Lincoln, Water Registrar, and find the same correctly cast, and with proper vouchers of payment. They have also counted the securities of the Sinking Fund, and examined the account of C. D. Head, its Treasurer, and find the same correct.

They respectfully call the attention of the town to what seems to them the continued violation of Art. V., Sec. 9, of the Town By-laws, in reference to contracts by town officers, and would recommend that one of two things be done: i. e., either the town should very materially increase the penalty for breach of said by-law, and request the Selectmen to enforce the same, or else the town should abrogate the by-law altogether. An ordinance so constantly and flagrantly broken (as will be seen by looking over the items of the Treasurer's report, etc.) is worse than none at all.

The town has paid off \$27,004.66 of its debt, but it has added to it \$24,000 water bonds, leaving the net decrease only \$3,004.66. The inference is obvious. The Auditors

respectfully urge and recommend the town to *borrow* less, as it is very little use to attempt to expunge our debt if the town constantly keeps incurring fresh liabilities of almost the same amount as those paid. We should keep before us as examples, and take warning by, the bankrupt city of Elizabeth, New Jersey, and town of Wiscasset, Maine.

WILLIAM D. COOLIDGE,
FREDERIC CUNNINGHAM,
FRED. C. BOWDITCH,

Auditors.

TAX LIST
OF THE
TOWN OF BROOKLINE,
FOR THE YEAR 1881.

RATE: \$10.80 ON \$1,000.

BROOKLINE :
The Chronicle Press : C. A. W. Spencer.
1882.

LIST OF RESIDENTS ASSESSED POLL TAX ONLY, FOR 1881.

REPORT OF THE ASSESSORS.

The Assessors have the pleasure, in presenting their annual report, of congratulating their fellow-townsmen upon the good condition of the town affairs and the opening prospect of its future prosperity. The importance of a low rate of taxation and the necessity of strict economy of expenditure in order to maintain a low rate, is well understood, but it may be well to give it especial attention at this time in view of the great reduction in our resources which will be made by the law of last year effecting the assessment of mortgaged property.

Although, through this reduction, an increase in the rate may be inevitable, yet if a resolute determination be maintained to restrict the appropriations to what the public necessities absolutely require, we may still hope that a rate may be presented which shall be relatively moderate, and attractive to new residents. The effect of the law as it now stands, must be to largely increase the labors of the Assessors, and to require additional clerical force, for which suitable appropriation should be made. The increase of assessable property for the last year was \$853,600, and the indications point to a larger increase in the year to come. The great natural advantages of our beautiful town for suburban residences, the unequalled purity of its water, the salubrity of its air, the beauty of its scenery, the character and condition of its public works, and the excellency of its municipal government, surely justify in us the anticipation of a liberal share in the future growth and prosperity of the neighboring metropolis.

Appended is a condensed statement of the taxes of the town,—with table of aggregates of expenditures, debt, valuation and rate up to the present time.
